Subject: Robust Inspection

The new inspection system (Team Inspection) is just another step to Discretionary Inspection. This system was Defeated by consumers years ago.....people of this country were in an uproar of this system. Now years later the Agency is climbing back aboard this political boondoggle. The Agency just does not get it....our Country was formed By the People and for the People; and not by an Agency with its own agenda. All that the Agency has accomplished is To Help the big Meat and Poultry Corporations; and to close down the mom and pop packers of this country. This I have Seen in my many years as an Inspector. The Agency has worked hand and hand with big business. Who is running this Agency?. We all know the answer. Politicians and Big Business.....

38 Years of seeing our system torn apart,
Joe Tiscia
