EXPLANATORY NOTE

Fatal and personal injury accident data by highway system for the calendar year 1967, compiled from reports submitted by the 50 States and the District of Columbia on Table TA-1, are summarized in the tables which follow.

Table FRS-1 (page 1) presents a 1966-1967 comparison of fatality rates by highway system.

The following 12 tables show fatal accident, fatality, injury-accident and injury rates per 100 million vehicle miles of travel by highway system and State.

Table VPD-1 (page 14) relates the fatality and injury data to vehicle registrations, population and numbers of licensed drivers.

The remaining tables consist principally of the detailed information on which the preceding tables are based. In addition to rates, the actual numbers of vehicle miles, accidents, fatalities and injuries are shown by highway system and State as are also figures on miles of highway in service.

In the use and interpretation of these tabulations, certain qualifications applicable to the data should be borne in mind:

1. Certain of the States were unable to supply data on accidents, fatalities and injuries for each of the 12 individual highway systems. In such cases it was necessary to distribute the data submitted in the form of subtotals among the individual systems. The asterisks which appear following the names of the States on Tables FT-1 through FT-11 and IT-1 through IT-11 indicate the cases in which this procedure was necessary.
2. The wide range of rates shown for non-fatal injury accidents and injuries is attributable in large part to substantial State-to-State differences in the completeness of reporting, particularly in the case of urban accidents. Since these accidents are customarily investigated by local enforcement agencies, information regarding them is not always available to a State agency. This range of rates is accentuated by marked differences among the States in the proportions of travel in urban areas.
3. The nationwide total number of fatalities shown in these tables (51,559) differs from the 1967 figure reported by the National Safety Council (53,100). Part of this difference is explained by the inclusion in the Council's figure of 505 fatalities which occurred in Puerto Rico and Guam; these are not included in the accompanying tables. Further, the actual total reported by the Council for the 50 States and the District of Columbia (51,500) is 59 less than that shown in the accompanying tables. The remaining difference (1,036) is presumably an allowance estimated by the Council for additional fatalities which may occur within 12 months from the dates of the accidents.
4. Although the figure shown for total vehicle miles on all highways is the same as that in Tables VM-1 and VM-2, *Highway Statistics, 1967*, there are minor differences in the rural-urban distribution due to rounding.

Fatality Rates

1/ Includes all highway systems except Interstate (final).

4/ Includes highway systems in column numbers 7 and 11.

2/ Traveled Way Interstate. Includes highways not yet upgraded to full Interstate design standards but adequate for present traffic; also older sections of existing highways presently serving Interstate corridor traffic.

3/ Includes highway systems in column numbers 2-4, 6, and 10.

NOTE: Rates are computed from data shown in Tables FT-1 through FT-11.

Injury Accident Rates

- 1/ Includes all highway systems except Interstate (final).
- 2/ Traveled Way Interstate. Includes highways not yet upgraded to full Interstate design standards but adequate for present traffic; also older sections of existing highways presently serving Interstate corridor traffic.
- 3/ Includes highway systems in column numbers 2-4, 6, and 10.
- 4/ Includes highway systems in column numbers 7 and 11.

NOTE: Rates are computed from data shown in Tables III-1 through III-11.

Injury Accidents and Travel

^{1/} Non-fatal injuries include those which result from fatal accidents, as well as those which result from non-fatal accidents.

^{2/} Totals slightly exceed the sum of the data for the component highway systems since a few frontage roads, in the five States indicated, have not been assigned to a specific highway system.

[†] Includes all highway systems except those shown on Tables IT-7 (Federal-Aid Secondary--Local) and IT-11 (Local Roads and Streets).

²/ Totals slightly exceed the sum of the data for the component highway systems since a few frontage roads, in the five States indicated, have not been assigned to a specific highway system.

¹/ Non-fatal injuries include those which result from fatal accidents, as well as those which result from non-fatal accidents.

^{1/} Non-fatal injuries include those which result from fatal accidents, as well as those which result from non-fatal accidents.

^{2/} Totals slightly exceed the sum of the data for the component highway systems since a few frontage roads, in the five States indicated, have not been assigned to a specific highway system.
