

The American Society for Photogrammetry & Remote Sensing

invites you and your staff to a
briefing for Members of Congress

Fifth in the "Science, Society, Solutions" series:

Landsat: A Long Look At A Changing World

Data from Landsat satellites have provided the United States and international users with a continuous stream of land-image data since 1972. The wealth of data now available - with more continuing to arrive - provides an unprecedented ability to look at changes on the Earth over nearly three decades. Learn how Federal, State and local governments, and the private sector are using Landsat data to address issues related to agriculture, land-use planning, coastal resources, and the effects of natural disasters.

Friday, September 21

10:00 am - 11:00 am
Rayburn House Office Building
Room 2318

Refreshments will be served

Speakers:

Barbara Ryan
Associate Director for Geography
U.S. Geological Survey

Dr. Doyle Watts
Associate Professor
Wright State University

Dr. Mary Cleave
Deputy Associate Administrator
Office of Earth Science Enterprise, NASA

**Sponsored by Representative Tom Davis, Senator Tom Daschle,
Senator Tim Johnson, Representative Sherwood Boehlert,
Representative Ralph Hall and Representative John Thune**
