

# Rules and Regulations

Federal Register

Vol. 72, No. 112

Tuesday, June 12, 2007

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

## DEPARTMENT OF AGRICULTURE

### Animal and Plant Health Inspection Service

#### 7 CFR Part 301

[Docket No. APHIS–2006–0169]

#### Pine Shoot Beetle; Additions to Quarantined Areas

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Affirmation of interim rule as final rule.

**SUMMARY:** We are adopting as a final rule, without change, an interim rule that amended the pine shoot beetle regulations by adding the entire State of Iowa and two counties in New Jersey, Morris and Somerset, to the list of quarantined areas. We took that action following the detection of pine shoot beetle in these areas. The interim rule was necessary to prevent the spread of pine shoot beetle, a pest of pine trees, into noninfested areas of the United States.

**DATES:** Effective on June 12, 2007, we are adopting as a final rule the interim rule that was published at 72 FR 6433–6435 on February 12, 2007.

**FOR FURTHER INFORMATION CONTACT:** Mr. Weyman Fussell, Pine Shoot Beetle Program Manager, Emergency and Domestic Programs, PPQ, APHIS, 4700 River Road Unit 134, Riverdale, MD 20737–1231; (301) 734–5705.

#### SUPPLEMENTARY INFORMATION:

##### Background

The regulations in 7 CFR 301.50 through 301.50–10 (referred to below as the regulations) restrict the interstate movement of certain regulated articles from quarantined areas in order to prevent the spread of pine shoot beetle into noninfested areas of the United States.

In an interim rule<sup>1</sup> effective and published in the **Federal Register** on February 12, 2007 (72 FR 6433–6435, Docket No. APHIS–2006–0169), we amended the pine shoot beetle regulations in § 301.50–3(c) by adding the entire State of Iowa and two counties, Morris and Somerset, in New Jersey to the list of quarantined areas.

Comments on the interim rule were required to be received on or before April 13, 2007. We did not receive any comments. Therefore, for the reasons given in the interim rule, we are adopting the interim rule as a final rule.

This action also affirms the information contained in the interim rule concerning Executive Order 12866 and the Regulatory Flexibility Act, Executive Orders 12372 and 12988, and the Paperwork Reduction Act.

Further, for this action, the Office of Management and Budget has waived its review under Executive Order 12866.

#### List of Subjects in 7 CFR Part 301

Agricultural commodities, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Transportation.

#### PART 301—DOMESTIC QUARANTINE NOTICES

■ Accordingly, we are adopting as a final rule, without change, the interim rule that amended 7 CFR part 301 and that was published at 72 FR 6433–6435 on February 12, 2007.

Done in Washington, DC, this 6th day of June 2007.

**Kevin Shea,**

*Acting Administrator, Animal and Plant Health Inspection Service.*

**BILLING CODE 3410–34–P**

## DEPARTMENT OF AGRICULTURE

### Animal and Plant Health Inspection Service

#### 7 CFR Part 301

[Docket No. APHIS–2007–0072]

#### Black Stem Rust; Addition of Rust-Resistant Varieties

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Direct final rule.

**SUMMARY:** We are amending the black stem rust quarantine and regulations by adding four varieties to the list of rust-resistant *Berberis* species or cultivars in the regulations. This action will allow for the interstate movement of these newly developed varieties without unnecessary restrictions.

**DATES:** This rule will be effective on August 13, 2007, unless we receive written adverse comments or written notice of intent to submit adverse comments on or before July 12, 2007. If we receive written adverse comments or written notice of intent to submit adverse comments, we will publish a document in the **Federal Register** withdrawing this rule before the effective date.

**ADDRESSES:** You may submit comments by either of the following methods:

- **Federal eRulemaking Portal:** Go to <http://www.regulations.gov>, select “Animal and Plant Health Inspection Service” from the agency drop-down menu, then click “Submit.” In the Docket ID column, select APHIS–2007–0072 to submit or view public comments and to view supporting and related materials available electronically. Information on using [Regulations.gov](http://www.regulations.gov), including instructions for accessing documents, submitting comments, and viewing the docket after the close of the comment period, is available through the site’s “User Tips” link.

- **Postal Mail/Commercial Delivery:** Please send four copies of your comment (an original and three copies) to Docket No. APHIS–2007–0072, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. APHIS–2007–0072.

<sup>1</sup>To view the interim rule, go to <http://www.regulations.gov/fdmspublic/component/main?main=DocketDetail&d=APHIS-2006-0169>.

**Reading Room:** You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690-2817 before coming.

**Other Information:** Additional information about APHIS and its programs is available on the Internet at <http://www.aphis.usda.gov>.

**FOR FURTHER INFORMATION CONTACT:** Dr. Vedpal Malik, Agriculturalist, Invasive Species and Pest Management, PPQ, APHIS, 4700 River Road Unit 134, Riverdale, MD 20737-1236; (301) 734-6774.

#### SUPPLEMENTARY INFORMATION:

##### Background

Black stem rust is one of the most destructive plant diseases of small grains that is known to exist in the United States. The disease is caused by a fungus that reduces the quality and yield of infected wheat, oat, barley, and rye crops by robbing host plants of food and water. In addition to infecting small grains, the fungus lives on a variety of alternate host plants that are species of the genera *Berberis*, *Mahoberberis*, and *Mahonia*. The fungus is spread from host to host by windborne spores.

The black stem rust quarantine and regulations, which are contained in 7 CFR 301.38 through 301.38-8 (referred to below as the regulations), quarantine the conterminous 48 States and the District of Columbia and govern the interstate movement of certain plants of the genera *Berberis*, *Mahoberberis*, and *Mahonia*, known as barberry plants. The species of these plants are categorized as either rust-resistant or rust-susceptible. Rust-resistant plants do not pose a risk of spreading black stem rust or of contributing to the development of new races of the rust; rust-susceptible plants do pose such risks. Section 301.38-2 of the regulations includes a listing of regulated articles and indicates those species and varieties of the genera *Berberis*, *Mahoberberis*, and *Mahonia* that are known to be rust-resistant. Although rust-resistant species are included as regulated articles, they may be moved into or through protected areas if accompanied by a certificate. In accordance with the procedures described below under "Effective Date," this direct final rule will add *Berberis thunbergii atropurpurea* 'Moretti Select', *B. thunbergii* 'Fireball', *B. thunbergii*

'Orange Rocket', and *B. thunbergii* 'Sparkler' to the list of rust-resistant *Berberis* species in § 301.38-2(a)(1).

The addition of the species listed above to the list of rust-resistant *Berberis* species is based on recent testing to determine rust resistance conducted by the Agricultural Research Service (ARS) of the United States Department of Agriculture (USDA) at its Cereal Rust Laboratory in St. Paul, MN. The testing is performed in the following manner: In a greenhouse, the suspect plant or test subject is placed under a screen with a control plant—a known rust-susceptible species of *Berberis*, *Mahoberberis*, or *Mahonia*. Infected wheat stems, a primary host of black stem rust, are placed on top of the screen. The plants are moistened and maintained in 100 percent humidity. This causes the spores to swell and fall on the plants lying under the screen. The plants are then observed for 7 days at 20-80 percent relative humidity. If the rust-susceptible plant shows signs of infection after 7 days and the test plants do not, the test results indicate that the test plants are rust-resistant. This test must be performed 12 times, and all 12 tests must yield the same result before USDA can make a determination as to whether the test plants are rust-resistant. The test may be conducted on 12 individual plants, or it may be performed multiple times on fewer plants (e.g., six plants tested twice or three plants tested four times). The tests must be performed on new growth, just as the leaves are unfolding. Therefore, the tests are usually conducted in the spring or fall, during the growing season. All 12 tests generally cannot be conducted on the same day because of the plants' different growth stages. Based on over 30 years of experience with this test, we believe that 12 is the reliable test sample size on which USDA can make its determination. We do not know of any plant that was subsequently discovered to be rust-susceptible after undergoing the test procedure 12 times and being determined by USDA to be rust-resistant.

##### Dates

We are publishing this rule without a prior proposal because we view this action as noncontroversial and anticipate no adverse public comment. This rule will be effective, as published in this document, on August 13, 2007, unless we receive written adverse comments or written notice of intent to submit adverse comments on or before July 12, 2007.

Adverse comments are comments that suggest the rule should not be adopted

or that suggest the rule should be changed.

If we receive written adverse comments or written notice of intent to submit adverse comments, we will publish a document in the **Federal Register** withdrawing this rule before the effective date. We will then publish a proposed rule for public comment.

As discussed above, if we receive no written adverse comments or written notice of intent to submit adverse comments within 30 days of publication of this direct final rule, this direct final rule will become effective 60 days following its publication. We will publish a document in the **Federal Register**, before the effective date of this direct final rule, confirming that it is effective on the date indicated in this document.

##### Executive Order 12866 and Regulatory Flexibility Act

This rule has been reviewed under Executive Order 12866. For this action, the Office of Management and Budget has waived its review under Executive Order 12866.

We are amending the black stem rust quarantine and regulations by adding *B. thunbergii atropurpurea* 'Moretti Select', *B. thunbergii* 'Fireball', *B. thunbergii* 'Orange Rocket', and *B. thunbergii* 'Sparkler' to the list of rust-resistant species or cultivars in the regulations. This action will provide for the interstate movement of these newly developed rust-resistant *Berberis* varieties without unnecessary restrictions.

Following the Small Business Administration (SBA) guidelines, the potentially affected entities are classified within the following industries: Nursery and Tree Production (North American Industry Classification System [NAICS] 111421), and Floriculture Production (NAICS 111422). For these two categories, entities are considered small by SBA standards if their annual sales are \$750,000 or less. According to the 2002 Census of Agriculture, there were 64,366 farms in both NAICS categories and this total represents 3 percent of the total farms in the United States. Over 92 percent of the farms have annual sales of less than \$500,000 and by SBA standards are considered small.

Barberry plants are not one of the crops tracked by the Census and therefore data on production and number of producers are not available. However, because we are removing restrictions on the movement of additional rust-resistant varieties of barberry, it is not anticipated that any of the nurseries producing barberry plant

species and cultivars will experience a negative economic impact as a result of this rulemaking. Consumers will benefit from having a greater selection of barberry plants, and nurseries will benefit from being able to market their product more quickly.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

#### Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

#### Executive Order 12988

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule: (1) Preempts all State and local laws and regulations that are inconsistent with this rule; (2) has no retroactive effect; and (3) does not require administrative proceedings before parties may file suit in court challenging this rule.

#### Paperwork Reduction Act

This rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

#### List of Subjects in 7 CFR Part 301

Agricultural commodities, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Transportation.

■ Accordingly, 7 CFR part 301 is amended as follows:

#### PART 301—DOMESTIC QUARANTINE NOTICES

■ 1. The authority citation for part 301 continues to read as follows:

**Authority:** 7 U.S.C. 7701–7772 and 7781–7786; 7 CFR 2.22, 2.80, and 371.3.

Section 301.75–15 issued under Sec. 204, Title II, Public Law 106–113, 113 Stat. 1501A–293; sections 301.75–15 and 301.75–16 issued under Sec. 203, Title II, Public Law 106–224, 114 Stat. 400 (7 U.S.C. 1421 note).

■ 2. In § 301.38–2, paragraph (b) is amended by adding, in alphabetical order, the following rust-resistant *Berberis* species:

#### § 310.38–2 Regulated articles.

(a) \* \* \*

(1) \* \* \*

\* \* \* \* \*

*B. thunbergii atropurpurea* ‘Moretti Select’

\* \* \* \* \*

*B. thunbergii* ‘Fireball’

\* \* \* \* \*

*B. thunbergii* ‘Orange Rocket’

\* \* \* \* \*

*B. thunbergii* ‘Sparkler’

\* \* \* \* \*

Done in Washington, DC, this 6th day of June 2007.

**Kevin Shea,**

*Acting Administrator, Animal and Plant Health Inspection Service.*

**BILLING CODE 3410–34–P**

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 95

[Docket No. 30555; Amdt. No. 468]

#### IFR Altitudes; Miscellaneous Amendments

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule

**SUMMARY:** This amendment adopts miscellaneous amendments to the required IFR (instrument flight rules) altitudes and changeover points for certain Federal airways, jet routes, or direct routes for which a minimum or maximum en route authorized IFR altitude is prescribed. This regulatory action is needed because of changes occurring in the National Airspace System. These changes are designed to provide for the safe and efficient use of the navigable airspace under instrument conditions in the affected areas.

**DATES:** *Effective Date:* 0901 UTC, July 5, 2007.

**FOR FURTHER INFORMATION CONTACT:** Donald P. Pate, Flight Procedure Standards Branch (AMCAFS–420), Flight Technologies and Programs Division, Flight Standards Service, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd. Oklahoma City, OK. 73169 (Mail Address: P.O. Box 25082 Oklahoma City, OK. 73125) telephone: (405) 954–4164.

**SUPPLEMENTARY INFORMATION:** This amendment to part 95 of the Federal Aviation Regulations (14 CFR part 95) amends, suspends, or revokes IFR altitudes governing the operation of all aircraft in flight over a specified route

or any portion of that route, as well as the changeover points (COPs) for Federal airways, jet routes, or direct routes as prescribed in part 95.

#### The Rule

The specified IFR altitudes, when used in conjunction with the prescribed changeover points for those routes, ensure navigation aid coverage that is adequate for safe flight operations and free of frequency interference. The reasons and circumstances that create the need for this amendment involve matters of flight safety and operational efficiency in the National Airspace System, are related to published aeronautical charts that are essential to the user, and provide for the safe and efficient use of the navigable airspace. In addition, those various reasons or circumstances require making this amendment effective before the next scheduled charting and publication date of the flight information to assure its timely availability to the user. The effective date of this amendment reflects those considerations. In view of the close and immediate relationship between these regulatory changes and safety in air commerce, I find that notice and public procedure before adopting this amendment are impracticable and contrary to the public interest and that good cause exists for making the amendment effective in less than 30 days.

#### Conclusion

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

#### List of Subjects in 14 CFR Part 95

Airspace, Navigation (air).

Issued in Washington, DC, on June 5, 2007.

**James J. Ballough,**

*Director, Flight Standards Service.*

#### Adoption of the Amendment

■ Accordingly, pursuant to the authority delegated to me by the Administrator,
