

Quarantine Rules for the Importation of Dogs or Cats into Taiwan

Bureau of Animal and Plant Health Inspection and Quarantine (February 18, 2005)

(In case of any discrepancy between the Chinese text and the English translation thereof, the Chinese text shall govern.)

In order to reinforce the quarantine measures for the importation of dogs and cats into Taiwan, this Bureau has promulgated the amendment of Rules for the Importation of Dogs or Cats into Taiwan on February 18, 2005. The new regulations become effective on June 6, 2005. Dogs or cats shipped into Taiwan on and after June 6, 2005 shall be in compliance with the new regulation. For owners intending to ship their dogs or cats into Taiwan recently, please make sure the epidemiological situation of the exporting country and the shipping time, and then proceed the application according to this quarantine instruction.

1. Rabies-free country and Rabies-infected countries: According to the latest promulgation of Council of Agriculture, Australia, New Zealand, United Kingdom, Sweden, Iceland, and Japan are recognized as Rabies-free countries. For countries not recognized as Rabies-free countries are recognized as Rabies-infected countries.
2. Date of shipment and the related regulations:
 - (1) **Dogs or cats to be shipped before June 5, 2005 (including June 5, 2005) from rabies-infected countries : Please refer to Attachment 1.**
 - (2) **Dogs or cats to be shipped before June 5, 2005 (including June 5, 2005) from rabies-free countries : Please refer to Attachment 2.**
 - (3) **Dogs or cats to be shipped after June 6, 2005 from rabies-infected countries : Please refer to Attachment 3.**
 - (4) **Dogs or cats to be shipped after June 6, 2005 from rabies-free countries : Please refer to Attachment 4.**
3. Other regulations:
 - (1) Due to the change of epidemiological situation of exporting countries, please be advised to access the latest information on list of disease-free countries through the web site of this Bureau (www.baphiq.gov.tw) .
 - (2) The pregnant dog or cat to be imported will be allowed entry only when the pregnancy is under 4 weeks at the time of shipment.
 - (3) Dogs or cats from Singapore, Malaysia, Bangladesh, and China (not include Hong Kong and Macao) are not allowed to be imported into Taiwan.
 - (4) Dogs or cats shall not be transshipped through Australia, Singapore, Malaysia, Bangladesh or China (not include Hong Kong and Macao).

- (5) Dogs or cats imported from Australia shall be in compliance with the regulation of importing from rabies-free country. They should be further subject to serum neutralization test against Hendra virus with negative result. Since cases of horse infected with Hendra virus have been reported in Australia in December 2004, the importation of dogs or cats from Australia is temporarily suspended. The importation will become eligible three months after the occurrence of last case of Hendra virus infection. This Bureau will promulgate the date of lifting the ban.
- (6) Dogs or cats imported from Thailand shall be in compliance with the regulation of importing from rabies-infected country and the following quarantine requirements:
- (A) The dogs and cats shall be detained for pre-export quarantine in an approved isolated quarantine premises under the supervision of the animal quarantine authorities of Thailand government for at least 21 days prior to shipment. During the pre-export quarantine, the dogs and cats shall be inspected and found free from clinical evidence of any communicable disease and be subject to the following avian influenza tests with the designated time and method:
- (i) Nasal swab samples from dogs and cats shall be taken on 14 days prior to export, and be tested by reverse-transcription polymerase chain reaction (RT-PCR) test for H5 subtype virus with negative results.
- (ii) Sera samples from dogs and cats shall be taken on 7 days prior to export, and be tested by Haemagglutination inhibition (HI) test for antibody against H5 subtype virus with negative results.
- (B) The original veterinary certificate in English issued by the animal quarantine authorities of Thailand government should attest additionally the beginning and end dates of pre-export quarantine, dates of samples collection for avian influenza diagnostic tests, test methods, subtype avian influenza virus being tested, dates of tests and test results

Attachment 1

Dogs or cats to be shipped before June 5, 2005 (including June 5, 2005) from rabies-infected countries

1. The dog or cat to be imported shall have been vaccinated with inactivated vaccines against rabies when at the age of at least 90 days old; and the period between the day of vaccination and the day of shipment shall be no less than 30 days and no more than one year.
2. The importer shall apply for an import permit and make reservation of the post-entry quarantine space from Hsinchu Branch or Kaohsiung Airport Inspection Station of Kaohsiung Branch (contact information, attachment B), at least 14 days prior to shipment by submitting the following documents:
 - (1) Application (Application form, attachment A-1)
 - (2) Rabies vaccination certificate issued by a veterinarian of exporting country. The rabies vaccination certificate should be in Chinese, English or bilingual and state the breed, sex, age, color (or chip number) and any identifiable characteristics, and date of rabies vaccination of the dogs or cats.
 - (3) A copy of passport or identification card of the importer.
3. The importer shall apply to the animal quarantine authority of exporting country for an veterinary certificate, the veterinary certificate shall be in Chinese, English or bilingual language and include the following information:
 - (1) Breed, sex, age, and color (or chip number) of the dog or cat.
 - (2) Date of the vaccination against rabies.
4. On arrival of the dog or cat at the port of entry, the importer shall apply to the animal quarantine authority for quarantine inspection and submit the import permit, original veterinary certificate issued by the animal quarantine authority of exporting country, bill of lading or custom declaration form. **The dog or cat without an original veterinary certificate issued by the animal quarantine authority of exporting country shall be re-exported or destroyed.**
5. When conducting quarantine inspection of the dog or cat imported from rabies-infected countries, animal quarantine authority at the port of entry shall check the veterinary certificate and detain the dog or cat at the designated post-entry quarantine premise for 21 days. The period of detention in quarantine may be extended when the quarantine officer deems necessary.
6. Please be advised that if any incompliance is found in the statement of the certificate, the dogs or cats will be re-exported, destroyed or detained for extended period.

Attachment 2

Dogs or cats to be shipped before June 5, 2005 (including June 5, 2005) from rabies-free countries

1. The dog or cat to be imported shall have been vaccinated with inactivated vaccines against rabies when at the age of at least 90 days old; and the period between the day of vaccination and the day of shipment shall be no less than 30 days and no more than one year. The dog shall have been microchipped.
2. The importer shall apply for an import permit from Hsinchu Branch or Kaohsiung Airport Inspection Station of Kaohsiung Branch (contact information, attachment B), at least 14 days prior to shipment by submitting the following documents:
 - (1) Application (Application form, attachment A-1)
 - (2) Rabies vaccination certificate issued by a veterinarian of exporting country. The rabies vaccination certificate should be in Chinese, English or bilingual and state the breed, sex, age, color (or chip number) and any identifiable characteristics, and date of rabies vaccination of the dogs or cats.
 - (3) A copy of passport or identification card of the importer.
3. The importer shall apply to the animal quarantine authority of exporting country for an veterinary certificate, the veterinary certificate shall be in Chinese, English or bilingual language and include the following information:
 - (1) Breed, sex, age, and color of the dog or cat.
 - (2) Date of the vaccination against rabies.
 - (3) Microchip number of the dog.
 - (4) No case of rabies reported in the exporting country for the past 6 months.
 - (5) The dog or cat has been raised in the exporting country continuously for at least 6 months prior to shipment or since birth.
4. On arrival of the dog or cat at the port of entry, the importer shall apply to the animal quarantine authority for quarantine inspection and submit the import permit, original veterinary certificate issued by the animal quarantine authority of exporting country, bill of lading or custom declaration form. **The dog or cat without an original veterinary certificate issued by the animal quarantine authority of exporting country shall be re-exported or destroyed.**
5. When conducting quarantine inspection of the dog or cat imported from rabies-free countries, animal quarantine authority at the port of entry shall check the veterinary certificate. If the veterinary certificate is found in compliance with regulations and the dog or cat is confirmed free from clinical evidence of any communicable animal disease, the animal quarantine authority will issue import veterinary certificate and release the dog or cat.
6. If the dog or cat is transshipped through rabies-infected countries, it shall be re-exported,

destroyed or detained at the designated post-entry quarantine premise for 21 days.

7. For the dog or cat that has been exported from Taiwan to rabies-free countries for less than 6 months to be re-imported, the importer shall apply for an import permit and submit an application with the following documents to Hsinchu Branch or Kaohsiung Airport Inspection Station of Kaohsiung Branch (contact information, attachment B):

- (1) A copy of export veterinary certificate issued by animal quarantine authority indicating export from Taiwan.
- (2) A copy of import veterinary certificate issued by animal quarantine authority at the port of entry.
- (3) A copy of passport or identification card of the importer.
- (4) The I.D. for registered pet of the dog (in the case of re-importing dog).

The importer shall apply for quarantine inspection on arrival of the dog or cat. The veterinary certificate accompanied with the re-imported dog or cat shall be in Chinese, English or bilingual language and include the following information:

- (1) Breed, sex, age, and color of the dog or cat, and date of the vaccination against rabies.
- (2) Microchip number of the dog.
- (3) The dog (cat) has not been to the third country since it arrived in this country.

If the re-imported dog or cat without an import permit or the information of the veterinary certificate is not in compliance with the regulation, the dog/cat shall be regarded as importing from rabies-infected country and be detained at designated quarantine premise.

Attachment 3

Dogs or cats to be shipped after June 6, 2005 from rabies-infected countries

1. The dog or cat to be imported shall have been implanted microchip and be vaccinated against rabies, in the case of a primary vaccination, at the age of at least 90 days old, and the period between the day of vaccination and the day of shipment shall be no less than 180 days and no more than one year. In the case of a booster vaccination, the animal shall have been vaccinated no more than one year prior to shipment.
2. At least 180 days prior to shipment, blood sample of dogs or cats to be imported shall be taken and sent to the designated laboratory (list of designated laboratories by this Bureau is as attachment C) for neutralization antibody titration test for rabies antibody which shall be at least 0.5IU/ml.
3. The importer shall apply for an import permit and make reservation of the post-entry quarantine space from Hsinchu Branch or Kaohsiung Airport Inspection Station of Kaohsiung Branch (contact information, attachment B), at least 30 days prior to shipment by submitting the following documents:
 - (1) Application (Application form, attachment A-2)
 - (2) Rabies vaccination certificate issued by a veterinarian of exporting country and certifying vaccination by inactivated vaccines. The rabies vaccination certificate shall be in Chinese, English or bilingual and state the breed, sex, age, microchip number, date of rabies vaccination, and whether the vaccination was primary or a booster.
 - (3) Report of neutralization antibody titration test for rabies antibody which shall be at least 0.5IU/ml and tested by rabies reference laboratories of the World Organization for Animal Health or laboratories designated by the Bureau of Animal and Plant Health Inspection and Quarantine with the blood sampling date no less than 180 days and no more than 2 years prior to shipment.
 - (4) A copy of passport or identification card of the importer.
4. The importer shall apply to the animal quarantine authority of exporting country for a veterinary certificate, the veterinary certificate shall be in Chinese, English or bilingual and include the following information:
 - (1) Breed, sex, age, and microchip number of the dog or cat.
 - (2) Date of vaccination against rabies with inactivated vaccine, and whether the vaccination was primary or a booster.
 - (3) No clinical sign of rabies shown upon inspection of the dog or cat.
 - (4) At least 0.5 IU/ml rabies antibody in the blood of the dog or cat sampled no less than 180 days and no more than 2 years prior to shipment for a neutralization antibody titration test which shall be carried out by rabies reference laboratories of

the World Organization for Animal Health or laboratories designated by the Bureau of Animal and Plant Health Inspection and Quarantine.

5. On arrival of the dog or cat at the port of entry, the importer shall apply to the animal quarantine authority for quarantine inspection and submit the import permit, original veterinary certificate issued by the animal quarantine authority of exporting country, bill of lading or customs declaration form (or B/L). **The dog or cat without an original veterinary certificate issued by the animal quarantine authority of exporting country shall be re-exported or destroyed.**
6. When conducting quarantine inspection of the dog or cat imported from rabies-infected countries, animal quarantine authority at the port of entry shall check the veterinary certificate and detain the dog or cat at the designated post-entry quarantine premise for 21 days. During quarantine detention, the blood of the dog or cat may be sampled and tested again for rabies antibody. If the rabies antibody is under 0.5 IU/ml, the dog or cat shall be revaccinated with inactivated rabies vaccine.
7. Please be advised that if any incompliance is found in the statement of the certificate, the dogs or cats will be re-exported, destroyed or detained at the designated post-entry quarantine premise for 180 days.

Attachment 4

Dogs or cats to be shipped after June 6, 2005 from rabies-free countries

1. The dog or cat to be imported shall have been implanted microchip and vaccinated against rabies when at the age of at least 90 days old; and the period between the day of vaccination and the day of shipment shall be no less than 30 days and no more than one year.
2. The importer shall apply for an import permit from Hsinchu Branch or Kaohsiung Airport Inspection Station of Kaohsiung Branch (contact information, attachment B), at least 30 days prior to shipment by submitting the following documents:
 - (1) Application (Application form, attachment A-2)
 - (2) Rabies vaccination certificate issued by a veterinarian of exporting country and certifying vaccination by inactivated vaccines. The rabies vaccination certificate shall be in Chinese, English or bilingual and state the breed, sex, age, microchip number, date of rabies vaccination, and whether the vaccination was primary or a booster.
 - (3) A copy of passport or identification card of the importer.
3. The importer shall apply to the animal quarantine authority of exporting country for an veterinary certificate, the veterinary certificate shall be in Chinese, English or bilingual and include the following information:
 - (1) Breed, sex, age, and microchip number of the dog or cat.
 - (2) Date of vaccination against rabies with inactivated vaccine.
 - (3) No clinical sign of rabies shown upon inspection of the dog or cat.
 - (4) No case of rabies reported in the exporting country for the past 2 years.
 - (5) The dog or cat has been raised in the exporting country continuously for at least 6 months prior to shipment or since birth.
4. On arrival of the dog or cat at the port of entry, the importer shall apply to the animal quarantine authority for quarantine inspection and submit the import permit, original veterinary certificate issued by the animal quarantine authority of exporting country, bill of lading or customs declaration form (or B/L) . **The dog or cat without an original veterinary certificate issued by the animal quarantine authority of exporting country shall be re-exported or destroyed.**
5. When conducting quarantine inspection of the dog or cat imported from rabies-free countries, animal quarantine authority at the port of entry shall check the veterinary certificate. If it is found in compliance with regulations and the dog or cat is confirmed free from clinical evidence of any communicable animal disease, the animal quarantine authority will issue import veterinary certificate and release the dog or cat.
6. Please be advised that if any incompliance is found in the statement of the certificate, the dogs or cats will be re-exported, destroyed or detained at the designated post-entry quarantine premise for at least 21 days.

7. For the dog or cat that has been exported from Taiwan to rabies-free countries for less than 6 months to be re-imported, the importer shall apply for an import permit and submit an application with the following documents to Hsinchu Branch or Kaohsiung Airport Inspection Station of Kaohsiung Branch (contact information, attachment B):

- (1) A copy of export veterinary certificate issued from the Branch of Bureau of Animal and Plant Health Inspection and Quarantine.
- (2) A copy of passport or identification card of the importer.
- (3) The I.D. for registered pet of the dog (in the case of re-importing dog).

The importer shall apply for quarantine inspection on arrival of the dog or cat. The veterinary certificate accompanied with the re-imported dog or cat shall be in Chinese, English or bilingual and include statement the following information:

- (1) Breed, sex, age, and color of the dog or cat, and date of the vaccination against rabies.
- (2) Microchip number of the dog.
- (3) The dog (cat) has not been to the third country since it arrived in this country.

If the re-imported dog or cat without an import permit or the information of the veterinary certificate is not in compliance with the regulation, the dog or cat shall be re-exported, destroyed or detained at the designated post-entry quarantine premise for 21 days.
