

FACT SHEET FOR RESIDENTS REQUESTING ANIMAL ENTRY TO KWAJALEIN ISLAND (USAKA)

1. Limited Veterinary Services are available on a day-to-day basis. Routine services provided include:
 - rabies inoculations
 - limited care of sick or injured animals
 - special medications if available
2. A doctor of veterinary medicine visits USAKA approximately two (2) to four (4) times a year on an announced basis for routine animal care.
3. ALL imported pets will enter USAKA via Hawaii and will complete MANDATORY HAWAIIAN QUARANTINE REQUIREMENTS as necessary.
4. ALL requests for Pet Entry must be accompanied by a letter indicating:
 - type of animal, age, sex, and size
 - address where animal will reside
 - dates of Hawaii Quarantine - if possible
5. A Health Certificate documenting that the animal has been inoculated against rabies and is generally healthy and free from any signs of diseases; and documentation that the animal has been spayed/neutered prior to entry **MUST** be presented for examination by the Medical Officer or Veterinary Services Department.
6. Animals **MUST** be dipped or otherwise treated to free the animal of external parasites (i.e. fleas, etc.) within five (5) days prior to entry. This is to include spraying/treatment of the animal cage. This is especially important if the animal is purchased in Hawaii since Hawaii has a bad flea problem.
7. ALL animals **MUST** be registered with the Veterinary Services Department with registration renewed annually.
8. ALL owners will ensure that proper medical records are maintained and all required shots/inoculations are kept up-to-date at the owner's expense.
