Subject: this plan has no merit whatsoever

one has to wonder how the citizens of this country have become so snookered by washington.

public comment on federal register of 7/27/06 vol 71 #144 pg 42567 7 cfr part 1491 rin 0578 aa37 farm and ranch lands alleged "protection" package i dont like the way usda allegedly "protects" anything at all i think the only "protection" that emanates from this agency, which is focused entirely on money and greed nis protection for agribusiness and the heck with everybody else in this country. i believe this whole project is a waste of tax dollars since our agencies are so corrupt and money hungry, catering only to profiteers and forgetting about any obligation to citizens this plan is stupid and a waste of tax dollars the nracs does no favor to american citizen/staxpayers ever. they allow wholesale killing of wildlife and birds, which are in decline because of global warming in the first place. this easement program should be tossed nracs is a joke to the ocuntry and not doing any bood b sachau 15 eelm st florham park nj 07932
