

\*\*\*Explanatory Notes\*\*\*

The certificates that follow are to be used for the export of breeding poultry other than ratites to the EU; hatching eggs from poultry other than ratites to the EU; day-old chicks other than from ratites to the EU; and for slaughter poultry and poultry for restocking game supplies, other than ratites, to the EU.

Please advise exporters to check with their importers about obtaining a copy of the applicable health certificate in the official language of the country of destination.

Concerning various directives and decisions noted in the health certificates:

- Directive 90/539/EEC is the general set of import requirements for poultry/day-old chicks/hatching eggs to the EU. U.S. commercial poultry establishments meet these conditions.
- Decision 93/342/EEC defines ways of classifying countries/regions free of Avian Influenza (AI) and Newcastle Disease (ND). The U.S. is officially free of highly pathogenic AI (fowl plague) and US Region 1 is officially free of velogenic viscerotropic ND (VVND) (the strain of ND the EU is primarily concerned about).

Concerning the Section on the health certificates entitled "Supplementary Health Information(9)", please note that this section may be deleted since the US Region 1 is officially free of VVND.
