# Questions

---

- **What surprises did you find when you brought your rebuilding plans to the table to share with others?**
  - Had you all been planning independently?
  - How similar or different were the plans?
  - Can you give examples of successful reconciliation of differences?
- **Do you fully understand the interoperability issues of proposed new systems (P25, data, apps)?**
  - “Its P25. So it must be interoperable”
  - Would you just trust/insist the vendors to make it work?
  - Would you know up front all the things that will not inter-work?

## Questions II

---

- **Based on your experience, do you see the need for more broadband wireless data & VOIP links?**
  - Do you need help understanding these systems?
- **Do you have enough spectrum to serve your needs?**
  - If not, why not?
- **How has ICS/NIMS implementation been achieved within your public safety community?**
- **Does Interoperability compromise Operability?**
  - Yes:
  - No:

## Questions III

---

- **How would you recover if there is massive damage?**
  - All towers knocked down, massive casualties
- **What are the most difficult obstacles you have faced in planning your interoperability project?**
- **What are some strategies to get your executive's attention regarding regional interoperability?**
