Department of Economic Security Security Awareness Intranet website

Description of Entry:

- To improve cybersecurity, you must create a culture where employees have the necessary knowledge (what to do), skill (how to do), and attitude (want to do).
- Therefore, to successfully modify or change behavior, security awareness must be part of an intentional, systematic organizational change effort that adjusts "attitudes" and reshapes values and norms.
- The DES Security Awareness website is just part of a systemic effort in creating that awareness.
