

The Details

The BCRLF program works to encourage the reuse and renovation of commercial real estate by providing a source of low-cost funds to be used specifically for environmental cleanup activities. Redevelopment projects that offer the greatest community and economic benefits will be given priority. To determine whether and under what terms the conditions a loan will be made, the borrower must submit a loan application package. All loan applications will be subject to review and approval by the Loan Review Committee of the City of Albuquerque and Bernalillo County. All finances will be managed by New Mexico Community Development Loan Fund. To obtain a loan application package or for more information contact the County at the numbers listed at right or Meg Randall at the City of Albuquerque.
