		Injuries	Crop Dmg	

The area of damage began around the Rosemont Estates area of Montgomery and extended about seven miles southeastward along US Highway 231. The most concentrated area of damage was near the Montgomery Mall, at the intersection of US-80 and US-231. In this area, wind speeds were estimated at near 100 mph. Damage included an automotive shop section within a small strip mall that was destroyed due to a collapsed wall, partially removed roofs from several units at an apartment complex, downed power poles, minor damage to an elementary school building, and several extensively damaged billboards. Elsewhere along the path, winds were estimated to be between 60 and 80 mph, and caused numerous trees to be snapped or uprooted, including at least 4 that fell onto homes. The area of damage was approximately 3 miles wide at its widest point. No injuries were reported.

A strong storm system and associated cold front swept through Central Alabama, causing numerous severe thunderstorms and isolated tornadoes.

WINSTON COUNTY 2.2 SSE DELMAR [34.14, -87.58]

MARION COUNTY 2.9 SW SHOTTSVILLE [34.24, -88.16], 3.5 WNW THORN	HILL [34.20, -87.72]	
05/10/08 22:18 CST	0.10M	Tornado (EF1, L: 25.46 mi , W: 400 yd)

05/10/08 22:53 CST 0 Source: NWS Storm Survey

The tornado spun up very quickly about 2.5 miles southwest of the Shottsville Community along County Road 13, between Reedy Branch Road and CR-154. The tornado then tracked just south of due east for almost the entire length of Marion County, with a slight left turn noted near the middle of the path. The tornado crossed CR-11, SR-19, SR-187, US-43, and SR-253, before lifting along CR-34. The tornado remained mostly in a heavily forested area, and thousands of trees were either snapped off or uprooted. Several mobile homes and one carport sustained varying degrees of damage along the path.

An area of straight line winds caused a swath of damage about a half mile long and a quarter of a mile wide, near Double Springs. The damage was centered at the Double Springs Elementary School, where numerous trees were blown down and the roof of the school sustained minor damage. Several nearby homes also sustained roof damage both directly from the wind and from fallen trees. Additional sporadic wind damage occurred elsewhere in Winston County.

WALKER COUNTY --- 2.1 NE MARIGOLD [33.94, -87.25], 5.7 N SIPSEY [33.90, -87.09]

05/10/08 23:27 CST 20K Tornado (EF1, L: 9.29 mi , W: 400 yd)

05/10/08 23:39 CST 0 Source: NWS Storm Survey

The tornado touched down near the intersection of Birdfarm Road and Snow Lake Road, and then moved southeast, crossing SR-257 and SR-69, before lifting near the Cullman County line. The tornado affected areas near the Sunlight Community, the Burrows Crossroads Community, and the Powellville Community. Numerous trees were either snapped off or uprooted along the path. Several structures suffered varying degrees of damage.

05/01/08 00:00 CST 0 Drought

05/31/08 23:59 CST 0

Several storm systems across Central Alabama brought limited improvement to the ongoing drought that had begun in the Spring of 2007, but also helped keep the drought from getting worse. By the end of the month, less than one quarter of Central Alabama remained in Extreme Drought (D3), although a large portion of the region remained in a Severe Drought (D2) designation.

05/10/08 22:05 CST 0 Source: NWS Storm Survey

A tornado with peak winds of around 100 mph touched down near a cove along the Tennessee River and moved east northeast, nearly paralleling county road 14 between the Wright and Rhodesville communities. Extensive tree damage was observed with multiple large trees uprooted and many medium size tree trunks snapped. The heaviest damage occurred to a farm along county road 14, where an all metal barn was completely destroyed, an awning adjacent to another outbuilding was ripped off, and concrete posts were ripped from the ground. The metal roofing was catapulted approximately 1/2 of a mile

Thunderstorm winds knocked several trees down onto Interstate 65 at mile marker 295.

A complex of severe thunderstorms produced wind damage and isolated tornadoes in a moist unstable environment near the junction of a warm front and approaching cold front. The tornadic circulations were embedded within the linear segments of the line of thunderstorms that moved through the area.

LAUDERDALE COUNTY --- 1.6 ENE CENTRAL HGTS [34.90, -87.75], 2.1 S RHODESVILLE [34.84, -87.87]

05/08/08 11:04 CST 2 0 Source: NWS Storm Survey

A tornado with peak winds of 90 mph began a path near the intersection of County Roads 14 and 16, about 2 miles northwest of Oakland and tracked into the Central Heights community. The tornado produced moderate damage to five homes and uprooted several trees in its path. One of the homes was destroyed along Waterloo Road near Feddler's One Stop Market in Oakland where two men were slightly injured by flying glass. A mobile home was also overturned. The tornado widened to 200 yards before narrowing to around 20 yards toward the end of its path.

COLBERT COUNTY --- 2.2 WNW MIDWAY [34.74, -87.47], 0.0 SW FOSTERS MILL [34.77, -87.42]

05/08/08 11:39 CST 0.30M Tornado (EF2, L: 12.73 mi , W: 250 yd)

A surveillance camera from an equipment company northeast of Leighton captured a tornado on video picking up at least 2 cars and throwing them nearly 40 feet. A home was destroyed and another heavily damaged along River Road and Second Street. Large trees were snapped and uprooted near Fosters Mill at the intersection County Road 40. An 18 wheeler was reported to be overturned in this area as well.

LAWRENCE COUNTY --- 3.4 WNW RED BANK [34.78, -87.43], 0.4 NE WHEELER DAM VILLAGE [34.80, -87.37]

05/08/08 11:45 CST 0.25M Tornado (EF2, L: 3.80 mi , W: 250 yd)

05/08/08 11:50 CST 0 Source: NWS Storm Survey

A tornado continued its track from Fosters Mill in Colbert County into the far northern tip of Lawrence County. The tornado struck the Doublehead Resort and Lodge producing significant structural damage. A 2-story house was completely lifted off its foundation and moved nearly 20 feet. The entire west-facing side of this house was ripped off along with significant roof damage.

LAUDERDALE COUNTY --- 2.0 SSW THORTONTOWN [34.80, -87.37], 1.5 NNW ROGERSVILLE [34.85, -87.29]

05/08/08 11:51 CST 5K Tornado (EF1, L: 5.33 mi, W: 250 yd)

A tornado continued its track from the far northern tip of Lawrence County into Joe Wheeler State Park to 2 miles north of Rogersville. The tornado produced sporadic damage to a garage and large trees in this path.

CULLMAN COUNTY --- 5.2 SW WHEAT [33.97, -87.14], 4.6 SW WHEAT [33.98, -87.13]

05/08/08 13:06 CST 20K Tornado (EF1, L: 0.70 mi , W: 100 yd)

05/08/08 13:07 CST 0 Source: NWS Storm Survey

A tornado with winds up to 100 mph continued a track out of Walker County on Smith Lake. Several trees were snapped and uprooted. A roof was partially torn off of a chicken house. The tornado lifted after nearly a 3/4 mile path, but then re-developed just a few miles further northeast near Sulpher Springs.

MORGAN COUNTY --- 0.2 SW OAK RIDGE [34.48, -87.00], 0.7 NE OAK RIDGE [34.49, -86.99]

05/08/08 13:15 CST 10K Tornado (EF0, L: 0.86 mi , W: 50 yd)

05/08/08 13:17 CST 0 Source: NWS Storm Survey

A tornado with peak winds speeds of 95 mph touched down near Goose Pond Road northwest of Hartselle, tracking northeast near Norris Mill Road to around Macabee Drive. The tornado uprooted multiple medium to large trees, including one of 4-foot diameter. Several smaller trees and branches were snapped.

A tornado touched down again just east of Sulpher Springs tracking into the Trimble community before lifting. The tornado uprooted or snapped several large trees. Some trees damaged apartments and campers in this area. Another tornado touched down a few more miles northeast on the east side of Cullman.

LIMESTONE COUNTY --- 0.6 S NEW HOPE [34.57, -86.82], 1.2 SSE SWANCOTT [34.59, -86.79]

05/08/08 13:35 CST 10K Tornado (EF0, L: 2.03 mi , W: 100 yd)

05/08/08 13:36 CST 0 Source: NWS Storm Survey

A tornado produced sporadic EF-0 damage with winds up to 65 mph along New Hope Road in extreme southeastern Limestone County just north of the Tennessee River, where convergent wind patterns were noted in a grass and wheat field. A larger area of grass and wheat was flattened along County Line Road south of Swancott Road. Minor tree and roof damage occurred at a residence in this area.

MADISON COUNTY --- 2.3 W TRIANA [34.59, -86.79], 0.7 NNW TRIANA [34.59, -86.75]

05/08/08 13:37 CST 10K Tornado (EF1, L: 1.98 mi , W: 250 yd)

A tornado continued its track into Madison County to a point about 3 miles west northwest of Triana. The tornado intensified to an EF-1 with wind speeds up to 100 mph, uprooting large pine trees and snapping small to medium sized pine trees on the northeast side of Blackwell Swamp.

CULLMAN COUNTY --- 0.2 NNW ST BERNARD [34.18, -86.80], 1.9 NNE SIMCOE [34.24, -86.71]

05/08/08 13:40 CST 50K Tornado (EF1, L: 6.58 mi , W: 100 yd)

05/08/08 13:48 CST 0 Source: NWS Storm Survey

A tornado with peak wind speeds around 100 mph tracked from the east side of Cullman through the Simcoe community. Several large old oak trees were uprooted or snapped on the east side of Cullman. The tornado heavily damaged a pair of chicken houses in rural Cullman County. One chicken house completely collapsed with the central portion of the structure twisted and gnarled, and its metal roofing torn and twisted in the fields downstream. Pockets of straight-line wind damage were noted south of the tornado tracks, including in the southern portions of the city of Cullman.

CULLMAN COUNTY --- 0.7 S STEPPVILLE [34.06, -86.75]

 05/08/08 13:40 CST

 Thunderstorm Wind (EG 61 kt)

 05/08/08 13:42 CST
 0
 Source: Trained Spotter

Thunderstorm winds knocked large trees of up to 3 feet in diameter and 60 feet tall. Shingles were also torn off houses by the severe winds.

A quasi-linear convective system (QLCS) produced no less than five tornadoes and damaging thunderstorm winds across northern Alabama during the late morning through mid afternoon hours.

(AL-Z001) LAUDERDALE, (AL-Z004) LAWRENCE, (AL-Z005) LIMESTONE, (AL-Z006) MADISON, (AL-Z007) MORGAN, (AL-Z008) MARSHALL,

(AL-Z009) JACKSON, (AL-Z010) DEKALB, (AL-Z016) CULLMAN

05/01/08 00:00 CST 0 Drought

05/31/08 23:59 CST 0

Rainfall totals for May ranged from 5 to 12 inches west of Interstate 65; and 2 to 4 inches east of Interstate 65. The northwest Alabama totals were more than 150% of normal in most areas (and above normal for the second consecutive month); while the totals east of I-65 were below normal, including Huntsville for the 19th consecutive month.

Aside from the heavy rain at the end of the month, there were scattered events throughout the course of the month, none of which really produced any particularly heavy rainfall, with the exception of the 2nd, when heavy rains over three inches fell in the extreme northwest corner of Alabama. Rainfall totals quickly lessened further east, however.

Drought conditions improved areawide, about 1 category on average. Northwest Alabama, by the end of the month, was no longer considered to be in drought. Conditions improved to only D2 /Severe Drought/ in the east, improving from D3 for the first time since last spring.

DEKALB COUNTY --- 0.6 E HIGH PT [34.58, -85.59]

05/18/08 16:50 CST 1K Thunderstorm Wind (EG 61 kt)

05/18/08 16:55 CST 0 Source: Public

Severe thunderstorm winds snapped two oak trees at the Lil Mole Golf course. Dime size hail also covered the ground.

Very heavy rainfall caused many streets in the Cherokee community to flood. Some roads, including a portion of North Pike Street was closed due to flash flooding. Some reports of between 6 inches and 1 foot of water over roadways were received. One report of water 2 feet deep at the intersection of Mulberry Lane and Georgetown Road was received. Other streets which were heavily affected by this flash flooding were: Pine Street, 6th Street, Mulberry Lane, Georgetown Road, and Virginia Street.

Severe thunderstorm winds knocked down a tree near Guntersville on highway 227.

On the morning of June 27th, strong to severe thunderstorms formed along multiple pre-frontal boundaries ahead of a slow moving cold front over northern Tennessee. As these rounds of thunderstorm activity moved southeast, several rounds of heavy rainfall occurred west of interstate 65. Several flash flooding ocurrences and heavy rainfall totals were a result across northwestern Alabama before the cold front pushed south of the area on the morning of the 28th. Scattered damaging winds also occured with these severe storms.

Heavy rains fell across the south parts of Mobile and Baldwin counties and caused temporary flooding of streets and secondary roads. Some of the roads had to be closed for more than an hour due to the heavy rains. The roads that were flooded were generally south of I-10. The heavy rains caused soil to be washed away at a construction site in Fairhope. Rainfall totals of three to four inches fell across the area.
