Note: These calculations include National Emergency Grant projects, which are not included in the states' official performance reported in the Annual Report.

Note: Data for a state are shown as blank if the state did not provide data in its WIASRD submission or if the data appeared to be unreliable. For most states, the data cover the full four quarters of exiters from October 2000 to September 2001. However, for a few states employment retention and earnings change are based on a smaller number of quarters.
