**Subject:** Proposed Credit Card Rules / Regulation AA - docket No. R-1314.

To all it may concern,

I am very much in support of the rules that are proposed to end the underhanded tactics played by credit card companies. There should be a class action law suit against many of them for such actions. Bank America and Nation's Bank was once sued for maneuvers that caused deposit postings to appear after charges of overdrafts and other fees and to allow credit card companies to use these thievery like tactics are down right preposterous and unfair to consumers. How much is enough for the greedy corporations that are trying to bleed Americans for every cent they make. Let's stop this now and turn around the value of the American Dollar.
