WWW.FERC.FED.US TO BE CONSOLIDATED WITH WWW.FERC.GOV

The Federal Energy Regulatory Commission announced a new Internet site (www.ferc.gov) on May 21, 2001. The new site includes a professional, simple design with a consistent look and feel that is easy to navigate. Information on the new site is organized in a more intuitive manner, and high-speed access is now available.

As of August 17, 2001, FERC's old website (www.ferc.fed.us) will be consolidated with www.ferc.gov and will no longer be available as a separate site. (E-mail addresses for agency staff will not change yet.) People who go to www.ferc.fed.us will automatically be directed to www.ferc.gov.
