

[Proposed class or classes of copyrighted work(s) to be exempted]= Audio, text, and video in any digital format.

[Brief summary of the argument(s) in support of the exemption proposed above]= I believe that any copyrighted audio, text, or video that I legally purchase should be unrestricted in all dimensions regarding my ability to listen, read, or watch whenever, wherever, with whomever, and however I would like. I strongly oppose any policy designed to limit my freedom in this regard. I support intellectual property owners by purchasing their goods. I should not be considered a thief by media companies or the bureaucrats drafting these policies.
