

Basic map information including bathymetry was compiled by the National Ocean Service (NOS). Bathymetry was obtained from 1955 multibeam survey data (see notes) which comply with International Hydrographic Organization (IHO) Special Publication #2 accuracy standards as they exist at the date of this revision. As this map is not operational through Station to Station updates, for hazard and navigation use information, this product is not intended for independent use. For navigation safety, users must use caution charts.

Other information (soundings, printed or magnetic) compiled by the National Ocean Service, Hydrographic Survey, from 1955 Great Lakes and Great Lakes and St. Lawrence River Data, is shown on this map for use as a reference only. The information on this map is not intended for use as a substitute for the NOS Official Navigation Diagram available from the National Ocean Service.

Vertical Datum: Mean Lower Low Water and Great Lakes (1:20,000) water level. (See notes on the inside cover.)

Scale: As shown.

Map: Revision 1 (2015)
