

Base map information including bathymetry was compiled by the U.S. Naval Oceanographic Office. Bathymetry was compiled from National Ocean Service hydrographic survey supplemented by hydrographic information from other sources (see notes). ICHS hydrographic survey data comply with International Hydrographic Organization (IHO) Publication 44 revision 1 standards as those used at the date of the survey. This information is not intended for navigational purposes.

Universal Transverse Mercator Grid Zone 15, 10000 meter scale (1:10000) are shown inside the map.

Offshore bathymetry survey data plotted in red, controlled by the Marine Management Service. 1:10000 meter scale bathymetry data, controlled by the Marine Management Service. The projections on this map are not for Federal Listing purposes, for such purposes refer to the OCS Official Information available from the Marine Management Service.
