

Base map information including bathymetry was compiled by the National Ocean Service (NOS). Bathymetry compiled from NOS hydrographic survey data supplemented by other hydrographic sources (see index). NOS hydrographic surveys are conducted in accordance with International Hydrographic Organization (IHO) Special Publication 58 accuracy standards or those used at the date of the survey. This information is not intended for navigational purposes.

Universal Transverse Mercator Grid, Zone 18, 1000 Meter Ticks (-) are shown inside the coastline.

Obdurate protection survey data, plotted in red, compiled by the Minerals Management Service.

Henry Hook offshore limits of (HML) Outer Continental Shelf (OCS) Protection Diagram. The publications on this map are not for Federal Leasing purposes; for such purposes refer to the OCS Official Protection Diagram available from the Minerals Management Service.

Use of sufficient data on portions of this map requires the use of generalized form lines to infer suitable shapes for circular or elliptical shaped features that would otherwise appear truncated. The form lines are set at the greatest 200-meter interval.

HYDROGRAPHIC SURVEY INFORMATION
