

Base map information including bathymetry, was compiled by the National Ocean Service (NOS). Bathymetry was compiled from 1950 hydrographic survey data supplemented by more recent data from other sources. NOS bathymetric survey data include only the portion of the survey that is shown on this map. Bathymetric data are available on the date of the survey. Refer to chart notes for specific data information.

This map has been printed on paper through cooperation with the Bureau of Imprints, National Oceanic and Atmospheric Administration, and the U.S. Geological Survey.

Other information series data, printed in red, compiled by the National Ocean Service. Many have suitable limits of 1000 fathoms. Current Chart Office Publication Program. The information on this map is not for use in navigation systems for which accuracy is required by the ICAO Official Performance Diagram available from the National Oceanic and Atmospheric Administration.
