

NOS 15530-10B

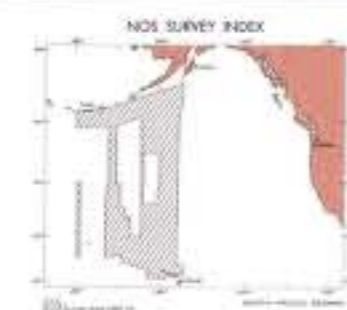

Reliability compiled from NOS SEAMAP series 1551 to 1553 supplemented by surveys from other sources.
 Bathymetric contour intervals: 100 meters.
 Source depth information corrected for velocity.

NOTE
 Lack of sufficient data on portions of this map requires the use of general and false lines to infer probable shape for coastal or elliptical shaped features that would otherwise appear truncated. The same can be said of the prescribed contour interval.

Locations of geophysical surveys (Discontinuity, rockline, or depth)

NOS SEAMAP SERIES
NORTH PACIFIC OCEAN
 Published at Washington, D.C.
