GRAVITY LEGEND  
 CONTOUR INTERVAL, 10 MEGAGALS  
 ——— Positive Values  
 ——— Zero Reference  
 ——— Negative Values

**GRAVITY**  
 The gravity data were obtained from LaSalle and  
 Bunker's gravity survey of 1934-1935 and from  
 1950-1951. Land elevations were obtained from  
 the 1950-1951 edition of the 1:50,000 "Standard"  
 Edition.  
 The "vertical error" of an observation is 0.34  
 mgals.  
 NOAA Technical Report 508 is a complete  
 description of the data reduction methods and  
 procedures, together with a listing of the data  
 values used for this compilation and some of  
 the original gravity observations, in the west. These  
 data are also available on magnetic tape from the  
 Governmental Data Service (GDS).
