

NOS 16530-10B

Bathymetry compiled from NOS SEAMAP survey (85) to 1970 supplemented by survey from other sources.
 Bathymetry contour intervals: 100 meters.
 Source depth observations rounded to nearest 100 meters.

NOTE
 Lack of sufficient data on portions of this map requires the use of general-lead lines to infer probable depth for contour or stippled depth features that would otherwise appear hatched. The hatch lines are not at the prescribed contour interval.

Portions of map are bathymetry only.
 Bathymetry features not shown.
