BATHYMETRIC MAP

CALIFORNIA COAST  
SHEPARD MEANDER

Base map information regarding bathymetry was furnished by the National Ocean Service (NOS). Bathymetry was compiled from ADCIRC multibeam and conventional hydrographic surveys from 1991 through 1993, primarily with International Hydrographic Organization (IHO) Special Hydrographic Survey (SHS) standards as those used in the ADCIRC surveys. An IHO chart is not considered through. Names to Mariners address for sound and navigational information are the product of a separate navigational project. For navigational purposes, names may be the reverse side.

Orthometric elevation surveys were provided in meters, compiled by the National Ocean Service. Names were extracted from the ADCIRC Survey Data File (ADF) and converted to feet. The projection on this map is not for future labeling purposes. For full access refer to the ADCIRC Survey Data File available from the National Ocean Service.

Vertical datum: Mean Lower Low Water (MLLW), Zone 10 (1928 mean tide) (1988 datum) (see note) (see note)

North American Datum (NAD 83)
