# BATHYMETRIC MAP

GULF OF MEXICO  
LLOYD

Base map information including bathymetry was compiled by the National Ocean Service (NOS). Bathymetry compiled from ADCS hydrographic surveys (see index). NOS hydrographic surveys comply with International Hydrographic Organization (IHO) Special Publication 44 accuracy standards or those used at the date of the survey. This information is not intended for navigational purposes. Universal Transverse Mercator Grid, Zone 18, 1983 Mean Tides (---) are shown inside the outline. Charted positions across date, as printed in red, compiled by the Minerals Management Service.

--- Three lines offshore limits of MMS Outer Continental Shelf Official Protection Diagram. The projections on this map are not for Federal leasing purposes. For such purposes refer to the OCS Official Protection Diagram available from the Minerals Management Service.

--- Use of 1/2-degree data on portions of this map requires the use of generalized form lines to show suitable shape for general or statistical shaped features that would otherwise be distorted. The form lines are not at the prescribed contour interval.
