

BATHYMETRIC MAP

Base map information including bathymetry was compiled by the National Ocean Survey (NOS). Bathymetry compiled from NOS hydrographic survey data (see code) which comply with International Hydrographic Organization (IHO) Standard Practices for all countries standards or those used at the date of the survey. This information is not intended for management purposes.

Universal Transverse Mercator Grid Zone 18, 18000 Meter Ticks (1:1) are shown inside the rectangle.

Offshore position control data, printed in red, compiled by the Bureau of Land Management from low water lines of 85M Color-Contoured Shelf Official Projection Diagram. The positions and lines may not be Federal bearing purposes, for such purposes refer to the OCS Official Projection Diagram available from the Bureau of Land Management.
