

NOS NH 16-5(OC5)

Best map information including bathymetry, compiled by the National Ocean Survey from 1400 hydrographic surveys supplemented by photogrammetric information from other sources. Bathymetric contour intervals: 10 meters to the 200 meter depth, supplemented by 5 meter intervals, thence 20 meters to maximum depth, supplemented by 10 meter intervals. Depth MLW.

Universal Transverse Mercator Grid, Zone 16; 10,000 meter ticks (1" line shown on the coastline).

Photogrammetric data (overprinted in red) compiled by the Bureau of Land Management. All stations are based on the Universal Transverse Mercator Grid System, Zone 16 with 4 corners at 1:250,000 scale (100,000 contour interval), at 84° west longitude, and 9° north of 23° latitude. Each regular block contains 2,700 soundings. The areas of the irregular blocks containing sounding blocks under Louisiana and Texas sounding systems are as shown. The identification of the blocks is based on numerical sequences of 14 (North) starting at 1-01 and 2 (South) starting at 2-01.

Envision: 11/86/14

EVALUATION OF SURVEY ACCURACY

Survey Number	Survey Date	Scale	Survey Line Opening (Meters)	Horizontal Precision (Meters)	Survey Number	Survey Date	Scale	Survey Line Opening (Meters)	Horizontal Precision (Meters)
