

BATHYMETRIC MAP

Best map information including bathymetry was compiled by the National Ocean Service (NOS). Bathymetry compiled from 1956 bathymetric survey data (two series) which comply with International Hydrographic Organization (IHO) Special Publication 44 accuracy standards or those used at the time of the survey. This information is not intended for navigational purposes.

General Traverse Identifier Grid, June 2, 1959 After Table 1 (are shown inside the sea floor).

Digital projection which data, printed in red, compiled by the National Ocean Service. Heavy lines indicate limits of MMS Outer Continental Shelf Official Protection Diagram. The projections on the map are not for Federal Aiding purposes, for such purposes refer to the OCS Official Protection Diagram available from the Minerals Management Service.
