BATHYMETRIC MAP

OREGON COAST
HECETA ESCARPMENT

Base map information including bathymetry, was compiled by the National Ocean Service (NOS). Bathymetry was compiled from NOS multibeam sonar data (see notes) which comply with International Hydrographic Organization (IHO) Special Publication 44 accuracy standards, or those used at the date of the survey. As this map is not reproduced through NOAA's National Ocean Service, it is not intended for navigation purposes. For navigation safety, mariners should use current charts.

Other information (contour data, printed in red) is compiled by the National Ocean Service. Heavy lines indicate limits of MMS Data Coverage. Contour data is not shown in red. The projections on this map are not for Federal Reserve purposes; for such purposes refer to the NOS Official Projection Diagram available from the National Ocean Service.

Universal Transverse Mercator Projection and GZD Zone 18, 18000 meters wide. Line shows inside the margin.

North American Datum 1983

Contour Interval	Contour Interval	Contour Interval	Contour Interval
1000	500	200	100
500	200	100	50
200	100	50	20
100	50	20	10
50	20	10	5
20	10	5	2
10	5	2	1
