

MEMORANDUM

September 7, 2006

То:	Cory Streisinger, Director, DCBS John Shilts, Administrator, Workers' Compensation Division, DCBS
From:	Chris Day, Senior Forecasting Analyst, Information Management Division, DCBS
Subject:	Workers' Compensation Premium Assessment Rates Recommendation for CY 2007

Issue

In accordance with the requirements of ORS 656.612 and 656.614, the Director must establish workers' compensation premium assessment rates effective for calendar year 2007 for insurers, self-insured employers and self-insured employer groups.

The Director, in accord with ORS 656.612(5), will conduct an administrative rule making hearing on October 9, 2006, and will solicit testimony from staff and interested parties. This memo constitutes staff testimony that will be entered into the record.

Summary Recommendations

We recommend that the workers' compensation premium assessment rates in Administrative Rules 440-045-0020 and 440-045-0025 be lowered to 4.6 percent for insurers, and 4.8 percent for self-insured employers and self-insured employer groups for calendar year 2007.

Background

The Premium Assessment Operating Account (PAOA) includes the following DCBS program areas that are substantially funded by the workers' compensation premium assessment rate: the Workers' Compensation Division, Workers' Compensation Board, OR-OSHA, the Director's Office, and the Shared Services divisions (Fiscal and Business Services (FABS) and Information Management Division (IMD)). The primary funding mechanism for the PAOA is the annual workers' compensation premium assessment rate established by the Director in accord with ORS 656.612 and 656.614, and Oregon Administrative Rules (OAR) 440-045-0010 through 440-045-0030. The OAR 440 rules were first adopted in October 1999 as required by Senate Bill 592, which was passed during the 70th Legislative Assembly. The OAR codifies the applicable assessment rates for a calendar year. The PAOA also is funded by some fines and penalties, federal grant moneys, investment income, other miscellaneous revenues, and a transfer of funds from the Workers' Benefit Fund (WBF) to reimburse some of the administrative costs incurred by the PAOA account in the administration of WBF programs (see memorandum from Carey Thompson, dated September 12, 2001, "Administrative Cost Transfer from the Workers' Benefit Fund to the Premium Assessment Operating Account").

Rate Setting Parameters

All department rate analyses and recommendations must be accomplished within the context of the Department's Fund Balance Policy, articulated in FIN-01. For the PAOA account, the policy states that an adequate or acceptable fund balance at the end of the period for which rates and fees are set is an amount approximating six months (two quarters) to twelve months (four quarters) of expenditures and transfers. An adequate account balance should: (1) meet the cash flow needs of the account; (2) accommodate the timing of receipts and expenditures; (3) ensure stable funding for legislatively approved programs and services during uncertain economic times; and (4) minimize the volatility of fees and assessments. To accomplish the rate analysis task, a multi-year forecasted perspective is the generally accepted practice.

The recommended single and multiple year rate schedules take into account the objectives to minimize rate volatility, target a reasonable account balance, and accommodate the other aforementioned parameters according to the following formula:

Required Premium Assessment Rate = {Planned and Forecasted Expenditures and Transfers – (Forecasted Investment Income + Forecasted Other Revenue)} / Forecasted Assessable Premium Base

The formula clearly shows that finding the ratio of planned (legislatively approved) expenditures and transfers net of non-premium assessment revenue and the assessable (earned) premium base derives the required rate. In the case of the current analysis, the planned expenditures consist of the agency's 2005-07 biennium legislatively adopted budget (LAB) and the agency's 2007-09 Agency Request Budget, adjusted for the following major components: (1) adjustment to include Cost-of-Living Adjustments (COLAs) and other labor contract provisions, as well as anticipated vacancy savings; and, (2) updated expenditure forecasts for the Non-Complying Employer Program and Self-Insured Employer Adjustment Reserve. The required premium assessment rate also assumes extension of Section 7, Chapter 781, Oregon Laws 2003 (HB 3630) to fully utilize the \$40 million SAIF Reinsurance Pool Credit. Finally, this analysis reflects actual information from the DCBS quarterly financial statements through the period ending June 30, 2006.

Within the context of all of the various parameters discussed above, IMD has developed an analysis and recommendation for the workers' compensation premium assessment rates that should be applicable for calendar year (CY) 2007 and beyond. The results of our analysis, detailed recommendations, and assessment rate schedule considerations are discussed below.

Detailed Recommendations

A. Single-Year CY 2007 Recommendations

We recommend that the workers' compensation premium assessment rates be lowered to 4.6 percent for insurers, and 4.8 percent for self-insured employers and self-insured employer groups for calendar year 2007.

B. Multiple-Year Rate Schedule Recommendation

The multiple-year recommended rate schedule is currently for a reduction of the 5.5 and 5.7 percent assessment rates to 4.6 and 4.8 percent in CY 2007, with no further changes through the remainder of the five-year forecast horizon (see the 4.6-4.6% rate schedule in Table 2). By adopting this rate schedule, the account balance coverage ratios are consistent with the department's policy through the end of FY 2011. Naturally, whether the rate will actually remain at 4.6 percent through the entire forecast horizon is subject to much uncertainty. This uncertainty might arise from any number of factors including, among many others, softness in Oregon's economy, mandated new programs funded by the premium assessment, other legislative programmatic changes that affect the workers' compensation system, or changes in insurance industry pricing behaviors.

If the assessment rate is reduced to 4.6 percent in CY 2007 (the 4.6-4.6% recommended rate schedule in Table 2), expenditures and transfers are projected to relate to revenues in the subsequent fiscal years by the following amounts: FY 2007, -\$1,749,353; FY 2008, \$-5,917,101; FY 2009, -\$6,086,861; FY 2010, -\$5,836,855; and, FY 2011, -\$1,302,100 (see Appendix 2, Net Cash Flow line). From FY 2006 to FY 2011, the fund balance will decrease from \$72.5 million to about \$51.6 million. The decrease in the premium assessment operating account balance through FY 2011 allows for a gradual draw-down of the current PAOA balance and allows for a declination of the coverage ratio into the two-quarter to four-quarter fund balance coverage ratio band. A detailed discussion of the evaluated rate schedules follows.

Discussion

We examined the effects of two different assessment rate schedules (the 4.6-4.6% rate schedule noted above and 5.0-4.5%; 5.0% effective 1/1/2007 and 4.5% effective 1/1/2008) for calendar years 2007 through 2011, holding constant our assumptions about the premium assessment base, workers' compensation expenditures and other revenues. The analysis reflects the 2005-07 agency legislatively adopted budget, the 2007-09 agency request budget, and planned expenditures and transfers discussed previously. For FY 2010 and FY 2011, planned expenditures and chargeback are the result of escalating FY 2009 amounts by three percent per annum.

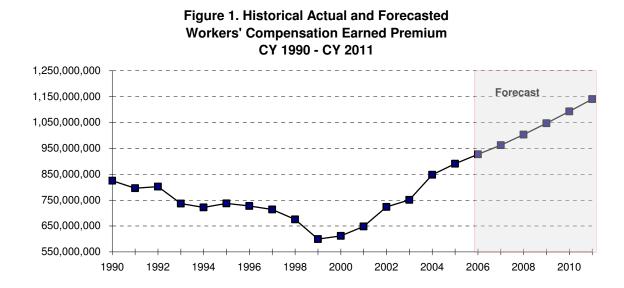

The workers' compensation premium forecast was developed using our premium forecasting system, which is a system of econometric models. Inputs into this system include projections of economic variables from the Department of Administrative Services' (DAS) June 1, 2006, "Oregon Economic and Revenue Forecast" (see Appendix 1 for a summary of forecast values and a brief description of the projected economic environment). We have made no modifications to the DAS economic forecast, which projects that Oregon will grow at a slightly higher rate than the U.S. economy throughout the forecast horizon.

Table 1 shows the actual premium for CY 2005 together with the projected premiums for CY 2006 - CY 2011 used in examining the effects of various assessment rates (the assessable base excludes the premium types noted below the table). Figure 1 displays the actual historical earned premium as well as the forecasted earned premium.

Table 1. Actual and Projected Workers' Compensation Premiums CY 2005 – 2011(100 million of premium)

	2005	2006	2007	2008	2009	2010	2011
Premiums*	\$8.91	\$9.27	\$9.62	\$10.03	\$10.47	\$10.93	\$11.40
Percent Change		4.04%	3.78%	4.26%	4.39%	4.39%	4.30%

* Includes Longshoremen's and Harbor Workers' Compensation Act Premiums that are excluded from the assessable premium base. Data is expressed in terms of \$100 million of premium.

Rate Analysis

The premium assessment operating account fund balance, including the Self-Insured Employers and Self-Insured Employers Group Adjustment Reserves, amounted to \$72,499,381 at the end of FY 2006. (The analysis relies on financial statements through the quarter ending 6-30-2006.) Table 2 and Figure 2 show the historical and projected ending balance for fiscal years FY 2006 through FY 2011 for two different rate schedules, 4.6-4.6% (staff recommendation) and 5.0-In addition, the table shows the projected fund balance as a percent of projected 4.5%. (See Appendix 2 for a summary of historical and projected fund revenues, expenditures. expenditures and transfers and ending fund balances using the staff recommended assessment rate schedule.) Finally, Table 2 also displays the fund balance coverage ratios for each fiscal year. The fund balance coverage ratio is equal to the number of quarters of average expenditures and transfers covered by the ending fund balance for each fiscal year. The current adequacy standard for this account is a coverage ratio of at least two. Given the two rate schedules shown in Table 2, we are recommending the 4.6-4.6% schedule over the 5.0-4.5% schedule for the following reasons: 1) It provides for a larger decrease in the rate in 2007, which provides more fund balance draw down; 2) the 4.6-4.6% rate schedule allows the rate to remain unchanged through the forecast horizon; and, 3) it brings the PAOA balance closer to a two-quarter coverage ratio by the end of FY 2011.

Fiscal <u>Year</u>	Ending Balance at 4.6 –4.6 %	Percent of <u>Expenses</u> *	Coverage <u>Ratio</u>	Ending Balance at 5.0 –4.5%	Percent of <u>Expenses</u> *	Coverage <u>Ratio</u>
2006	\$72.5	138.2%	5.43	\$72.5	138.2%	5.43
2007	\$70.8	126.9%	5.08	\$71.6	128.5%	5.14
2008	\$64.8	116.6%	4.67	\$68.5	123.2%	4.93
2009	\$58.7	101.9%	4.07	\$61.6	106.9%	4.27
2010	\$52.9	89.3%	3.57	\$54.8	92.6%	3.70
2011	\$51.6	84.9%	3.40	\$52.5	86.4%	3.46

Table 2. Actual and Projected Workers' Compensation Ending Balances (000,000's)

* Actual ending fund balance as a percent of the annual FY expenses plus adjustments and transfers.

Appendices 3 and 4 show projected quarterly revenues and expenditures that result in the above fiscal year balances for the two assessment rate schedules.

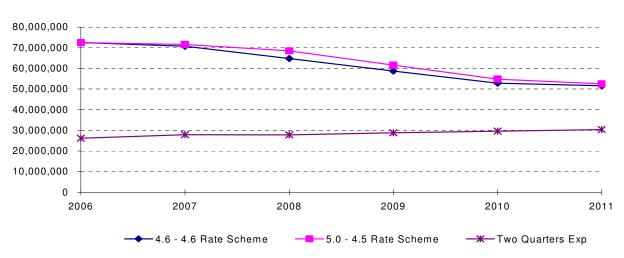

Figure 2. Ending Fund Balances of the Premium Assessment Operating Account, FY 2006 - 2011

Self-Insured Employer and Employer Group Reserves

A. Self-Insured Employer Adjustment Reserve

On January 1, 1988, the additional assessment against self-insured employers to fund the Self-Insured Employer Adjustment Reserve (SIEAR) was discontinued. As expected, interest on the Reserve's account balance and subrogation recoveries continued to exceed expenditures, until FY 1998. The failure of Montgomery Ward occasioned a substantial increase in expenditures, and the correlative, unresolved legal dispute regarding payment performance under the terms of surety contract language contributed to substantial increases in the reserve expenditures. In FY 2000 and FY 2001, \$554,000 was recovered from the two surety companies associated with the Montgomery Ward's case and deposited into the SIEAR. Due to continued defaults by some self-insurers and an increase in Montgomery Ward's reserve exposure, the SIEAR fund balance decreased 28.7 percent from June 1998 to June 2005.

As a result of the issues discussed above, effective January 1, 2005, an additional assessment of 0.2 percent against self-insured employers to fund the Self-Insured Employer Adjustment Reserve (SIEAR) was re-instituted.

As stated in FIN-01, a fund balance approximating \$1 million is a reasonable minimum balance given the history of the reserve's long-term liability; the average liability for the past four years for the periods ending December 31st amounts to \$1,091,096 (see Exhibit A). Assuming a \$1 million liability, the reserve ratio, the ratio of estimated liabilities to fund balance would approximate a value of one. This value means that the long-term liability would be fully-funded, a requirement which the department makes of all Oregon workers' compensation insurers (see for example ORS 733.050 regarding inadequate reserves). By using this minimum fund balance, reserves will be sufficient to ensure that claims obligations can be met. Hence, we recommend the SIEAR fund balance should approximate \$1 million, an amount close to the average long-term liability.

The SIEAR account balance as of June 30, 2006 was \$1,115,912. This balance increased 54.2 percent from the June 30, 2005 ending balance of \$723,921 due to several large, unanticipated recoveries from excess insurers and surety companies that were posted in the first quarter of FY 2006, representing several different self-insured employers. These recoveries came as a result of the findings from the Self-Insured Employer Adjustment Reserve Audit Summary that is performed each spring by the Workers' Compensation Division. As a result, the first quarter of FY 2006 had the largest one quarter increase in the SIEAR account balance since FY 2000, when the large recoveries are subject to much uncertainty and are difficult to forecast, and are not incorporated into our revenue forecast for this account. We recommend that the assessment differential for self-insured employers continue at 0.2 percent. Given current revenue and expenditure forecasts, the balance should reach about \$2,137,490 by the end of FY 2011 (see Appendix 5). If current trends continue, the assessment may be able to be discontinued or lowered in future years, depending upon the experience of the reserve.

B. Self-Insured Employer Group Adjustment Reserve

The Self-Insured Employer Group Adjustment Reserve was created in 1981. The Reserve's account balance as of June 30, 2006 was \$338,424. We recommend that the assessment differential for self-insured employer groups continue at 0.2 percent. Assuming no expenditures and a constant group membership level, the balance should reach about \$681,582 by the end of FY 2011 (see Appendix 6). There is a risk that a reserve liability could emerge.

If you have any questions about this analysis and recommendations, please let me know.

1. From Department of Administrative Services' June 2006 "Oregon Economic and Revenue Forecast:"

The first quarter 2006 initial estimate of job growth was a 6.3 percent annual rate over the fourth quarter 2005 and was one of the strongest quarterly growth rates over the past 15 years. The Oregon Office of Economic Analysis (OEA) forecasts that Oregon's economy will grow at a slightly higher rate than the U.S. economy between 2006 and 2013. Even though the Oregon economy is projected to grow faster than the nation after 2005, per capita income and average wages are still expected to be below the national average. Oregon's long-term growth will be fueled by a number of key factors: recovery in the semiconductor industry, export growth and rising commodity prices, continued strength in domestic markets, business cost advantages, affordable housing, biotechnology, sustainable development, and quality of life. The major risks facing the Oregon economy are: geopolitical risks, a falling U.S. dollar, inflation and Federal Reserve Bank reactions, a sharp and major stock market correction, a possible collapse of the housing market, rising regional energy prices, PERS and possible state and local government budget shortfalls, initiatives and referendums, and slower than expected recovery for semiconductors, software, and communications.

2. From Research and Analysis Section, Department of Consumer and Business Services, 8/2006.

3. From Research and Analysis Section, Department of Consumer and Business Services, 8/2006. Loss figures have been adjusted to reflect changes in SAIF's reserving practices.

 From Research and Analysis Section, Department Consumer and Business Services, 8/2006. Includes coverage related to the Longshore and Harbor Workers' Compensation Act and excess coverage for self-insurers.

5. Oregon Construction Employment, Oregon Service Employment, and Oregon Manufacturing Employment data experienced a break in the series beginning in CY 2003 due to the shift from SIC to NAICS.

Note: Vocational Rehabilitation coverage is included in loss and premium figures and are estimated for forecasting purposes prior to 1986. Source: Research & Analysis Section, IMD, Department of Consumer and Business Services

For the purposes of this analysis, self-insured employer reserves are included in the Premium Assessment Operating Account. All figures are actual through quarter ending 6/30/2006

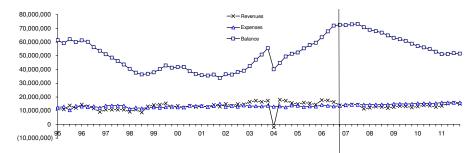

- 1. Assessment forecasts are based on a premium assessment rate of 6.8 percent through CY 2005, 5.5 percent effective 1/1/2006, and 4.6 percent effective 1/1/2007.
- 2. Estimates are from the R&A Section, Information Management Division, Department of Consumer and Business Services,
- the 2005-07 Legislatively Adopted Budget, and the 2007-09 Agency Request Budget. In FY 2004 this includes a financial statement accrual for the transfer to the General Fund from WCD and PAOA in accordance with house bills 2148 and 5077.
- 3. Includes Department and Board administrative costs, expenditures of Federal funds, capital outlay, and Shared Services costs.
- 4. Planned OHSU transfers and/or expenditures are equal to 1/16 cent per worker per hour.
- 5. Net Non-Complying Employer expenditures are transferred to the Workers' Benefit Fund.
- 6. Chargeback expenditures reflect Shared service chargeback recoveries, from non-PAOA account, DCBS entities.
- Beginning in FY 2004, chargeback expenditures also include indirect costs from the WBF.
- 7. Transfer to Insurance Division in the first quarter of each Fiscal Year to fund workers' compensation activities.
- 8. Miscellaneous transfers and adjustments are from actual quarterly financial statements.
- 9. Quarterly transfer from the WBF to the PAOA to cover direct administrative costs associated with WBF programs.
- 10. Quarterly transfer to the Bureau of Labor and Industries. This was included in Administration expenditures prior to FY 2002.
- 11. Annual premium assessment credit for SAIF from CY 2004 through CY 2010, in accordance with HB 3630.

Column detail may not add to totals due to rounding.

Includes WC Division, WC Board, OR-OSHA, Central Support Services, and Self-Insured Employer Adjustment Reserves.
 Premium forecasts are based on WC Premium Forecasting Model run 6/2004. Data reflect premium assessment rates of 16.8% from 7/1/82 to 12/31/85, 12.0% during CY 86, 7.0% during CY 87, 5.5% during CY 88 and CY 89, 4.5% during the period CY 90 - CY 97, 7.3% from CY 98 - CY 2001, 8.0% from CY 2002 - CY 2003, 7.0% from CY 2004, 6.8% for CY 2005, 5.5% for CY 2006, and 4.6% for CY 2007 - CY 2011.
 Includes NCE recoveries, fines & forfeitures, Federal funds and other Rehab revenues through 12/31/95. Also includes a financial statement accrual of negative revenue in the first quarter of FY 2004, amounting to \$18.5 million, for the transfer to the General Fund in accordance with HB 2148 and HB 5077 presend during the 2007 leadeble accession.

of negative revenue in the first quarter of FY 2004, amounting to \$18.5 million, for the transfer to the General Fund in accordance with HB 2148 and HB 5077 passed during the 2003 legislative session.
 Includes expenses, capital outlay, and transfers to the Insurance Division and the Bureau of Labor and Industries (BOLI) and the Insurance Division. Projected account incremental chargeback revenue is included starting FY 95. The expenditures for FY 2006 and FY 2007 are based on the 2005-707 LBB and the 2007-99 Agency Request Budget. Expenditures are escalated at three percent per annum for FY 2010 and FY 2011.
 Transfers through 3/31/95 include 1/2 cent per worker per day to OHSU, beginning in the fourth quarter of CY 87, retroactive to 1/1/87. As of 6/30/95 the transfer to OHSU equals 1/16 cents-per-hour equivalent revenue. As of 1/1/96, two quarters of expenditures for the NCE and Rehab plus quarterly net expenditures for these reverse was transferred to the Workers' Benefit Fund. Effective 7/1/2001, there is a quarterly transfer from the WBF to the PAOA to cover direct administrative costs associated with WBF programs.
 The actual and forecasted premium assessment rates are as follows:

2004 = 7.0%	2005 = 6.8%	2006 = 5.5%	2007 = 4.6%
2008 = 4.6%	2009 = 4.6%	2010 = 4.6%	2011 = 4.6%

Includes WC Division, WC Board, OR-OSHA, Central Support Services, and Self-Insured Employer Adjustment Reserves.
 Premium forecasts are based on WC Premium Forecasting Model run 6/2004. Data reflect premium assessment rates of 16.8% from 7/1/82 to 12/31/85, 12.0% during CY 86, 7.0% during CY 87, 55% during CY 88 and CY 89, 4.5% during the period CY 90 - CY 97, 7.3% from CY 98 - CY 2001, 8.0% from CY 2003, 7.0% from CY 2004, 6.8% for CY 2005, 5.0% for CY 2007, and 4.5% from CY 2008 - CY 2011.

4.5% from CY 2008 - CY 2011.
3. Includes NCE recoveries, lines & forletures, Federal funds and other Rehab revenues through 12/31/95. Also includes a financial statement accrual of negative revenue in the first quarter of FY 2004, amounting to \$18.5 million, for the transfer to the General Fund in accordance with HB 2148 and HB 5077 passed during the 2003 legislative session.
4. Includes expenses, capital outlay, and transfers to the Insurance Division and the Bureau of Labor and Industries (BOLI) and the Insurance Division. Projected account incremental chargeback revenue is included starting FY 95. The expenditures for FY 2006 and FY 2007 are based on the 2005-07 LBB and the 2007-9 Agency Request Budget. Expenditures are escalated at three percent per anum for FY 2010 and FY 2011.
5. Transfers through 3/31/95 include 1/2 cent per worker per day to OHSU, beginning in the fourth quarter of CY 87, retroactive to 1/1/87. As of 6/30/95 the transfer to OHSU equals 1/16 cents-per-hour equivalent revenue. As of 1/1/96, two quarters of expenditures for the NCE and Rehab plus quarterly net expenditures for these reserves was transferred to the Workers' Benefit Fund. Effective 7/1/2001, there is a quarterly transfer from the WBF to the PAOA to cover direct administrative costs associated with WBF programs.
6. The actual and forecasted premium assessment rates are as follows: 6.

The actual and	forecasted	premium	assessment	rates are	as follows:

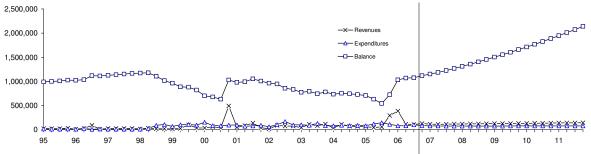

2004 = 7.0%	2005 = 6.8%	2006 = 5.5%	2007 = 5.0%
2008 = 4.5%	2009 = 4.5%	2010 = 4.5%	2011 = 4.5%

Note: All data subject to revision

Revenues received for this program are from the 0.2 assessment rate differential paid by Self-Insured Employer Groups. Current projections are calculated as 0.2 percent of the current self-insurer group premium forecast.
 There are currently no expenditures for this program.
 There are currently six Self-Insured employer groups with a combined total of over 1000 employers; including cities, counties, special districts, contractors groups, Oregon Educators, and Oregon Operators.
