SECTION XIII

URANIUM RECOVERY PROJECT MANAGER/TECHNICAL REVIEWER NRC PROJECT MANAGER/TECHNICAL REVIEWER QUALIFICATION JOURNAL

<u>Applicability</u>

This NRC Project Manager/Technical Reviewer Qualification Journal implements NRC Manual Chapter 1246, Appendix A, Section XIII, which establishes the minimum training requirements for personnel assigned to perform Project Management and Technical Reviews for uranium recovery facilities. The Qualification Journal must provide traceable documentation to show that minimum requirements are met for each Project Manager/Technical Reviewer.

The NRC Project Manager/Technical Reviewer Qualification Journal consists of a series of qualification guides and signature cards. Each signature card is used to document task completion, as indicated by the appropriate signature blocks. Each signature card has a corresponding qualification guide which establishes the minimum knowledge levels or areas of study that must be completed for each signature card.

Most of the qualification guides are divided into sections. The review sections of the qualification guides identify references with general application to the license reviewer's qualification. The Project Manager/Technical Reviewer is expected to have a general familiarity with these references. Other sections of the qualification guides identify specific references that have direct application to the license review discipline. The Project Manager/Technical Reviewer is expected to demonstrate detailed knowledge of the license review specific references.

In order to support the review of upper tier documents, programs, and policies, the Project Manager/Technical Reviewer's First Line Supervisor will assign one or more uranium recovery facilities as reference facilities. The selection of a reference facility is intended to provide the Project Manager/Technical Reviewer's management with the ability to tailor the qualification process to the experience and training level of the license reviewer, and to meet the needs of the NRC. The use of specific real world material will reinforce the qualification process.
