III. Valuation Guidelines for Law Libraries	57
Index	71

Introduction

The purpose of this publication is to:

- Provide county assessors, county and state appraisers, tax collectors, county boards of property tax appeals, and taxpayers with guidelines to value personal property of typical businesses, and
- Secure uniformity in the assessment of personal property according to Oregon's ad valorem tax laws [ORS 306.120(1)].

This document includes an alphabetical list of business types with typical equipment and cost new as well as information on taxable personal property (with examples shown on Table 1), reporting, valuation, and trade level concept. Table 2 lists *Personal Property Valuation Factors*. A special section on law libraries is located at the back of the document.

The "typical cost new" figures are guidelines only and do not exclude the use of other schedules or valuation information when conditions warrant, provided that the assessor or taxpayer has substantiating market data and documentation. The specific equipment items are not inclusive. They are only those items commonly found or used in the types of businesses listed.

To request a **copy** of this publication (No. 150-303-441), please contact:

Oregon Department of Revenue
Property Tax Division
955 Center Street NE
Salem OR 97301-2555
Phone: 503-945-8278

For **questions** concerning use of the guidelines, please contact:

Personal Property Analyst
Oregon Department of Revenue
Property Tax Division
955 Center Street NE
Salem OR 97301-2555
Phone: 503-945-8278

The law library section and *Table 2: Personal Property Valuation Factors* (depreciation tables) are available on the Oregon Department of Revenue website at:
www.oregon.gov/DOR/publications.shtml.

I. Personal Property Assessment

A. Taxable Personal Property

Taxable personal property includes machinery, equipment, furniture, etc., used previously or presently in a business, including any property not currently being used, placed in storage, or held for sale. For examples of taxable personal property, see Table 1 on the next page.

“Fixture means personal property that is attached to land or a building and that is regarded as an irremovable part of the real property, such as a fireplace built into a home. Under this definition, lights, cabinets, etc. are fixtures.

The deadline for filing a *Confidential Personal Property Return* is March 3, 2008.

For more information on taxable and exempt personal property, tax return filing, penalties for late filing, and appeals, contact your local county assessor. You may request a copy of the *Personal Property Assessment and Taxation Information Circular* (No. 150-303-661) or contact a Personal Property Analyst at the Oregon Department of Revenue. (See address and phone number information on page iii.)

B. Reporting

The first step in assessing personal property is to obtain a complete listing of all items owned, leased, or rented, in the possession of a business operator, and held or used.

The taxpayer is required by law to provide this information as part of the annual *Confidential Personal Property Return* and must include all detail information requested.

If the *Confidential Personal Property Return* is incomplete, the assessor should return the form and ask the taxpayer to furnish the data needed (ORS 308.285 and ORS 308.290).

When equipment acquisition cost data is lacking from the taxpayer, the *Personal Property Valuation Guidelines 2008* “typical cost new” figures are appropriate as a basis for estimating value.

Although personal property appraisers rely heavily on the data reported by the taxpayer, they should make periodic field audits. Appraisals should be made of the property and records checked to ensure adequate reporting.

C. Valuation

The guidelines are issued to help achieve uniform assessment of tangible personal property. Items of equipment that depreciate at approximately the same rate have been listed in groups under the appropriate age/life column.

Allowance for depreciation must be based on the best information available to the assessor and documented supporting data must be noted for variations in value from the typical. Unique or unusual situations affecting the value of personal property such as preventative maintenance programs, equipment abuse, or equipment being “cannibalized” should be discussed with the local county assessor.

In valuing equipment, the method is essentially the same whether the property is reported on a **Cost New Basis** or **Secondhand Cost Basis**. However, when the items are reported on a Secondhand Cost Basis, the appraiser must estimate an original cost new for those items before using the valuation method.

D. Trade Level Concept

In Oregon, all personal property is valued at the user or consumer level. However, there are five levels of trade you should be aware of and understand.

1. Manufacturer's Level

This level is acknowledged when the property is in the hands of the manufacturer and in the local manufacturer's plant.

2. Wholesale Level

As property moves through the channels of trade, it increases in value by virtue of freight, overhead, and intracompany profit. These costs are added to the property regardless of ownership. When the property moves from the manufacturer's level to the wholesale level, the increments of cost must be recognized.

3. Distributor Level

In some cases, this level is synonymous with the wholesale level. However, in certain cases there is a difference and, if so, must be recognized.

4. Retail Level

This will include the full "laid down cost" of the inventory up to this point. The increment of cost/value here is quite substantial since the inventory has moved to the level where it will be sold to the user or consumer.

5. User or Consumer Level

At this level, the property has reached its final destination and now contains all associated costs. This level is representative of market value to the consumer.

Explanation of Age/Life Years

Several items in Table 1 have multiage/life years that appear after their names. This means there is more than one item of taxable personal property that is used in this type of business. The proper factor can be obtained by looking up the age/life of that particular item of personal property.

Example: Under Aircraft equipment, one would find age/life numbers of:

3 5 10 15

This means that items in this field have different years of life.

- 3 year may be a computer;
- 5 year may be a calculator;
- 10 year may be a TV set;
- 15 year may be a set of tools.

Many of the age/life factors apply to a single item and therefore do not have multiage/life years.

1. Valuation Method for Equipment Reported on Cost New Basis

The recommended method for valuing equipment is:

- a. Locate the Valuation Factor for the year of acquisition from Table 2.
- b. Multiply the reported cost new by the Valuation Factor. The result is the market value of the item.

Example: $\text{Cost} \times \text{Valuation Factor} = \text{Market Value}$

$$\$450 \times .63 = \$284 \text{ Market Value}$$

2. Valuation Method for Equipment Reported on a Secondhand Cost Basis

When equipment costs are reported on a Secondhand Cost Basis, the appraiser must estimate the original cost new of the item. This cost-new estimate is multiplied by the Valuation Factor for an indication of current market value. To estimate the original cost new of secondhand equipment, these sources of information are recommended:

- Analysis of local sales transactions;
- Advertisements in local trade and news publications;
- Comparisons with other personal property returns;
- Opinions of local equipment dealers and users;
- Published price guides.

3. Process to Estimate Real Market Value

Step 1: Determine appropriate Valuation Factor from Table 2, *Personal Property Valuation Factors*.

Step 2: Determine the knowns:

- Original cost new or acquisition cost and date;
- Age;
- Valuation Factor.

Step 3: Calculate estimated real market value.

Example 1: Estimate real market value from original cost new.
Use 15-year age/life column (Table 2).

Knowns: Original cost new	\$25,000
Age or estimated age	10 years
Valuation Factor	.54

$$\$25,000 \times .54 = \$13,500 \text{ Real Market Value}$$

(Original cost new \times valuation factor = real market value)

Example 2: Estimate real market value from acquisition cost.
Use 15-year age/life column (Table 2).

Knowns: Acquisition cost \$13,500
 Age estimate 10 years
 Valuation Factor .54

$\$13,500 \div .54 = \$25,000$ Est. original cost new
(Acquisition cost \div valuation factor = Est. original cost new)

Year 10 $\$25,000 \times$ Factor of .54 = \$13,500 Real Market Value

Year 11 $\$25,000 \times$ Factor of .51 = \$12,750 Real Market Value

Year 12 $\$25,000 \times$ Factor of .46 = \$11,500 Real Market Value

Example 3: Estimate real market value if age is unknown.

Determine Valuation Factor.
Use 15-year Age/Life column (Table 2).

Knowns: Acquisition cost \$13,500
 Original cost new \$25,000

$\frac{\text{Acquisition cost}}{\text{Original cost new}} = \text{Valuation Factor}$

$\frac{\$13,500}{\$25,000} = .54$ Valuation Factor

.54 Valuation Factor is equal to 10 years old

Year 10 is $\$25,000 \times .54 = \$13,500$ Real Market Value

Year 11 is $\$25,000 \times .51 = \$12,750$ Real Market Value

Year 12 is $\$25,000 \times .46 = \$11,500$ Real Market Value

4. Minimum Value

Studies show equipment maintained in operating condition eventually stabilizes at a minimum value level. This applies particularly to older serviceable equipment which continues as a functional item.

Determine minimum value by multiplying equipment's cost when new by the lowest figure listed in Table 2, *Personal Property Valuation Factors*.

Example: Determine Minimum Value.

Use 15-year age/life column.

Cost New \times Valuation Factor = Minimum Value

$\$25,000 \times .30 = \$7,500$ Minimum Value

Table 1

Table 4

Molds, Patterns, Jigs, Dies, Fixtures, Forms, Tooling

Depreciation Schedules

Effective January 1, 2007

2007 Personal Property Table

	MOLDS LONG LIFE	MOLDS SHORT LIFE
Depreciation Code	ML	MS
Age/Life of Asset	10 Years	3 Years
Year of Mfg.		
2007	0.77	0.65
2006	0.60	0.25
2005	0.46	0.15
2004	0.36	0.00
2003	0.28	0.00
2002	0.22	0.00
2001	0.17	0.00
2000	0.13	0.00
1999	0.10	0.00
1998	0.00	0.00
1997	0.00	0.00
1996	0.00	0.00

Molds, long life, includes Molds, Patterns, Jigs, Dies, Fixtures, Forms, and Tooling that are physically designed for a long service life and the parts produced have long product lives. Examples include: molds for plant pots used by nurseries and patterns used to cast replaceable wearing parts on mining equipment.

Molds, short life, includes Molds, Patterns, Jigs, Dies, Fixtures, Forms, and Tooling that have short product lives. Examples include: an injection mold for plastic parts of a high-tech device or a mold used in heavy production that wears out relatively quickly.

II. Valuation Guidelines for Typical Businesses and Equipment

AMUSEMENT

Item	Typical Cost New
Games:	
Basketball Games	\$4,995
Billiard Tables (complete*)	
7 foot	2,495
8 foot	2,695
9 foot	2,895
Extra set of Cue Balls (replacement cost)	85
Extra Cue Stick (replacement cost)	19
Extra set of all accessories (replacement cost)	325
Countertop Touch Machine	3,495
Deluxe "Sit-Down" Video	\$14,995/17,995
Electric Crane Machines	
32" wide	3,295
60" wide	7,495
Flipper & Arcade:	
Bowlers & Shuffles	3,695
Flipper Games	3,995
Kiddie Rides	3,295
Music:	
CD Players (loaded)	6,995
CD Players (unloaded)	5,495
Digital Downloading Jukebox	7,995
Pool Tables (complete*)	
7 foot	2,495
8 foot	2,695
Pool Table Light	200
Redemption Machines	\$3,995-14,995
Video and TV	3,995

* Complete includes freight and set-up, set of balls, rack, 4-cue sticks, wall mount cue stick rack, crutch cue, and table dust cover.

COPY MACHINES

Depreciation factors to be applied to original cost new. As long as an item remains in use, regardless of age, the assessment will not be less than 5 percent of original cost new on Analog copiers and 8 percent of replacement cost new on Digital Copiers.

Analog — 6-year Life		Digital — 6-year Life	
1st year	75.0	1st year	58.0
2nd year	50.0	2nd year	32.0
3rd year	35.0	3rd year	19.0
4th year	30.0	4th year	10.0
5th year	25.0	5th year	7.0

DATA PROCESSING EQUIPMENT AND MAIN FRAME

Reporting And Valuation Guidelines

The following procedures are recommended for assessment of Data Processing equipment. Items to be reported and valued under these guidelines include a wide range of processing and tabulating machines, such as central processing units, optic readers, printers, terminals, sorters, and related items.

Original cost new shall be the beginning point for determining values under this guideline.

Economic lives of six (6) years for systems machines and non-systems machines are considered applicable. Percentage factors (Percent Good) will be applied to each item's original cost new depending on the date of manufacture as follows:

	Percent Good
1st assessment year	76
2nd assessment year	60
3rd assessment year	43
4th assessment year	32
5th assessment year	23
6th assessment year	14
7th assessment year (and thereafter)	10

As long as an item remains in use, regardless of age, the assessment will not be less than 11 percent of original cost new.

MICRO-COMPUTERS

Because of the many options available it would be very difficult to list the "Typical Cost New" for all the personal computers being used at the present time.

The factors listed below are to be applied to the original cost new.

Assessment Year	Percent Good
1st	58
2nd	32
3rd	19
4th	10
5th (and thereafter)	7

DENTAL

Per Item Cost	Typical Cost New
Hygiene/Treatment Room Equipment

(Most common) “V” Top	1,470–3,150
Hydraulic “V” Top	2,310–3,885
Table Top Refrigerator	215
Vet Test (blood chemistry analyzer)	10,500
Washer & Dryer	855
X-Ray Machine (including accessories)	12,600–28,350
X-Ray Machine, portable	8,400–12,600

VIDEO RENTAL STORES

Item	Typical Cost New
Cameras	\$850
Recorders	300

Video rental tapes are to be reported by the taxpayer at cost and assessed at 24 percent of cost.

Example: $\text{Cost} \times \text{Valuation Factor} = \text{Market Value}$

100 tapes @ \$50 = \$5,000

100 tapes @ \$40 = 4,000

500 tapes @ \$30 = 15,000

400 tapes @ \$10 = 4,000

Total cost \$38,000

$\$38,000 \times .24 = \$9,120$ (Market Value)

If taxpayer cannot or does not report tapes by cost, use the following schedule:

Videotapes	
2007	\$13
2006 and prior	5
DVDs	
2007	\$17
2006 and prior	10

Law Library

LAW LIBRARIES

SUGGESTED VALUES FOR JANUARY 1, 2008

This schedule has been prepared by the Property Tax Division of the Department of Revenue, State of Oregon, in cooperation with the Oregon State Bar. Owners of Law Libraries should declare the schedule values to the assessor. No further reduction should be made for depreciation, shopwear, or obsolescence. Space prevents a listing of all books that might be found in a Law Library. The lack of a listing does not indicate that individual books, sets, or volumes should not be reported. Such unlisted books, sets, or volumes should be reported in Section Q values unless personal knowledge indicates greater actual value on some sets.

Valuations and update cost figures based on best information available.
