SUPPLEMENTARY INFORMATION:

Background

The NMFS Alaska Region core EFH team was formally established in April, 1997, to implement the EFH provisions of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). The Magnuson-Stevens Act defined EFH as "those waters and substrate necessary to fish for spawning, breeding, feeding, or growth to maturity." In June 1998, the NPFMC adopted plan amendments for five fish management plans (FMPs) to incorporate EFH provisions. These provisions included identification and description of EFH including HAPC, identification of research and information needs, and identification of potential adverse effects on EFH due to fishing and non-fishing activities. The NPFMC is accepting proposals to identify HAPC, and to establish conservation measures to minimize, to the extent practicable, adverse impacts from fishing on HAPC. Proposals are

due by Monday, August 17, 1998. Additional details and guidelines for HAPC proposals are available from the NPFMC office. At the September 14, 1998, meeting the EFH core team will be making recommendations on HAPC proposals and developing their own proposals. This meeting is open to the public.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Cindy Hartmann, (907) 586-7235, at least 5 working days prior to the meeting date.
