To import cleaned weather from the ODF Salem server have FireFamily Plus open
In FireFamily Plus go to
| File, open
| Navigate to \\salemuser2\wxdataqc
| Select ODF_AWS_06cleaned.mdb and open
| Select the RAWS station and the period of interest, ie Jan1, 1997-Dec 31, 2006

To inspect the completeness of the data in FireFamily Plus go to
| Weather, view observations, all

To export the weather data to import into the local FireFamily Plus database go to
| Weather, view, all, Save Icon, select export FWX9 Format (year 2000 compliant)
| Navigate to the desired location and name and save the file

To import the weather data into the local FireFamily Plus database go to
| Data Import
| New FW9 files
| Navigate to saved location select file and open
