## U.S. Export Sales on Track for 10.3 Million Bale Export Level

Export Commitments to Date  
(Week 30 MY 01/02 vs. Week 30 MY94/95)

The U.S. export estimate for MY2001/02 is 10.3 million bales (480-lb. Bales), the highest level in 75 years. Based on export sales reporting, at this point in the marketing year, the United States has exported 60 percent of the forecast of 10.3 million bales. To meet the forecast, average weekly exports of about 185,000 bales are needed for the remainder of the marketing year. At the same time in MY1994/95 shipments had reached 58 percent of the 9.4 million bales final export total. Total commitments at this point in the marketing year are nearly identical at about 10.7 million bales (480-lb.). However, outstanding sales in the current marketing year are less than what they were in MY1994/95, 4.4 million bales (480-lb.) versus 5.3 million bales.

In MY1994/95 China and Japan accounted for 35 percent of total commitments at this point in the marketing year. In the current marketing year these two countries account for only 5 percent of total commitments. Mexico and India are leaders in the current marketing year, accounting for 18 and 13 percent respectively of total commitments. While in MY1994/95, these two countries combined accounted for less than 8 percent.

The 2001/02 marketing year began the year with about double the level of sales on the books as the MY1994/95 season. More sales were made during MY1994/95 than are likely this season, but MY1994/95 shipments were constrained by tight stocks, which fell to 2.6 million bales on July 31, 1995.

## U.S. COTTON OUTLOOK

This month's 2001/02 U.S. projections include higher exports and imports and lower ending stocks. Production and domestic mill use are unchanged from last month. Exports are increased 300,000 to 10.3 million, as export sales and shipments remain strong. Imports are increased to 15,000 bales. Projected ending stocks are lowered 300,000 bales to 8.5 million bales.

The U.S. estimates for 2000/01 are unchanged.

## WORLD COTTON OUTLOOK

The world 2001/02 situation includes higher production, beginning and ending stocks, consumption and trade this month. World production is raised 290,000 bales. Production increases of 200,000 bales for Pakistan and Greece are partially offset by reductions for Paraguay, South Africa and Zimbabwe. World consumption is higher, with increases for the Czech Republic, Italy, Korea, Mexico, and Pakistan. Import forecasts are decreased by 250,000 bales in Brazil and 50,000 bales in Pakistan and increased in the Czech Republic, Italy, Korea, and Mexico. The world export forecast is increased 195,000 bales as decreases in Zimbabwe, South Africa, and Paraguay partially offset the increase in the United States. World stocks are increased marginally 35,000 bales this month, to 44.0 million bales.

The world estimates for 2000/01 show slightly lower beginning stocks and marginally higher ending stocks, lower exports and higher consumption. Beginning stocks are decreased 46,000 bales, due to adjustments in previous years trade for the Sudan, the Czech Republic and Iran. Imports were increased 55,000 bales, reflecting a change in Czech Republic. Consumption is up 111,000 bales, on increases in Iran and the Czech Republic. Export are down 187,000 bales on changes in Iran and the Sudan. Ending stocks were up 90,000 bales as a result.

## COTTON PRICES

**Cotlook A Index:** The A-Index, a principal measure of international cotton prices, is an average of the five lowest quotes of cotton for delivery to Northern European ports. In March, quotes from Uzbekistan, African Franc-Zone, Paraguay, Syria and Greece were included in the index. The index

averaged 42.87 cents per pound during the period, down 0.55 cents from the previous month. The African Franc-Zone quote was the lowest in the index during the four-week period, averaging 42.13 cents per pound.

**Futures Prices:** Nearby March 2002 futures prices in February averaged 34.55 cents per pound, down 2.34 cents from last month. Benchmark May 2002 averaged 36.06 cents per pound, down 20 points from last month.

## **U.S. COTTON HIGHLIGHTS**

**Cotton Consumption:** The seasonally adjusted daily rate of U.S. cotton consumption in January 2002 was 28,352 (480-lb.) bales, compared with December's level of 28,754. A total of 565,154 bales were consumed during the four weeks in January, compared with 583,198 during the five weeks in December. The seasonally adjusted annualized consumption rate for the month of January was 7.4 million bales, down from 7.5 million in December.

**Textile mill report:** Domestic mill activity continued slow. Most mills have covered their anticipated needs through July 2002. Some mills expressed interest in replacing high grade, high priced California cotton with high grade, relatively lower priced Mid-South and/or Southeastern cotton. Other mills bought light volumes of lower grades (colors 42 and 53) for denim production. A slight improvement in demand for sales yarns was reported, as was some renewed interest in knitted products. Demand for woven products remained depressed.

**Cotton Stocks:** U.S. cotton stocks on hand in consuming establishments at the end of January were 340,198 bales (480-lb), down from 347,477 in December. Stocks held in public storage and compresses in January totaled 15.3 million bales, down from 16.3 million in December. Active spindles in January totaled 2.84 million, of which 1.62 million were dedicated to 100 percent cotton, compared with 3.93 million for the same time last year, with 2.1 million dedicated to 100 percent cotton. Cotton's share on the cotton spindle system in January was 81.3 percent.

**U.S. cotton exports in December 2001 totaled 924,000** (480-lb.) bales, up from 743,000 bales in November 2001, and 400,000 bales above December 2000. According to the U.S. Bureau of the Census, the leading markets in December were India, Mexico, Thailand, Pakistan, Turkey, and Taiwan.

**U.S. cotton imports in December 2001** came from Egypt and totaled about 400 bales, up 200 bales from the previous month.

\* Loss for countries outside of the United States reflects cotton lost or destroyed while in the marketing channel. For the United States, loss reflects the difference between stocks as reported by the Bureau of the Census and implicit stocks based on supply plus total use. A negative "loss" is a positive number.
