Cotton: World Markets and Trade

U.S. Exports Off to Slow Start Towards 10.8 Million-Bale Forecast

As of the end of October, total U.S. export commitments (accumulated exports plus outstanding sales) for MY 2002/03 were 25 percent below commitments at the same time last year. Still, at only three months into the marketing year, there is time for U.S. exports to increase dramatically, and reason to expect a final export total near last year's 11-million bale estimate. World import demand is forecast at 29.9 million bales this year, up marginally from 29.6 million in MY 2001/02. The U.S. is expected to have an exportable supply of raw cotton in MY 2002/03 of 17.5 million bales, 1.0 million bales less than in 2001/02. At the same time, however, the foreign exportable supply is forecast to fall more than 6 million bales, due mainly to rapidly expanding consumption in China and poor weather in Australia.

There are several explanations for lagging U.S. export sales thus far. First, markets that are expected to finish the year as major importers, notably India and Turkey, are currently purchasing local crops at relatively low prices while available. Second, uncertainty about the quality of the U.S. crop has restricted export offers. Third, farmers could be expecting higher step 2 rates to be passed on in the form of higher farm-gate prices, and have therefore decided not to sell for the moment. Fourth, market premiums to producers in excess of the CCC loan rate, and step 2 payments to merchants and mills, have heretofore been minimal but are currently rising.

U.S. COTTON OUTLOOK

The MY 2002/03 U.S. production forecast was lowered 255,000 bales this month, as weather problems in the Southeast more than offset higher forecasts in other regions. The domestic use forecast is down 200,000 bales from last month as recovery in the textile sector stalls. The U.S. export forecast was reduced nearly 2 percent, primarily because export sales thus far in the marketing year have been slower than expected. These changes coupled with lower beginning stocks resulted in no change to the U.S. ending stocks forecast of 6.8 million.

MY 2001/02 U.S. ending stocks estimate was reconciled with the final Census Bureau data for ending stocks. Ending stocks were lowered 174,000 bales to 7,426,000 bales and loss was increased by 174,000 bales.

WORLD COTTON OUTLOOK

World totals for MY 2002/03 reflect slightly higher beginning stocks and lower production relative to last month. Forecast world production is decreased by 365,000 bales, as reductions in Pakistan (400,000 bales), the United States (255,000 bales), Uzbekistan and Greece (200,000 bales each), Turkmenistan (150,000 bales), Brazil and Cote d'Ivoire (100,000 bales each) and others more than offset a 1.0 million bale increase in China. Consumption is decreased 190,000 bales as decreases in the United States, Egypt, Indonesia, Uzbekistan and others more than offset a 500,000-bale increase in China. An increase in imports of 200,000 bales for Pakistan was more than offset when import forecasts were lowered 150,000 bales for both Indonesia and Turkey. Lower export forecasts for the United States, Greece, Turkmenistan, and Cote d'Ivoire were only partially offset by increases in Tajikistan and Australia. This month's world ending stocks forecast is up marginally.

The world total production estimate for MY 2001/02 is slightly higher this month, reflecting an upward revision for Brazil offset partially by a decrease in Tanzania. World consumption was lowered by 195,000 bales, primarily due to a decrease in Egypt. Trade was mostly unchanged and ending stocks were increased by 156,000 bales.

COTTON PRICES

The A-Index, a principal measure of international cotton prices, is an average of the five lowest quotes of cotton for delivery to Northern European ports. In October, the index averaged 49.56 cents per pound, up 0.53 cents from the previous month. Syria had the lowest average quote in September at 49.11 cents per pound. The Memphis quote averaged 51.60 cents per pound, up 2.80 cents from the previous month. In New York, the average daily settlement price of the nearby futures contract was 42.08 cents per pound in October, down

from 42.39 cents in September.

U.S. COTTON HIGHLIGHTS

COTTON CONSUMPTION: The seasonally adjusted daily rate of U.S. cotton consumption in September 2002 was 28,572 (480-lb.) bales, up from 28,274 in August. A total of 746,394 bales were consumed during the four weeks of September, compared with 594,533 during the four weeks of August. The seasonally adjusted annualized consumption rate for the month of September was 7.457 million bales, up from 7.380 million in August.

TEXTILE MILL REPORT: Domestic mills showed interest in higher white grades of 2001-crop. Demand was still light for 2002-crop. Ring-spun yarn saw light to moderate demand; open-end yarn saw moderate to good demand. There are concerns about the quality of the U.S. 2002 crop.

COTTON STOCKS: U.S. cotton stocks on hand in consuming establishments at the end of September were 519,248 bales (480-lb), up from 507,138 in August. Stocks held in public storage and compresses in September totaled 5.91 million bales, down from 6.02 million in August. Active spindles in September totaled 2.71 million, of which 1.58 million were dedicated to 100-percent cotton, compared with 3.3 million for the same time last year, with 1.91 million dedicated to 100-percent cotton. Cotton's share on the cotton spindle system in September was 81.4 percent.

U.S. COTTON EXPORTS in August 2002 totaled 649,560 (480-lb) bales, essentially unchanged from 650,167 bales in July 2002, according to the U.S. Bureau of the Census. Mexico, Indonesia and Turkey were the major destinations in August.

U.S. COTTON IMPORTS in August 2002 totaled 2,949 (480-lb) bales, up from 907 bales in July. Of that, 1,681 bales were imported from Australia, the rest from Egypt.

* Loss for countries outside the United States reflects cotton lost or destroyed while in the marketing channel. For the United States, loss reflects the difference between stocks as reported by the Bureau of the Census and implicit stocks based on supply plus total use. A negative "loss" is a positive number.

1/ Reflects only trade among the 12 countries of the former Soviet Union and three Baltic States.

2/ Reflects NIS trade with external trading partners.

3/ Estimate.

4/ Projection.

Notes:

A: Adding internal and external trade will provide a total trade figure.

B: Ending stocks may include any loss that has occurred.

C: The NIS includes: Armenia, Azerbaijan, Byelarus, Estonia, Georgia, Kazakstan, Kyrgyzstan, Latvia, Lithuania, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan.
