

Priority Site Listing

Instructions: Please be advised that the FY 2003 list will apply to assignments initially taken after October 1, 2002, but prior to September 30, 2003. If a loan repayment contract is not awarded in FY 2003, then you may request the LRP to carry your LRP application to round one of FY 2004 awards. Round one usually starts in February or March. If you carry your FY 2003 application over to that assignment in FY 2004 and you reported to that assignment in FY 2003, then you would retain your site priority listing from the priority list in effect at the time you took the assignment. In the event that your site receives a higher priority rank in FY 2004, you will receive the higher priority - your chances can only improve, not worsen. To read the priority site listing correctly be advised that the site listed first has the highest priority for Loan Repayment Awards. For Fiscal Year 2001 & 2002, 100% of all IHS LRP applicants received LRP awards. However, in the event that funds become limited, the site priority listing will be the means of which they will be awarded.

Methodology: Vacancies for '00 + '01 divided by Number of DDS for '00 + '01 at site.
 Sorted by Rating, then least number of dentists, then by most number of vacancies
