I am of the opinion that other alternative should be taken under advisement when it comes to considering possible corridors. Going through western Nevada would have adverse effects on the natural resources of the area including the Mojave Desert Tortoise, wild horses, burros and effect areas of critical habitat. Also the Mina corridor will go through much more populated areas which would have detrimental effects on the economies of the areas. There is also the possibility of a potential spill occurring which could have long lasting environmental and health impacts to the areas and the citizens of those areas. The No Action alternative needs to be considered to its fullest extent when it comes to putting in any rail corridor to carry hazardous and extremely hazardous waste.
