Comment Text :

-->I just found out about the public meeting this evening, too late to attend. I strongly oppose the proposed route through Northern Nevada of the nuclear waste destined for Yucca Mt.

The risk to the people - both children and adults - as well as our environment - animals, vegetation and beauty - from a possible accident - spill, leak, crash, mistake - are too great a price to pay.

Also, the residents of the west should not have to bury the nuclear waste of the eastern part of the US. If the east had to dispose of their own nuclear waste, they would think twice or 3 times about continuing to use nuclear power.

If you really want people to attend hearings, take out full page ads in the newspaper and don't schedule it right after a holiday weekend.
