Comment Text :  
-->I urge that the DOE consider the " No Action Alternative" because the Mina  
Corridor is dangerous. Further consideration would underscore that any route  
to Yucca Mountain repository is unsafe. Further, the Mina Corridor would  
affect many more people and natural resources than the previously considered  
Caliente route. Overall, the Mina Corridor poses a greater risk to Nevada's  
public health and environment.

Moreover, any move to redesign a facility that is scientifically uncertain and  
has no license to operate is premature and irresponsible.

Again I urge that the DOE must fully consider the "No Action Alternative" and  
immediately end all plans to build a nuclear waste repository at Yucca  
Mountain.
