

Renewable Energy and Tag Suppliers for Large Electricity Customers Of Portland General Electric and Pacific Power

Large customers of Portland General Electric and Pacific Power can use part of their public purpose charge to invest in conservation and renewable resources for their facility. Eligible renewable resource investments include renewable energy, tradable renewable certificates (green tags) and on-site generation. Following are suppliers that have contacted the Oregon Department of Energy about providing renewable energy or green tags through this program. Products must meet Department of Energy requirements (www.energy.state.or.us/sb1149/Business/self-direct.htm). More information on products is available from the suppliers.

Pacific Power
