

Senior Review (as of early September)

According to Steve Volz (NASA Headquarters person in charge of the review)

- Time: late March 2007
- Page limit: not yet established (not very different from Sr. Rev. 2005)
- Draft letter forthcoming in late September 2006
- Formal call for 'proposals' in November 2006
- Looking for 'GOOD' reasons to extend the mission (new research, new uses (possibly operational) of data,...)
- Looking for 'interconnections' with other space instruments
