

K-8 Educators: How can you teach about energy? Energy use at your school? Energy choices in your students' lives?

ENERGY AND SOCIETY Workshops

Energy and Society is an exciting new education kit from award-winning *Project Learning Tree*.

- Explore the relationship of forests, water and air to energy.
 - Investigate environmental issues related to energy use.
 - Participate in activities that build awareness, knowledge and critical thinking about energy.

Workshops are designed for YOU

- Workshop and materials FREE
 - Substitute reimbursement
 - PDUs for workshop participation
 - Scheduled planning time during the workshop
- Materials include:
- Activities correlated to State standards
 - Energy background for educators and students
 - Activity guide, posters, video, music CD, and glossary
 - Ideas for action projects and science fair projects
- Energy-related case studies, literature list and other resources

Project Learning Tree 

Energy and Society and Project Learning Tree workshops are combined in a 7-hour format. Visit <http://www.cof.orst.edu/cof/extended/ofep> or call 1-800-554-6987 to request a workshop at your school or to find out where workshops are scheduled. For opportunities less than 7 hours, contact the number above.
