## Brazil Soybean Crush Declines as Soybean Exports Continue to Strengthen

Brazil's 2005/06 soybean crush was reduced 1.3 MMT this month to 28.3 MMT. Soybean crush in Brazil is forecast to continue to decline as domestic prices in Reals remain weak, soybean production forecast decline, and monthly exports reach record levels.

Reports from Brazil indicate soybean and product prices in Reals have declined dramatically over the last few years due to exchange rate fluctuations. This large decline in prices has reduced crush margins significantly causing a number of crushing plants to close temporarily. In addition to the crushing industry's financial difficulties, Brazilian soybean farmers are also feeling pressured by the appreciating real and have recently barricaded roads to port and crush facilities with their equipment to highlight their financial problems. It is unclear what affect the low domestic prices and barricading will have on Brazil's available supplies of soybeans for export and crush, but so far exports continue at a record pace.

Brazil's soybean exports have been record high each month year-to-date (October-April) to reach 11.1 MMT, up 4 MMT from the same period last year. These strong monthly exports are forecast to continue, and allow Brazil to export a record 26 MMT as global soybean demand remains strong. Given the current production and export forecasts, Brazil's soybean stocks in October 2006 are forecast to decline 200,000 MT from 2004/05 levels to 16.7 MMT.

Foreign Agricultural Service  
Cotton, Oilseeds, Tobacco and Seeds Division

## Notes on World Supply/Demand Tables

1) Trade, crush, consumption, and stocks data are aggregated using individual marketing years with the exception of Argentina and Brazil. These two countries are converted to an October-September basis. Marketing years for countries in the Northern Hemisphere begin in the first year shown. Those in the Southern Hemisphere begin in the second year.

2) World imports and exports will not balance. This is due to differences in marketing years and time lags between exportation and importation.

3) Stocks data are not estimated for all countries.

4) Price averages are dollars per bushel for soybeans, dollars per short ton for soybean meal and cents per pound for soybean oil.

Regional area and county designations in the soybean, soybean meal, and soybean oil supply, distribution, and trade tables are as follows:

### Africa, North

Algeria  
Egypt  
Libya  
Morocco  
Tunisia

### Africa, Other

Angola  
Burkina (Upper Volta)  
Ethiopia  
Ivory Coast  
Kenya  
Malagasy Republic  
Mauritius  
Nigeria  
Senegal  
Somalia  
South Africa

1/Totals are based on an October-September basis.

2/ Utilization includes exports of further processed products and refining losses and therefore is higher than the actual level.

3/ Quarterly export data may not add to year total because quarterly import data is not available.

4/ Preliminary

5/ Forecast

6/ Net exports: excluding palm and fatty acid distillates.
