## Technological Responses to Protect Consumers

### TrustyFiles High Performance File Sharing Software from RazorPop

RazorPop

Free Download

Why TrustyFiles

## Risk: Privacy and Security

- **Security Commitment**
  - RazorPop is a member of the DCIA Consumer Disclosures Working Group
- **Choose your Level of Privacy**
  - In Private File Sharing Mode users are not connected to the P2P networks and share only direct with known users.
- **Shared Folders**
  - Users only automatically share public files downloaded from the P2P networks. User can manually add additional folders to share.

# Shared Folders

**Options**

Main Network Downloads and Sharing Blocklist Style

Downloads

All complete and incomplete download files and folders under them are shared

Directory: C:\Program Files\TrustyFiles\Downloads Change Files: 543

Maximum active downloads: 30

Other Shared Files

| Directory                                       | Files |
|---|-------|
| C:\Program Files\TrustyFiles\Downloads, Folders | 543   |
| G:\Video, Folders                               | 565   |

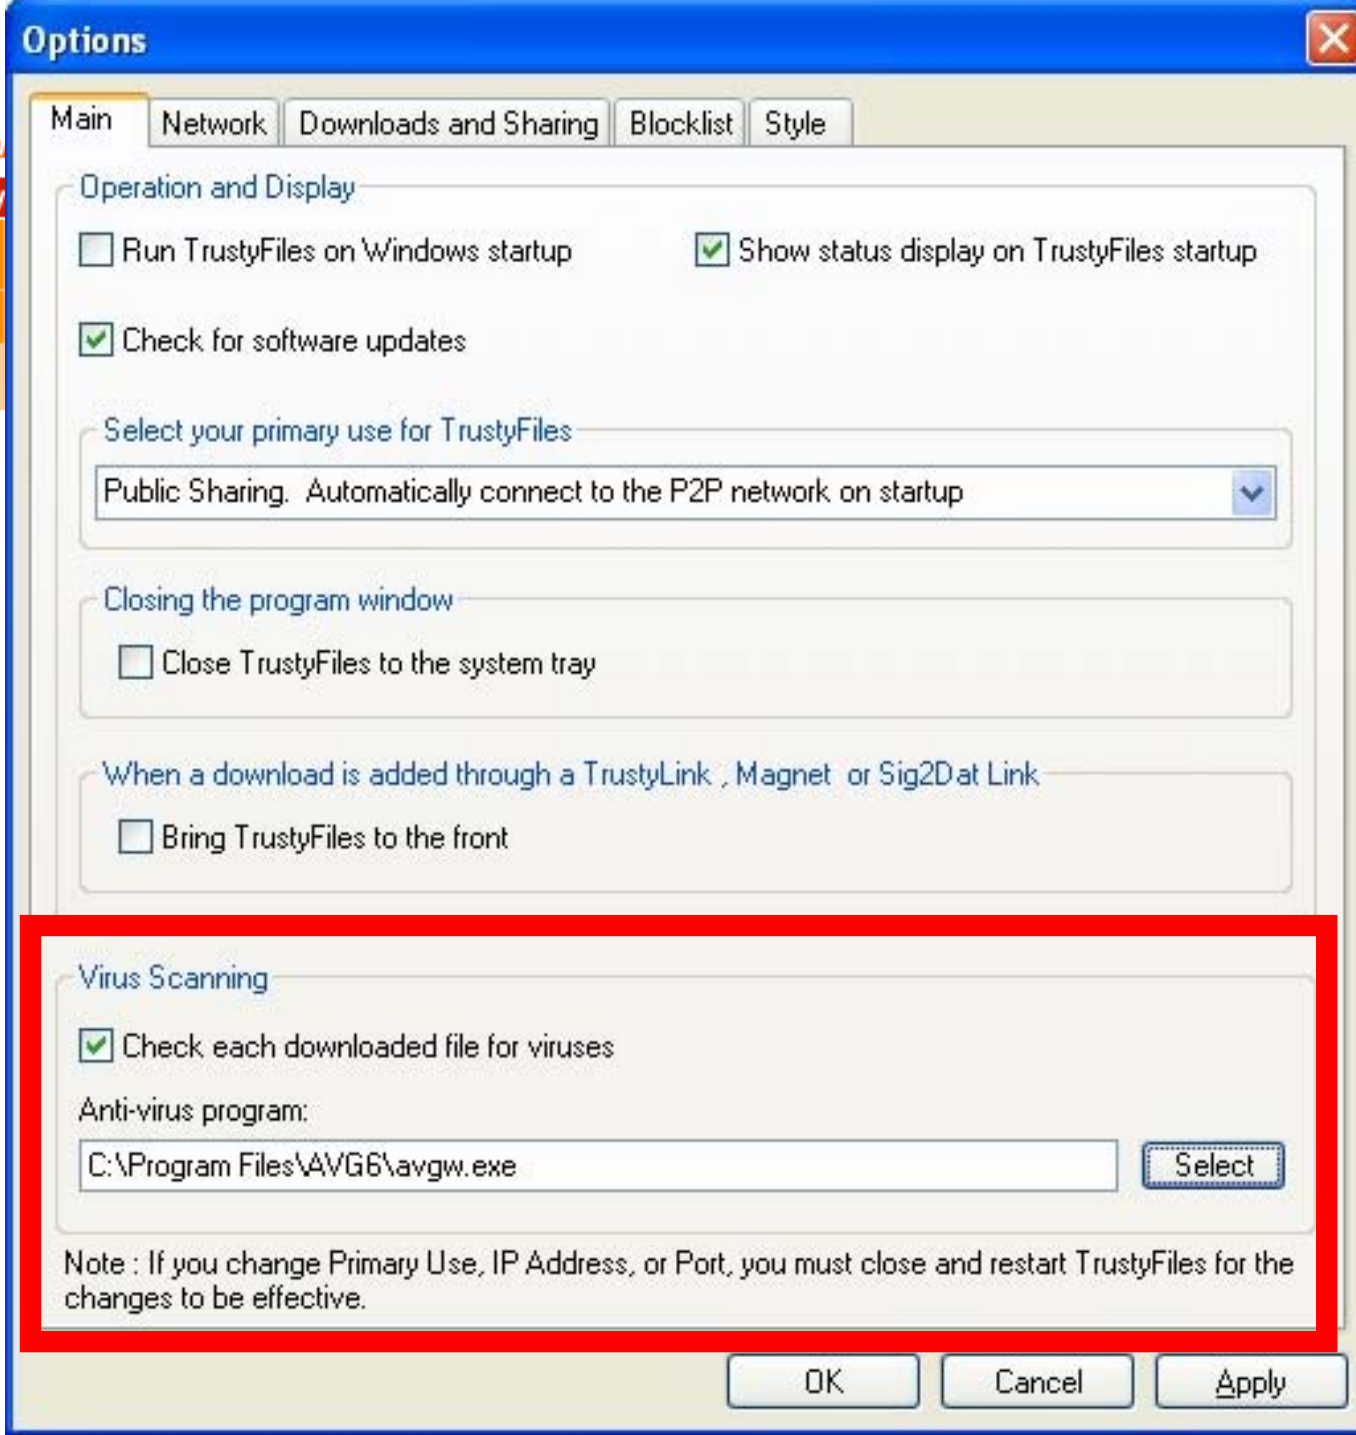

Add  Share contained folders Remove

Maximum concurrent uploads: 3

OK Cancel Apply

# Risks: Viruses

TrustyFiles uses the user's current anti-virus program to scan downloaded files.

## Risks: Invasive Users

- Invasive users are known to provide or support bogus, illegal, and harmful files to the P2P networks.
- TrustyFiles provides a Blocklist that blocks P2P communications to protect consumers from invasive users
- Blocklists are compiled by independent volunteers and are distributed on the Internet.

## Why TrustyFiles

# Risk: Child Pornography

RazorPop is a member of the P2P Patrol, which develops education, deterrence, & reporting programs to defeat child pornography.

**Warning**

The search term you entered has been associated with child pornography. Any person who receives, reproduces, or redistributes a visual depiction of a minor engaged in sexually explicit conduct shall be subject to severe fines and imprisonment.

This software does not and cannot directly transmit your search terms to our server or any other server. However the search terms along with your computer Internet address are distributed to the P2P network as part of the normal P2P search process
