Consulting firm for project:

Phone number:

E-mail:

Generally describe the project.

Nominating criteria: Nominations are limited to five pages of text answering the following points and five pages of other supporting information such as photos and maps.

1. Provide information to verify that the project meets or exceeds all permit conditions.
2. a.) Describe how the project has improved wetland functions (such as water quality improvement, habitat improvement, etc.). Also include information about rare species benefits or any off-site function benefits from the project.

b.) Provide information to demonstrate how the improved functions have produced natural resource benefits and have increased economic and/or amenity values to the landowner, watershed, economy or community.
3. Describe innovative concepts or describe creative use of materials.
4. Include information about community involvement or partnerships for the project. Provide information that demonstrates sustainable stewardship of natural resources over the long term.
5. Indicate how the project avoided or minimized impact to wetland areas.

Attach any maps, photos or other documents that will help illustrate the conditions or qualities mentioned above.

Applications due February 15, 2008. Send to:
