

**Appendix 1: Cumulative incidence of developing a second cancer and cumulative probability of death due to competing causes, by site of initial cancer, SEER 1973–2000.**

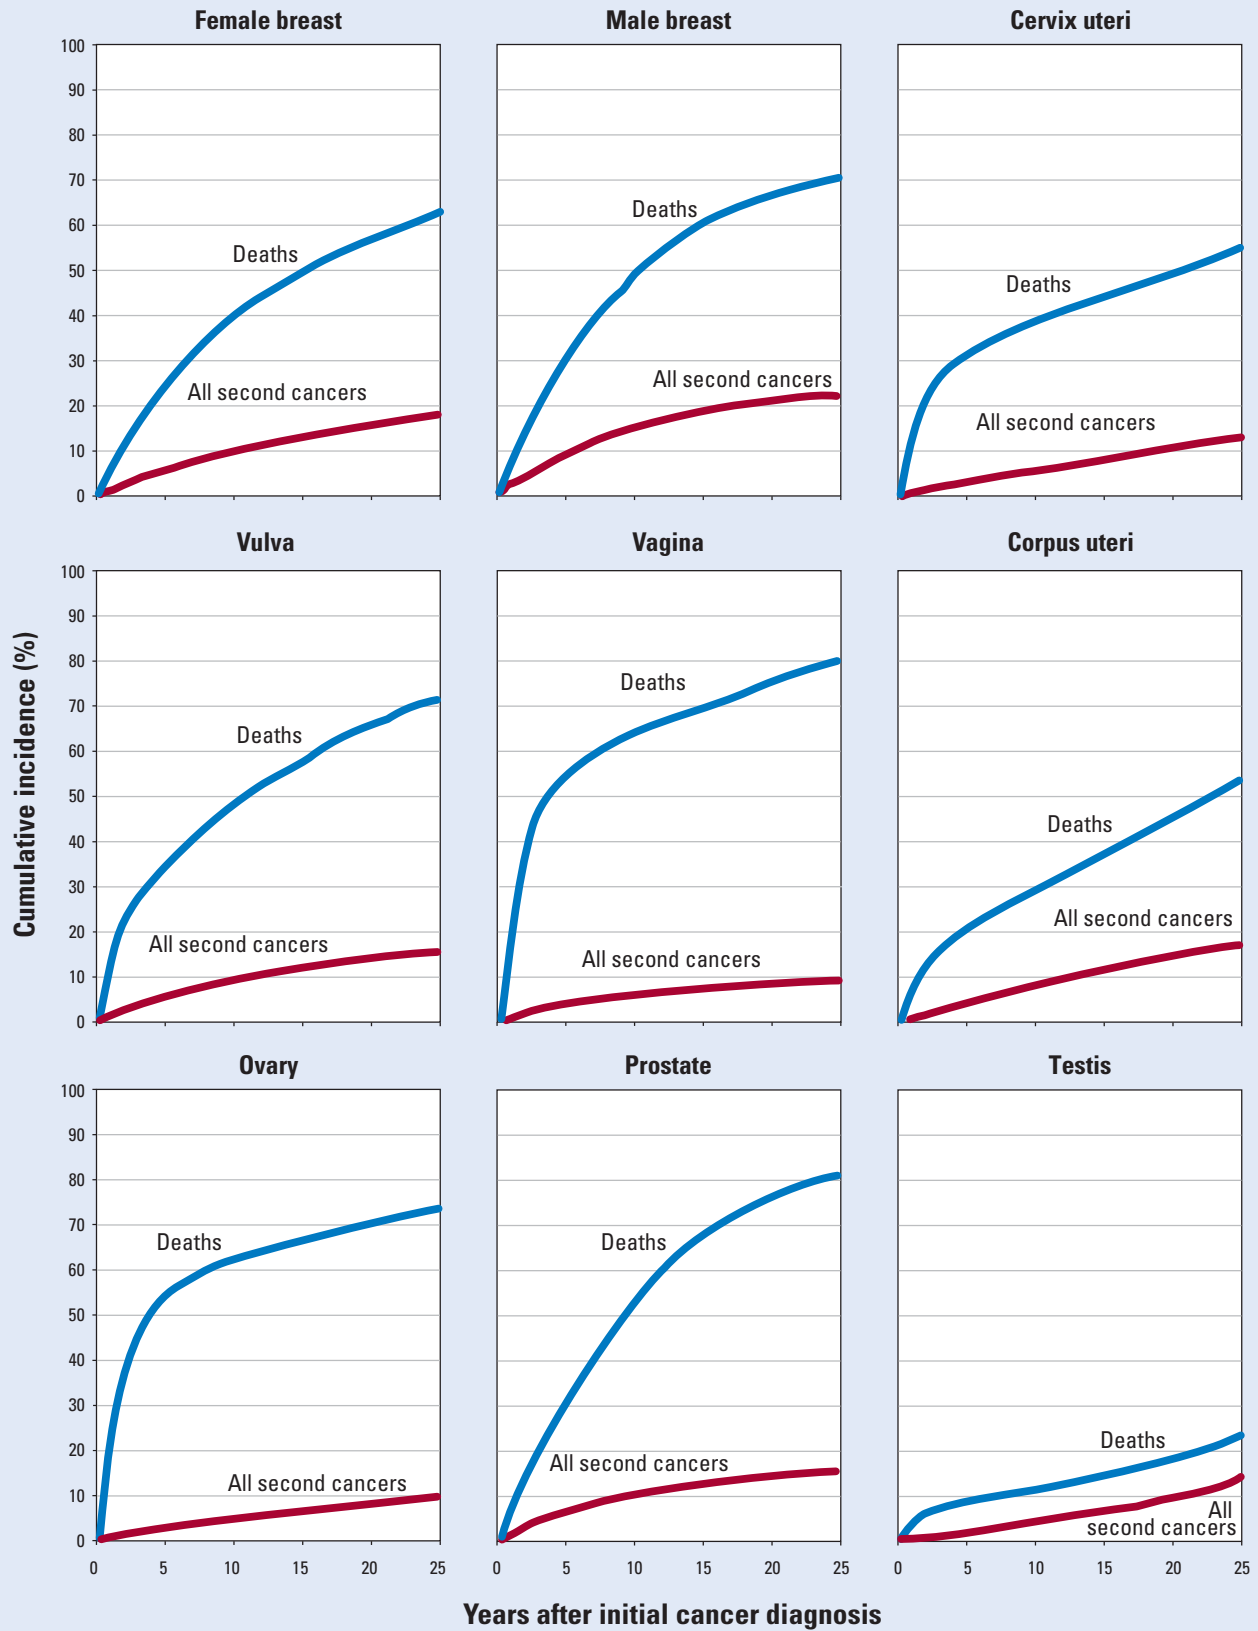

Notes: See Appendices for definitions of cancer sites. The competing cause of death is based on all deaths excluding deaths among patients with a second cancer.

**Appendix 1: Cumulative incidence of developing a second cancer and cumulative probability of death due to competing causes, by site of initial cancer, SEER 1973–2000.**

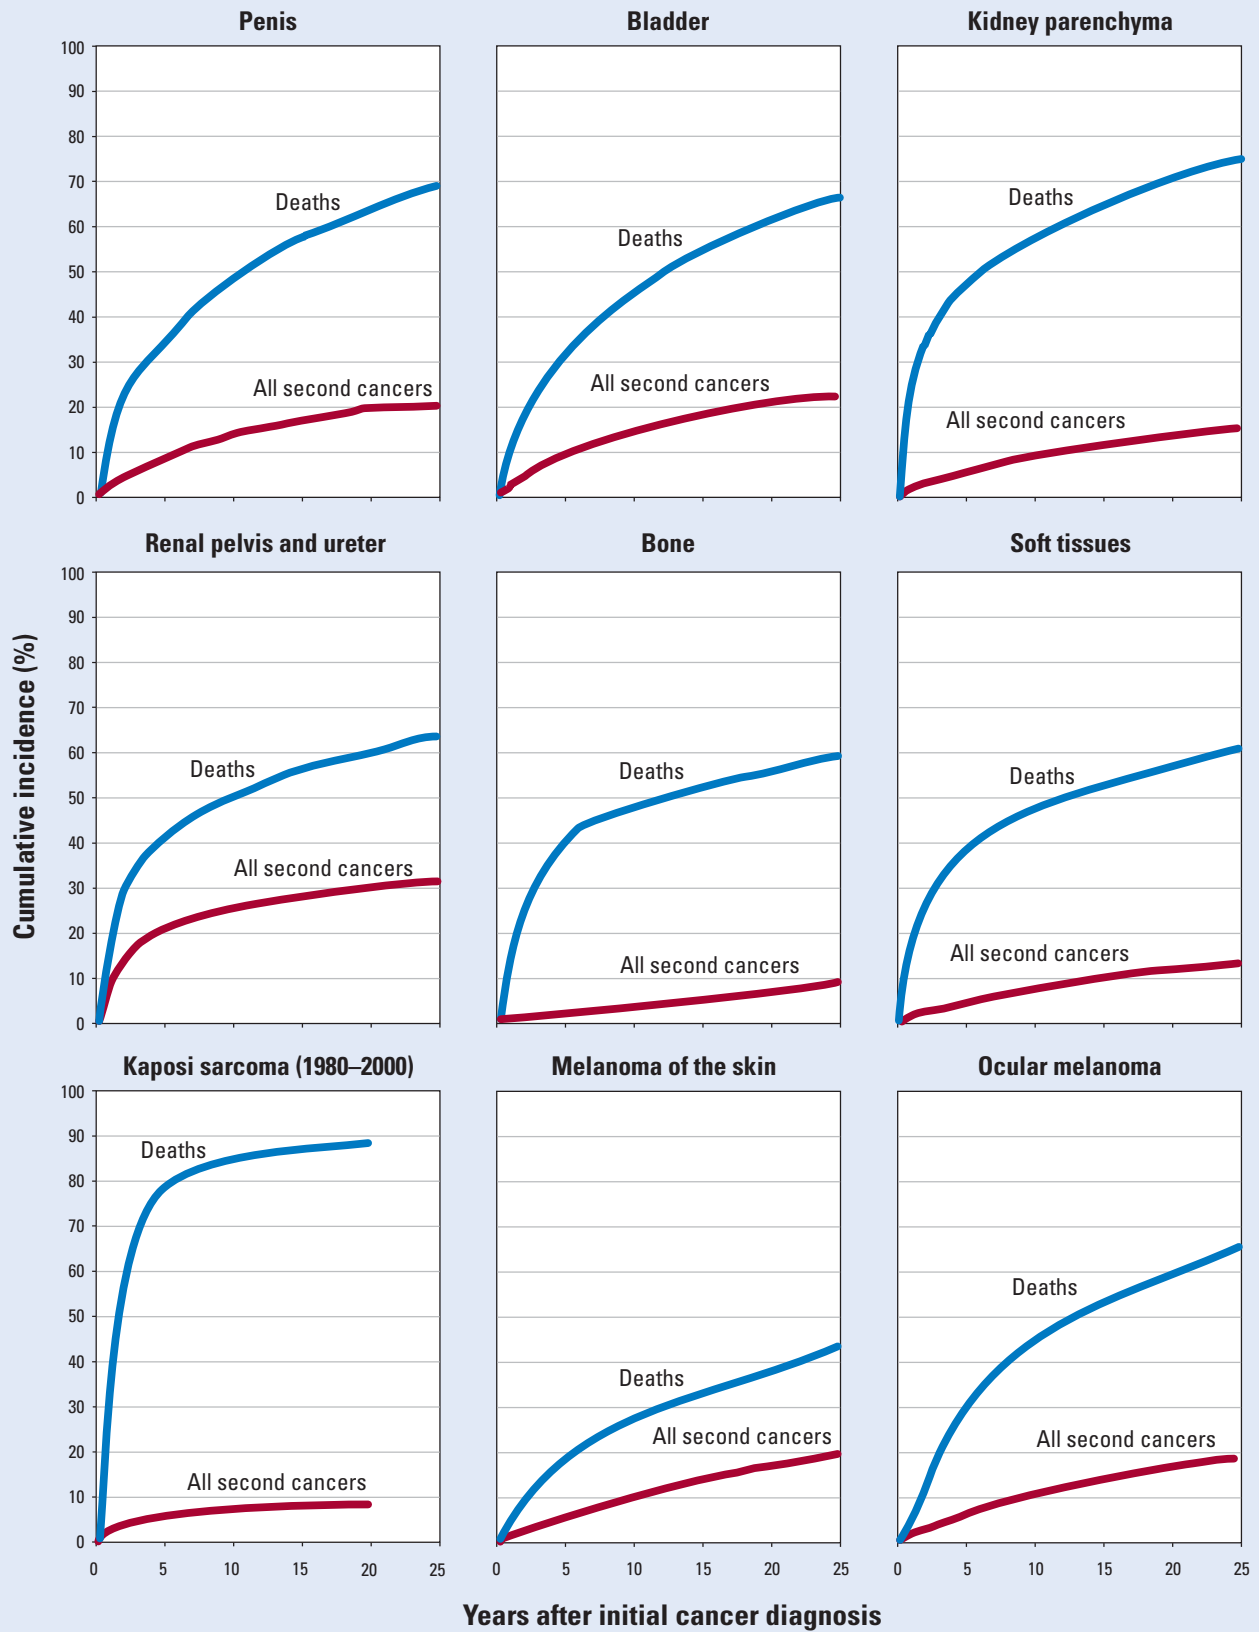

Notes: See Appendices for definitions of cancer sites. The competing cause of death is based on all deaths excluding deaths among patients with a second cancer.
