

Grain: World Markets and Trade

Black Sea Region Grain Exports Rebound

Total Grain Production

Grain Exports

Note: Black Sea Region includes Russia, Ukraine, Bulgaria, Croatia, Romania, and Serbia-Montenegro.

Greater grain supply in the Black Sea region is boosting exports and creating stronger competition in key world import markets. For wheat, exports are expected to more than triple from last year's very low level. Russian exports, for instance, have surged in recent months and sales have been made to new Asian markets such as Pakistan and Indonesia.

As Barley production reaches a near record, exports are also forecast to surge by almost 2 million tons (50 percent), much of which will go to Middle Eastern and North African markets. This cheap barley has made the EU uncompetitive so far, perhaps contributing to the Commission's recent reinstatement of export subsidies. Those subsidized exports will likely displace Australia and Canada, whereas Black Sea barley still has a comparative freight advantage into the Middle East.

Corn exports will also see a boost, primarily from Serbia and Romania, where the largest crop in 7 years will lead to its highest exports in 2 decades. Ukraine is also expected to have a strong export campaign again this year.

WORLD MARKETS AND TRADE: COMMENTARY AND CURRENT DATA

WHEAT: WORLD MARKETS AND TRADE

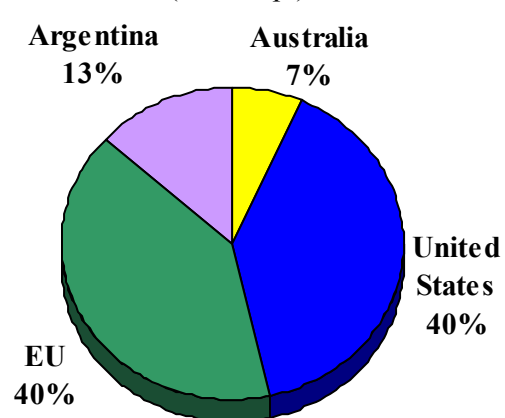

MONTHLY HIGHLIGHTS:

Egypt Diversifies Wheat Purchases: U.S. export commitments (sales and shipments) to Egypt are down by more than a million tons so far this year, as Egypt's state grain purchasing agency (GASC) has turned increasingly to U.S. competitors. Whereas last year, short crops in the European Union made prices largely uncompetitive, this year's record crop has now pushed down prices, boosting sales. Argentina has also emerged as a supplier, with sales to Egypt already at the highest level in 7 years. The combination of unusually large supply this late in the marketing year and reduced Brazilian import demand has depressed Argentine prices and made its offers at tenders very competitive. Although GASC has not yet purchased from Black Sea region countries, private mills have stepped up buying from this area and GASC has even listed Russia as an acceptable origin on its recent tenders.

03/04 GASC Purchases
(June-Sept)

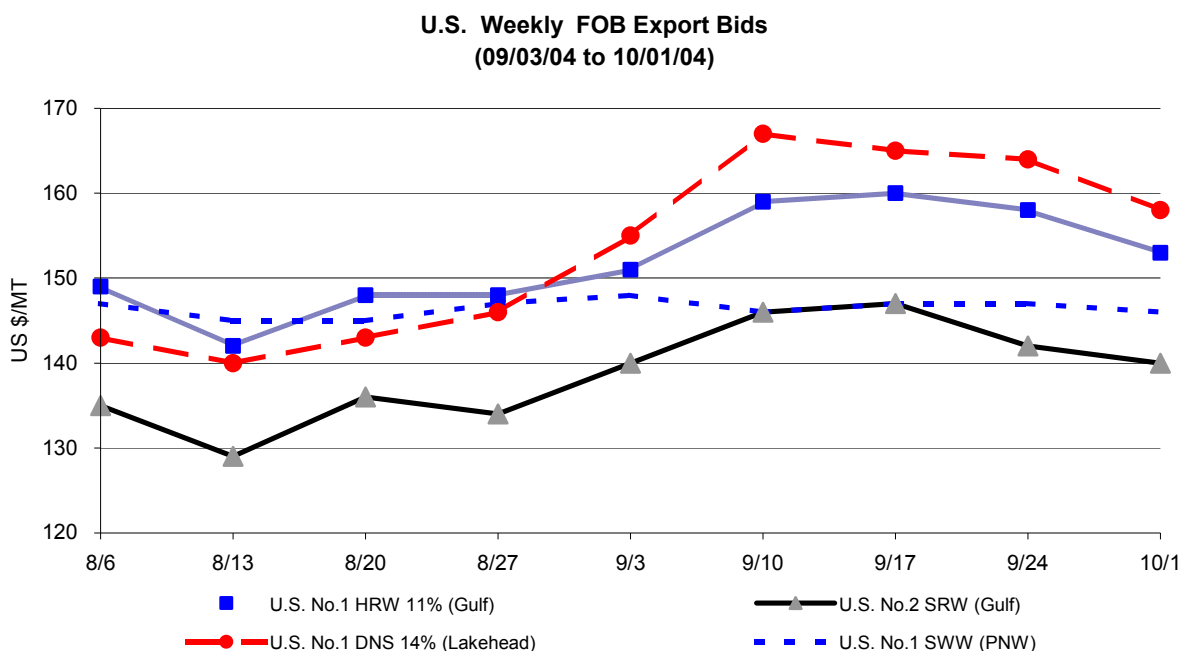

04/05 GASC Purchases
(June-Sept)

PRICES:

Domestic: A cool and wet spring wheat harvest during the beginning of September sent prices for most classes higher on rising concerns of crop quality and limited supplies of higher protein wheat. News of harvest and quality problems with Canada's crop and a strong basis helped higher protein wheat retain earlier gains for most of September. However, decreasing Black Sea prices and speculation of larger Canadian feed wheat supplies put downward pressure on lower quality wheats, forcing them back to early September levels. As September came to a close, prices receded on larger USDA crop and stocks estimates.

For the week ending October 1, average HRW prices were \$2 a ton higher than, and SRW prices were equal to, the first week of September. HRS prices gained \$3 a ton while SWW ended the month with a loss of \$2 a ton.

TRADE CHANGES IN 2004/2005

Selected Exporters

- **Canada** down 500,000 tons to 15.5 million as deteriorating crop quality reduces supplies of milling quality wheat for export.
- **United States** up 500,000 tons to 26.0 with strong sales and reduced competition from Canadian spring wheat.

-
- **Syria** down 1.0 million tons to 1.0 million as low prices have limited the attractiveness of exporting wheat, and nearby markets have been slow to buy.
 - **EU-25** up 1.0 million tons to 16.0 million. Production is nearly 10 million tons above the previous record, and sales have been strong even without export restitutions.

Selected Importers

- **Brazil** down 500,000 tons to 5.0 million, the smallest amount in 14 years, as another bumper crop reduces import needs.
- **South Korea** up 200,000 tons to 4.0 million with more wheat imports for feeding expected this year from Canada and the Black Sea region.
- **Iran** down 300,000 tons to 200,000. Rising production in recent years has helped Iran approach self-sufficiency.

TRADE CHANGES IN 2003/2004

Selected Exporters

- **EU-25** up 700,000 tons to 11.0 million, with year end trade data for key member states.

Selected Importers

- **Algeria** up 300,000 tons to 3.9 million due to larger than anticipated late season imports. A similar change was made to the 04/05 estimate.
- **Bangladesh** up 300,000 tons to 1.8 million due to late season trade data. A similar change was made to the 04/05 estimate.

NOTES: Regional definitions appear on last page of this circular. Imports are reported on an international year basis. All other data are reported using marketing years.

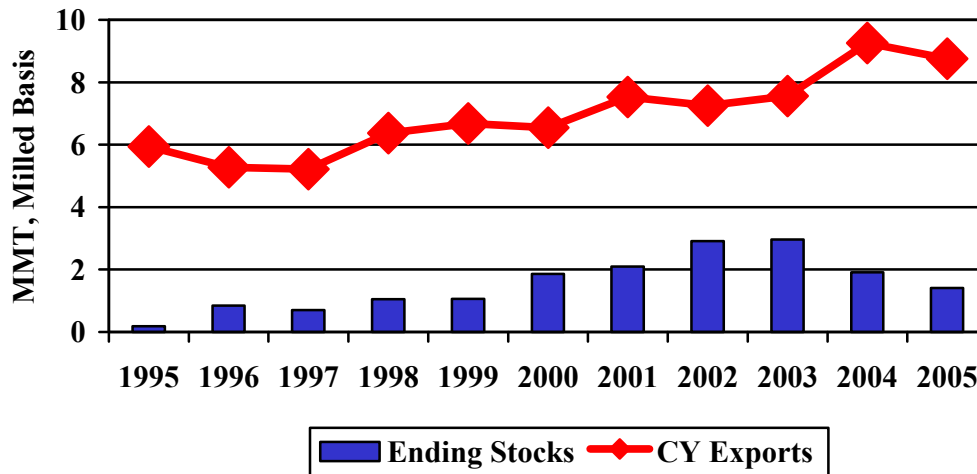

RICE: WORLD MARKETS AND TRADE

MONTHLY HIGHLIGHTS:

Where have all the major markets gone? Part Two: With rising consumption outpacing production growth in Nigeria, imports climbed throughout the late 1990s and peaked at a record 1.0 million tons in 2001. Since then, consumption has slowed against record production, thereby shrinking the need for imports. The government has announced plans to further reduce Nigeria's dependence on imports in the future.

Record exports expected from Thailand: In a market with lackluster demand from the traditional key importers, Thailand is expected to export a record 9.25 million tons in CY (Calendar Year) 2004. With diminished exportable supplies in China and India and government-managed exports in Vietnam, Thailand has been able to pick up markets normally supplied by its main competitors. The major gains have been seen in Africa and the Middle East for both regular and parboiled rice. With this, Thailand is forecast to exceed its previous record export level--achieved in CY 2003--by nearly 20 percent. Outstanding export performance, reduced supplies from other major players, and relatively little demand from the key importers have kept prices from rising.

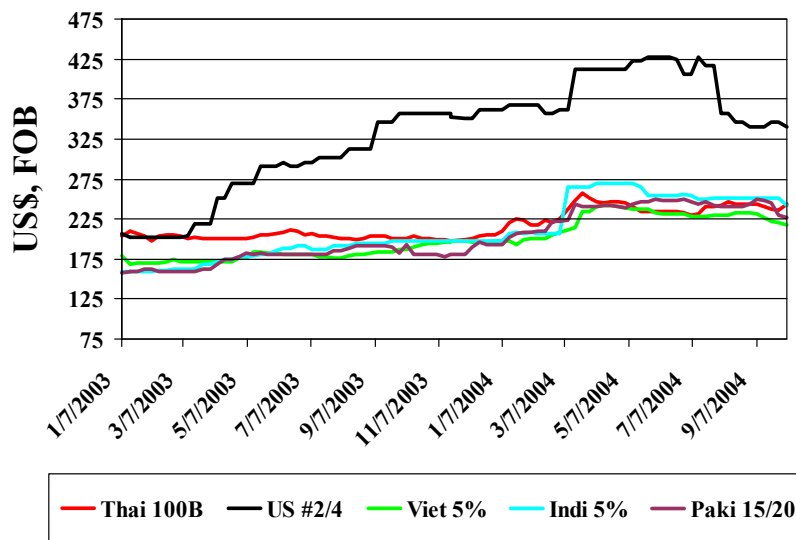

Thailand--Exports, and Ending Stocks

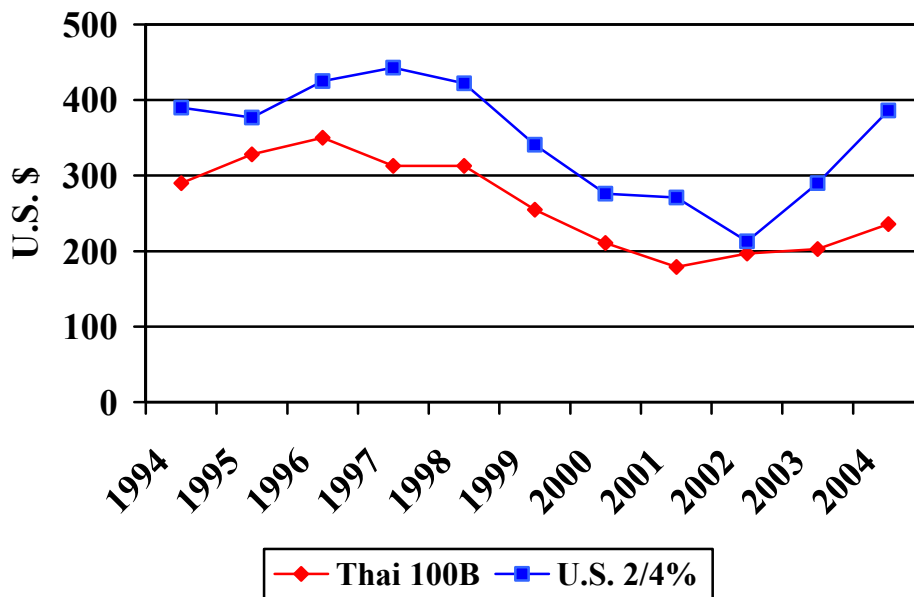

PRICES:

International: Asian prices are currently moving in opposite directions. Thai 100B prices, after dropping for most of the month of September, have ticked back up with quotes currently at \$243 per ton, FOB, down \$1 from last month. Higher government intervention prices, which are above market prices, are providing some support. Prices in Vietnam, however, have trended downward, dropping \$13 from last month. Viet 5% is currently quoted at \$218 per ton, FOB. Prices have dropped in an effort to attract business after the raising of the export target by the government. Indian 5% is currently quoted at \$242 per ton, FOB, down \$10 from last month.

Nominal Price Quotes

Average CY Thai and U.S. Quotes

Domestic: U.S. #2/4 long grain milled rice is currently quoted at \$340 per ton, FOB, flat from last month despite a record crop forecast. Thus, the spread between U.S. and Thai prices continues to hover around \$100 per ton. Prices for U.S. #1/4 medium grain milled rice from California are not being quoted as the harvest is in its early stages.

TRADE CHANGES IN 2005

Selected Exporters

- **Australia** is cut 50,000 tons to 300,000 based on smaller production, which is expected to limit the recovery of exports.
- **Thailand** is up 250,000 tons to 8.75 million, as it is likely to maintain the markets gained from China and India in 2004.
- **United States** down 50,000 tons to 3.35 million, due to the slower than expected sales pace and a lack of substantial import demand from traditional markets in the Western Hemisphere.

Selected Importers

- **Brazil** is boosted 200,000 tons to 700,000 with a downward revision in production expected to increase import demand.
- **Peru** is reduced 30,000 tons to 70,000 based on expectations of a slower import pace, continuing from 2004.
- **Turkey** is cut 50,000 tons to 250,000 based on a bumper crop and a continuation of restrictive import policies.

TRADE CHANGES IN 2004

Selected Exporters

- **Australia** is revised down 25,000 tons to 275,000 based on a slower than expected pace to date.
- **Thailand** boosted 250,000 tons to a record 9.25 million as a result of strong exports and shipments continuing through the end of the year.
- With the relaxing of the government export restrictions, **Vietnam** is raised 100,000 tons to 3.85 million.

Selected Importers

- Despite a bumper crop, **Brazil** is increased 200,000 tons to 700,000 based on heavy shipments from Uruguay and Argentina.
- **Dominican Republic** is cut 25,000 tons to 125,000—still a record—based on pace to date.
- **Malaysia** is up 50,000 tons to 700,000 based on heavy imports from Thailand and Vietnam.
- **Peru** is cut 70,000 tons to 80,000 as shipments from Uruguay have been weaker than previously anticipated.
- **Philippines** is raised 100,000 tons to 1.1 million to account for stepped-up purchases from the United States and Vietnam.
- **Saudi Arabia** is up 100,000 tons to 1.3 million as a result of heavy parboiled shipments from India.

Note: Series revisions have been made to select African countries, including Angola, Benin, Guinea-Bissau, Madagascar, Mauritania, Mozambique and Togo.

All other data are reported using marketing years.

COARSE GRAINS: WORLD MARKETS AND TRADE

MONTHLY HIGHLIGHTS:

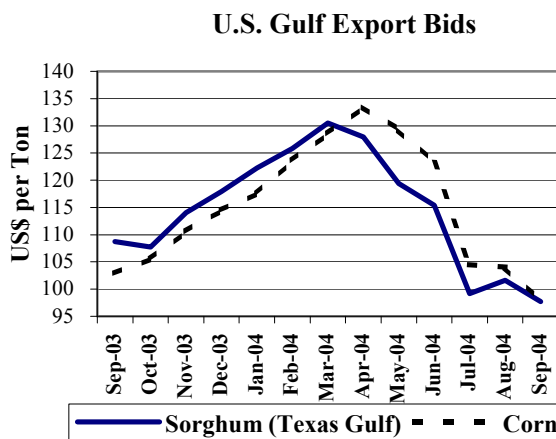

Corn—Squeezed by Feed Quality Wheat? As the record U.S. corn crop gets larger every month, so too does the world's supply of feed quality wheat. Canada's deteriorating wheat crop means that more wheat will be pushed into domestic feed, displacing demand for U.S. corn. Furthermore, while Canada's total wheat exports are expected to decline, there will be more feed quality wheat exported to South Korea, where it will likely replace U.S. corn. As a result, total U.S. corn exports are reduced by 500,000 tons to 52.5 million this month.

EU Barley—A Former Heavyweight Back In the Ring After more than a year without export subsidies, the EU Commission decided last week to reinstate targeted subsidies on October 14 for 1 million tons to the Middle East and North Africa regions. The timing of the newly announced export regulation could be an attempt to bolster domestic prices and thereby forestall large-scale sales into intervention stocks when they open November first. Although the level of subsidy remains to be seen, subsidized exports could mean heightened competition in these regions. Australia and Canada are both likely to lose some market share there, leaving Ukraine, Russia, and the EU as the main competitors.

PRICES:

Domestic: September export bids for #2 yellow corn averaged nearly \$98/MT, down \$6 from August. Prices continue to fall because of harvest time pressure and prospects for a massive crop.

September export bids for #2 yellow sorghum (Texas Gulf) averaged nearly \$98/MT, down nearly \$4 from August and \$11 below year-ago prices. Sorghum is about even with corn at this time in contrast to a \$6 premium last September. Average monthly corn export bids have dropped \$25 per ton since June but only \$18 for sorghum.

TRADE CHANGES IN 2004/2005

Selected Exporters

- **United States corn** down 500,000 tons to 52.5 million because of the slow pace of export sales to date and increased competition from feed-quality wheat.
- **Romania corn** up 200,000 tons to 1.0 million. The largest crop in 7 years is expected to lead to the highest exports in 21 years.
- **Australia barley** down 300,000 to 4.0 million because of increased domestic consumption and looming competition from the EU-25.
- **Canada barley** down 200,000 tons to 1.7 million as harvest delays raise questions about availability and quality.
- **EU-25 barley** up 500,000 tons to 2.3 million because of huge supplies and the Commission's reinstatement of export subsidies.

Selected Importers

- **Canada corn** down 200,000 tons to 2.3 million because of abundant supplies of feed quality wheat.
- **South Korea corn** down 200,000 tons to 8.9 million as feed quality wheat is priced competitively.
- **Malaysia corn** down 400,000 tons to 2.0 million, the lowest in 11 years, because of poultry production impacted by avian flu.
- **South Africa corn** down 200,000 tons to 300,000 as domestic supplies are ample.
- **Venezuela corn** up 150,000 tons to 800,000 tons as consumption continues to rebound.

TRADE CHANGES IN 2003/2004

Selected Exporters

- **Australia sorghum** is up 50,000 tons to 350,000 based on recent strong shipments to Japan.
- **China corn** down 300,000 tons to 7.7 million, the lowest in 4 years, because of a slowdown in shipments and uncompetitive prices without subsidies.

-
- **Canada oats** down 250,000 tons to 950,000 as severe harvesting delays have resulted in exports during the final months of the trade year being far below normal.

Selected Importers

- **South Korea corn** down 200,000 tons to 9.3 million because of slower than expected shipments.
- An increase in late-season shipments raises **Mexico sorghum** by 100,000 tons to 3.0 million.
- **United States oats** down 200,000 tons to 1.3 million, with minimal imports from Canada in recent months due to harvesting delays.

Notes:

Trade year statistics are on a July/June year for wheat and an Oct/Sep year for coarse grains.

The Coarse Grains category includes barley, corn, millet, oats, rye, and sorghum.

Production estimates are on a clean-weight basis.

Notes:

Wheat trade year statistics are on July/June years. Barley, corn, sorghum, rye, and oats trade year statistics are on Oct/Sept years. Rice statistics are rough basis; trade year statistics are for subsequent calendar year. Rounding errors in conversion from international units cause some discrepancies with World Board Supply and Demand Estimates.

Notes:

Coarse grains trade data are on July/June years through 1975/76. From 1976/77 to the present, coarse grains data are on an Oct/Sept trade year. "Stocks as a Percent of Consumption" represents the ratio of marketing year ending stocks to total consumption.

Notes:

Stocks, exports, and consumption are expressed on a milled basis in marketing years. Trade is on a milled basis in calendar years. "Stocks as a Percent of Consumption" represents the ratio of marketing year ending stocks to total consumption.

ENDNOTES TO GRAIN: WORLD MARKETS AND TRADE

REGIONAL TABLES

North America: Canada, Mexico, the United States.

Latin America: Central America, the Caribbean, South America.

EU: Austria, Belgium/Luxembourg, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Malta, Netherlands, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, United Kingdom.

Former Soviet Union: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan.

Other Europe: Albania, Azores, Bosnia and Herzegovina, Bulgaria, Croatia, Gibraltar, Iceland, Macedonia, Norway, Romania, Serbia and Montenegro, Switzerland, Yugoslavia.

Middle East: Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, Yemen.

North Africa: Algeria, Egypt, Libya, Morocco, Tunisia.

Other Africa: all African countries except North Africa.

South Asia: Afghanistan, Bangladesh, Bhutan, India, Nepal, Pakistan, Sri Lanka, Maldives.

Southeast Asia: Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Vietnam.

East Asia: China, Hong Kong, Japan, South Korea, North Korea, Macau, Mongolia, Taiwan.

Oceania: Australia, Fiji, New Zealand, Papua New Guinea.

OTHER NOTES

Stocks: Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in marketing year imports and marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

EU Consolidation: The trade figures for the EU-25 for the years 1999/00 through 2002/03 are inflated by the two-way trade between the two groups (EU-15 and acceding 10). Over the past 6 years, this “intra-trade” has averaged about 700,000 tons for wheat, 350,000 tons each for corn and barley, and 150,000 tons for rye. The trade figures also include intra-trade between members of the acceding 10. From 2003/04 onward, all intra-trade has been removed.

Statistics: (1) Wheat trade statistics include wheat, flour, and selected products on a grain equivalent basis. (2) Rice trade statistics include rough, brown, milled, and broken on a milled equivalent basis. (3) Coarse grains statistics include corn, barley, sorghum, oats, rye, millet, and mixed grains but exclude trade in barley malt, millet, and mixed grains.

Unaccounted: This term includes grain in transit, reporting discrepancies in some countries, and trade to countries outside the USDA database.

The Grain and Feed Division, Commodity and Marketing Programs, Foreign Agricultural Service, USDA, Washington DC 20250, prepared this circular. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attachés and Foreign Service officers, results of office research, and related information. Further information may be obtained by writing the division or telephoning (202) 720-6219.

Note: The previous report in this series was the Grain: World Markets and Trade Foreign Agricultural Service Circular FG 09-04 September 2004. For further details on world grain production, see World Agricultural Production Foreign Agricultural Service Circular WAP 10-04 October 2004.

This circular is available in its entirety on the World Wide Web via the Foreign Agricultural Service Home Page. The address is: <http://www.fas.usda.gov>
