

Grain: World Markets and Trade

Brazilian Grain Exports Drop

Grain Exports Fall
(Oct/Sep)

Corn Use Outpaces Production

After reaching record levels last year, Brazil's grain exports are now expected to drop to the lowest level in 5 years. Corn exports, which had surged because of expanded production, are now dwindling due to a drought-affected crop and expanding domestic demand. Shrinking supplies and high prices have made Brazilian corn uncompetitive in the world market. The rapid growth in domestic demand, led by the poultry and pork sectors, has outstripped production this year and will even necessitate significant corn imports. Brazil's history as a net corn exporter may be coming to an end if production fails to keep pace with demand growth.

Wheat exports have disappeared this year because prices are once again uncompetitive in Mediterranean markets, especially against larger supplies of low and medium quality wheat from the Black Sea region. Sorghum exports of nearly 400,000 tons last year were likely a one-shot deal because of a return to normal, smaller demand from the EU-25. Transportation costs from Brazil relative to commodity value make significant wheat and sorghum exports unlikely in most years.

WORLD MARKETS AND TRADE: COMMENTARY AND CURRENT DATA

WHEAT: WORLD MARKETS AND TRADE

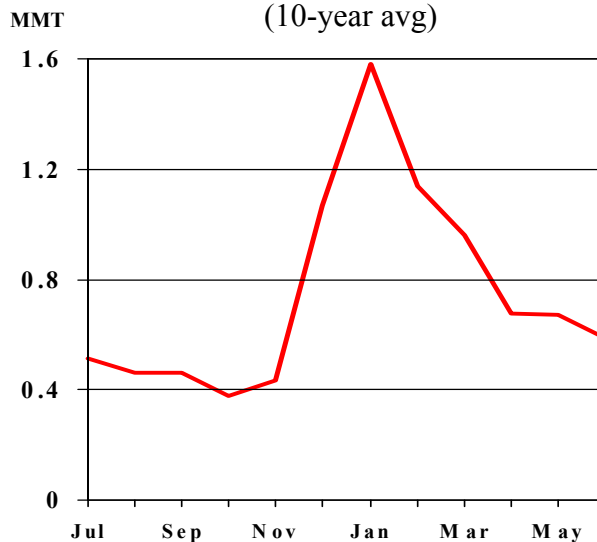

MONTHLY HIGHLIGHTS:

Argentine Exports Jump to Record: With very large sales and shipments in recent months, Argentine exports in 2004/05 are expected to climb to a record. Shipments, however, are very seasonal due to the need to free up storage and transportation space before soybean and corn harvests. As a result, much of the available exportable surplus was sold quickly after the harvest in November and December, and prices have now climbed. Other than continued sales to Brazil, it is unlikely that much wheat will be available for sale to other markets for the next 7 months until the new harvest approaches.

Argentine Exports Climb

**Shipments Are Highly Seasonal
(10-year avg)**

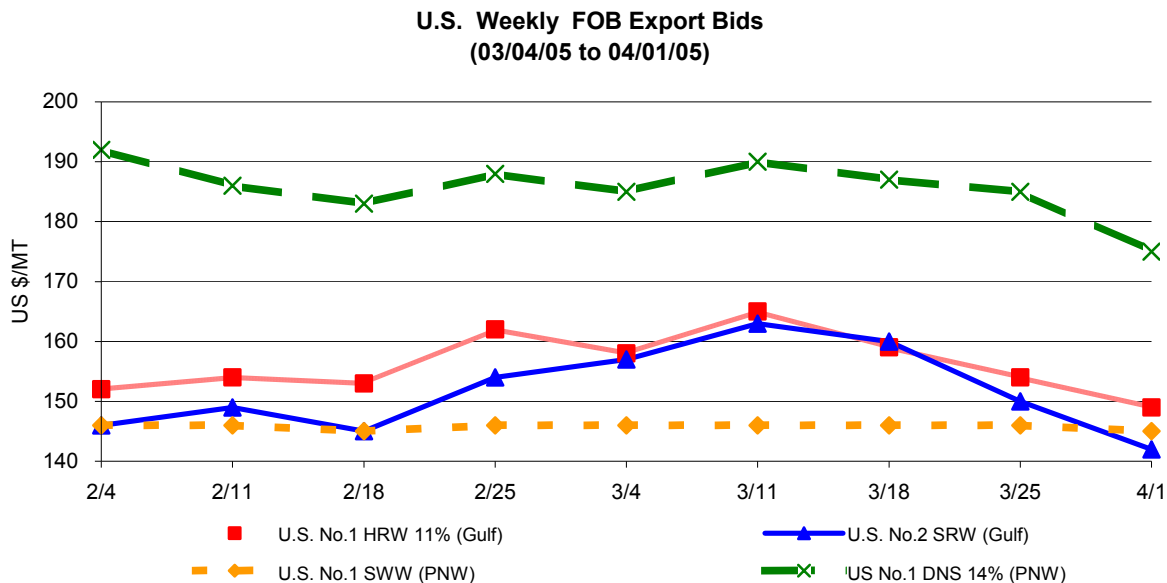

EU Export Subsidies Drop: During March, EU subsidies fell below 4 euros per ton (from 10) on licenses of less than 350,000 tons (compared to 1.2 million the previous month). With limited late-season demand in key Mediterranean markets, more wheat will likely go into intervention, with ending stocks expected to more than double from last year.

PRICES:

Domestic: Wheat prices rallied initially in March, but trended downward for the rest of the month as the dollar gained strength and crop conditions for winter wheat remained rather good. Falling basis premiums added to the downward pressure for DNS.

For the week ending April 1, and compared to a month earlier, average HRW prices were \$9 a ton lower, while SRW were \$15 a ton lower. HRS prices dropped \$10 a ton, while SWW lost only a \$1 a ton.

TRADE CHANGES IN 2004/2005

Selected Exporters

- **Argentina** up 500,000 tons to a record 12.0 million due to strong shipments and robust sales.
- **EU-25** down 1.0 million tons to 13.5 million with limited late-season demand in Mediterranean markets and smaller export subsidies.
- **Romania** down by half to 100,000 because of slow sales and competition from nearby suppliers.

Selected Importers

- **Saudi Arabia** down 350,000 tons to 50,000 due to lack of purchases to date.

-
- **South Korea** down 200,000 tons to 3.8 million due to slower than expected early season purchases of feed-quality wheat from the Black Sea region. Imports of wheat for feeding from Canada, however, have begun to grow in recent months.
 - **Nigeria** up 200,000 tons to a record 2.6 million as expanding consumption drives larger imports, almost entirely from the United States.
 - **Philippines** down 300,000 tons to 2.8 million, the lowest in 6 years. A record corn crop has dampened import demand for wheat for feed.
 - **Turkey** down 200,000 tons to 600,000 as ample domestic supplies have reduced the need for imports.
 - **United States** up 100,000 to 1.9 million due to larger than expected late-season imports of soft wheat from Canada.

NOTES: Regional definitions appear on last page of this circular. Imports are reported on an international year basis. All other data are reported using marketing years.

RICE: WORLD MARKETS AND TRADE

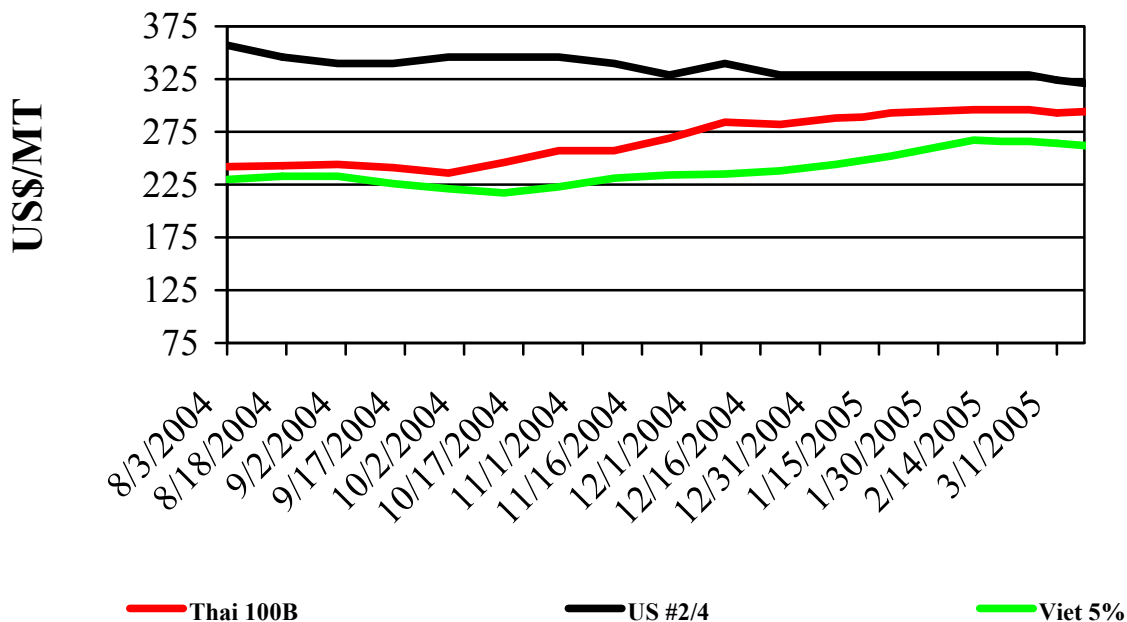

MONTHLY HIGHLIGHTS:

Philippines Imports Boosted: Despite the prospects of successive record harvests and large carryin stocks, the National Food Authority (NFA) nevertheless is still concerned about weather and rising prices later in the year. The Philippines is expected to import 1.6 million tons this year, the highest amount in 7 years. The NFA has already contracted for over 900,000 tons of rice in the first quarter, mainly from Vietnam. A third tender is expected in May.

PRICES:

International: Reversing course from last month, Asian prices have risen steadily. In Thailand, prices remain supported by the government intervention program, which has been extended to the dry crop. Thai 100B is currently quoted at \$301 per ton, FOB, up \$7 from last month. Viet prices have rebounded as well, but ample exportable supplies have tempered further price gains. Viet 5% is currently quoted at \$265 per ton, FOB, up \$3 from last month. In contrast, prices in India have softened slightly over the last month with 5% quoted at \$265 per ton, FOB, down \$5 from last month.

Nominal Price Quotes, 2004-Present

Domestic: U.S. prices remained unchanged from month to month, with U.S. #2/4 long grain milled rice quoted at \$321 per ton, FOB. The price spread between similar qualities of U.S. and Thai rice has shrunk to a low of \$20 per ton. Prices for U.S. #1/4 medium grain milled rice from California are currently quoted at \$290 per ton, FOB, down \$5 from last month.

TRADE CHANGES IN 2005

Selected Importers

- **Indonesia** is dropped 300,000 to 700,000 tons. The government intends to review the import ban in May, and there is speculation in the trade that it will be extended until the end of the year.
- **South Korea** is increased 20,000 to 230,000 tons to adjust for its new Minimum Market Access requirements.
- **Peru** is boosted 20,000 to 90,000 tons due to the brisk pace of imports through the first quarter of the year.
- Import demand is expected to surge 300,000 to 1.6 million tons in the **Philippines** in response to weather and price concerns.
- The **United States** is raised 15,000 to 475,000 tons due to expectations that the strong pace of imports in the fall will continue this year.

TRADE CHANGES IN 2004

Selected Exporters

- Changes to **Burma** are based on year-end export statistics.
- **India** is boosted 100,000 to 3.1 million tons based on stronger import demand in nearby markets during the second half of the year.
- **Pakistan** is raised 100,000 to 1.9 million tons due to stronger-than-expected imports by East African markets.

Selected Importers

- Changes to **Benin, Brunei, Iraq, Japan, South Korea (revised), Nigeria, Somalia, and South Africa** are based on year-end statistics.
- **Cameroon** is raised 50,000 to 275,000 based on increased import demand.
- **Indonesia** is reduced 50,000 to 650,000 tons based on near year-end statistics.
- **Sri Lanka** is raised 65,000 to 215,000 tons based on stronger imports from Pakistan and India.

NOTES: Regional definitions appear on last page of this circular. Imports are reported on an international year basis.

All other data are reported using marketing years.

COARSE GRAINS: WORLD MARKETS AND TRADE

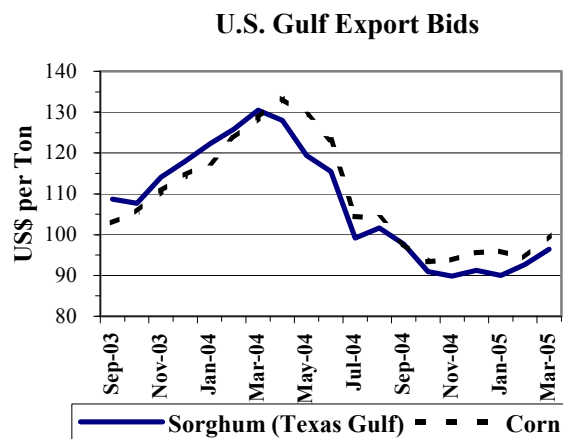

MONTHLY HIGHLIGHTS:

China To Export More Corn: Beijing recently announced another 3-million-ton export quota. In addition, the government has also increased the Value Added Tax (VAT) rebate to exporters. Together, these measures suggest that there are sufficient domestic supplies to support higher exports. Traders have reportedly signed contracts for over 4 million tons to be shipped by June. Reports of exporters having difficulties sourcing the grain notwithstanding, China is expected to step up shipments in the coming months.

PRICES:

Domestic: March export bids for #2 yellow corn averaged nearly \$100/MT, up more than \$5 from February and the largest change in 6 months.

March export bids for #2 yellow sorghum (Texas Gulf) averaged over \$96/MT, up almost \$4 from the previous month but still more than 25 percent below year-ago prices. Sorghum's discount to corn doubled from that of February to over \$3 per ton.

TRADE CHANGES IN 2004/2005

Selected Exporters

- **United States corn** is cut by 1.0 million tons to 45.5 million because of more competition from China.
- **Argentina corn** is raised by 0.5 million tons to a record 14.0 million because of increased demand from Brazil.
- **China corn** is increased by 1.0 million tons to 5.0 million due to newly announced government measures that encourage exports.
- **Serbia corn** is lowered by 400,000 tons to 200,000 due to reduced supplies and higher domestic needs.
- **EU barley** is cut by 500,000 tons to 2.8 million because of slow exports thus far and reduced import demand from Saudi Arabia.
- **Australia sorghum** is up by 100,000 tons for the second consecutive month (to 700,000) because of a record crop. **Argentina sorghum** is reduced by the same amount, given its

quality and transportation disadvantages. This is the lowest in 10 years and the second lowest in USDA's database.

- **EU rye** is up 100,000 tons to 650,000 due to larger than expected sales out of intervention stocks.

Selected Importers

- **Brazil corn** is raised by 600,000 tons to 1.0 million, the highest in 5 years, because of a drought-affected crop and strong domestic demand.
- **Venezuela corn** is lowered by 200,000 tons to 600,000 due to sluggish imports.
- **Saudi Arabia barley** is down by 500,000 tons to 6.0 million because of good pasture conditions.

Notes:

Trade year statistics are on a July/June year for wheat and an Oct/Sep year for coarse grains.

The Coarse Grains category includes barley, corn, millet, oats, rye, and sorghum.

Production estimates are on a clean-weight basis.

Notes:

Wheat trade year statistics are on July/June years. Barley, corn, sorghum, rye, and oats trade year statistics are on Oct/Sept years. Rice statistics are rough basis; trade year statistics are for subsequent calendar year. Rounding errors in conversion from international units cause some discrepancies with World Board Supply and Demand Estimates.

Notes:

Coarse grains trade data are on July/June years through 1975/76. From 1976/77 to the present, coarse grains data are on an Oct/Sept trade year. "Stocks as a Percent of Consumption" represents the ratio of marketing year ending stocks to total consumption.

Notes:

Stocks, exports, and consumption are expressed on a milled basis in marketing years. Trade is on a milled basis in calendar years. "Stocks as a Percent of Consumption" represents the ratio of marketing year ending stocks to total consumption.

ENDNOTES TO GRAIN: WORLD MARKETS AND TRADE

REGIONAL TABLES

North America: Canada, Mexico, the United States.

Latin America: Central America, the Caribbean, South America.

EU: Austria, Belgium/Luxembourg, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Malta, Netherlands, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, United Kingdom.

Former Soviet Union: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan.

Other Europe: Albania, Azores, Bosnia and Herzegovina, Bulgaria, Croatia, Gibraltar, Iceland, Macedonia, Norway, Romania, Serbia and Montenegro, Switzerland, Yugoslavia.

Middle East: Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, Yemen.

North Africa: Algeria, Egypt, Libya, Morocco, Tunisia.

Other Africa: all African countries except North Africa.

South Asia: Afghanistan, Bangladesh, Bhutan, India, Nepal, Pakistan, Sri Lanka, Maldives.

Southeast Asia: Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Vietnam.

East Asia: China, Hong Kong, Japan, South Korea, North Korea, Macau, Mongolia, Taiwan.

Oceania: Australia, Fiji, New Zealand, Papua New Guinea.

OTHER NOTES

Stocks: Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in marketing year imports and marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

EU Consolidation: The trade figures for the EU-25 for the years 1999/00 through 2002/03 are inflated by the two-way trade between the two groups (EU-15 and acceding 10). Over the past 6 years, this “intra-trade” has averaged about 700,000 tons for wheat, 350,000 tons each for corn and barley, and 150,000 tons for rye. The trade figures also include intra-trade between members of the acceding 10. From 2003/04 onward, all intra-trade has been removed.

Statistics: (1) Wheat trade statistics include wheat, flour, and selected products on a grain equivalent basis. (2) Rice trade statistics include rough, brown, milled, and broken on a milled equivalent basis. (3) Coarse grains statistics include corn, barley, sorghum, oats, rye, millet, and mixed grains but exclude trade in barley malt, millet, and mixed grains.

Unaccounted: This term includes grain in transit, reporting discrepancies in some countries, and trade to countries outside the USDA database.

The Grain and Feed Division, Commodity and Marketing Programs, Foreign Agricultural Service, USDA, Washington DC 20250, prepared this circular. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attachés and Foreign Service officers, results of office research, and related information. Further information may be obtained by writing the division or telephoning (202) 720-6219.

Note: The previous report in this series was the Grain: World Markets and Trade Foreign Agricultural Service Circular FG 03-05 March 2005. For further details on world grain production, see World Agricultural Production Foreign Agricultural Service Circular WAP 04-05 April 2005.

This circular is available in its entirety on the World Wide Web via the Foreign Agricultural Service Home Page. The address is: <http://www.fas.usda.gov>
