John R. Stulp, Commissioner

Bill Ritter, Jr.  
Governor

July 2008

Dear Friends,

Once again, it is my pleasure to present to you the Colorado Agricultural Statistics publication.

Fields being tilled by a single horse and plow is a thing of the past. The agricultural industry has become an extremely high tech world and with that technology comes an ever-increasing need to manage that information.

This publication is a warehouse of Colorado statistics and provides a wealth of information on agriculture throughout the state. This data can be used to not only make the decisions that concern us today but help develop agriculture programs in the future.

Agriculture must be a forward-thinking industry. Combining science and technology is creating a new demand for Colorado's ag industry; developing solar, wind and renewable fuels on the same fields as our corn, wheat and cattle is the new frontier in agriculture. Solid statistics help make those decisions that will develop into new markets.

This edition offers concise and reliable information compiled and developed by the Colorado Agricultural Statistics Service, an agency of the U.S. Department of Agriculture, in cooperation with the Colorado Department of Agriculture.

I would like to thank CASS and all of the farmers and ranchers who make this book possible.

Sincerely,

A handwritten signature in black ink that reads "John R. Stulp". The signature is fluid and cursive.

John R. Stulp  
Commissioner

## COLORADO

The Centennial State, admitted to the Union in 1876, is the eighth largest state in area and has the highest average elevation. The highest point is at Mount Elbert, 14,433 feet above sea level, one of the 53 "fourteeners" rising above 14,000 feet. The lowest elevation is 3,350 feet in extreme eastern Prowers County.

Approximate Land Area: 66.3 Million Acres \*  
 Approximate Cropland Area: 11.5 Million Acres \*  
 Approximate Irrigated Area: 2.6 Million Acres \*  
 Number of Farms and Ranches (2007): 31,000  
 Land in Farms and Ranches (2007): 30.7 Million Acres  
 Average Size of Farm and Ranch (2007): 990 Acres

### Farms by Type \*

87% Individual  
 6.7% Partnership  
 5.2% Corporate  
 1.1% Other

### Farms By Tenure \*

66% Full Owners  
 26% Part Owners  
 8% Tenants

### Farms By Class \*

60% Livestock & Poultry  
 40% Crops

Farm Marketing Receipts (2007): \$6,297.3 Million  
 Livestock & Livestock Products: \$4,270.9 Million (67.8% of the total)  
 Field, Fruit, & Vegetable Crops: \$2,026.4 Million (32.2% of the total)

\* 2002 Census of Agriculture

## FIELD CROP REVIEW 2007

The estimated value of production for Colorado's principal field crops (excluding sugarbeets) totaled just over \$2.21 billion in 2007, up 48 percent from the comparable value of \$1.49 billion in 2006. The value of production from the State's four leading crops in 2007 (all wheat, corn for grain, all hay and all potatoes) totaled \$1.99 billion and accounted for 90 percent of the total value from all field crops (excluding sugarbeets). Above average growing conditions continued well into the summer after a stormy winter left adequate soil moisture supplies for dryland crops such as winter wheat. Water shortages and well restrictions for irrigation continued in 2007. Price increases for most field crops helped make 2007 a record year for value of production.

**Corn** moved up to the leading crop produced in the State in terms of total value of production. The combined value of corn for grain and corn for silage was estimated at \$684.8 million for the 2007 crop, up 52 percent from the comparable value of \$449.4 million for the 2006 crop. Corn for grain production increased from a year earlier as a 23 percent increase in harvested acreage more than offset a 9 percent drop in average yield. Yields averaged 142 bushels per acre, down 14 bushels from last year. The 2007 corn for grain crop was valued at \$602.1 million with a record high average price received of \$4.00 per bushel. An 87 percent increase in the value of production for corn silage in 2007 was the result of a 20,000 acre increase in acreage harvested, a 3.0 ton increase in yield per acre, and a \$8.00 per ton increase in value. The average price received was \$32.00 per ton, a record high. Value of the 2007 crop was estimated at \$82.7 million, up from \$44.3 million in 2006. Production increased to 2.6 million tons with a 23.5 ton per acre yield. Acres harvested totaled 110,000.

**Wheat** received a second place ranking in value of production for 2007 with a total value of \$607.8 million, over three times the \$189.0 million value assigned the 2006 crop. The winter wheat crop was valued at \$596.9 million compared with \$181.1 million in 2006 while the value of the spring wheat crop increased to \$10.9 million from \$7.9 million last year. The 2007 winter wheat crop of 94.0 million bushels was up as the result of 450,000 additional acres harvested in 2007 and a 19.0 bushel per acre increase in yield. Good fall seeding conditions combined with a moist spring increased average yield per acre to 40.0 bushels, the second highest on record. Spring wheat production dropped 6 percent from last year to 1.5 million bushels due entirely to a 5.0 bushel decrease in average yield. Yield was set at 80.0 bushels per acre. Harvested acreage remained at 19,000 acres. Average price received for both crops set record highs at \$6.35 per bushel for winter and \$7.20 for spring.

**Hay** was ranked third in value of production for 2007 falling from first place in 2006. The value of all hay production increased 5 percent from the previous year to \$596.6 million. Value of the 2007 alfalfa hay crop, at \$408.5 million, was up 4 percent from the previous year. Increases in acreage harvested and average price received more than offset a slight decrease in yield. The value of production for all other hay also increased, up 6 percent to \$188.1 million, due entirely to an increase in the average price received.

**Potatoes** ranked fourth in terms of value of production with the 2007 crop value estimated at \$181.5 million, down 5 percent from \$190.5 million received for the 2006 crop. The crop was smaller than last year's in terms of total production. The summer potato crop was 24 percent smaller than the 2006 crop and the fall potato crop fell 8 percent. Harvested acreage was 1,400 acres less than last year at 61,900. Average yield decreased 24 hundredweight per acre from last year's crop to 355 cwt.

**Sugarbeet** production totaled 765,000 tons in 2007, down 14 percent from the 2006 crop of 889,000 tons. The 29,200 acres harvested represented an decrease of 23 percent from the previous year. The 2006 crop was valued at \$37.5 million but no value has yet been determined for the 2007 crop.

**Proso millet** production in 2007 had an estimated value of \$36.5 million, up 70 percent from the value of the 2006 crop. Producers harvested 260,000 acres of proso millet in 2007 compared to 255,000 acres in 2006. Total production, at 8.6 million bushels, was 60 percent greater than the 2006 crop. Average yield, at 33.0 bushels per acre, was 12.0 bushels above last year. Prices for the 2007 crop averaged \$4.25 per bushel, up from \$4.00 received for the 2006 crop.

The combined production of **grain and silage sorghum** had an estimated value of \$28.6 million for the 2007 crop compared with \$16.9 million the previous year. Sorghum for grain in 2007 totaled 5.6 million bushels, up from 3.4 million a year earlier as producers harvested 15 percent more acres with an 11 bushel per acre gain in yield. Total value of production of grain sorghum totaled \$21.4 million compared with \$10.7 million the previous year as the average price received increased \$.68 per bushel to \$3.86.

The 2007 **barley** crop has an estimated value of \$26.5 million, up 121 percent from the 2006 crop value of \$12.0 million. Producers harvested 38 percent more acres than a year earlier, and averaged 125.0 bushels per acre, 10.0 bushels above the previous year. Producers received higher prices for the latest crop averaging \$3.65 per bushel compared with \$2.48 last year. Much of the malt barley grown in the San Luis Valley did not meet quality standards and was sold for feed.

The 2007 crop of **sunflowers** was valued at \$25.3 million, up 73 percent from the 2006 crop value of \$14.6 million. A 22 percent increase in acres harvested and higher yields resulted in a 25 percent increase in production. Production of oil varieties, at 115.0 million pounds, was up 39 percent from that of a year earlier. Non-oil production decreased 20 percent to 20.8 million pounds. The oil crop's value is estimated at \$21.0 million while the non-oil crop is estimated at \$4.3 million.

The **dry edible bean** crop produced in 2007 was valued at \$20.8 million, down 19 percent from the 2006 crop. Harvested acreage fell 14,000 acres from 2006 to 46,000. Total production of 736,000 cwt was down 35 percent from the 2006 crop. However, prices received for the latest crop averaged \$28.30 per cwt, up \$5.80 per cwt from 2007.

## Colorado Fruit Crops – 2007

### Value of Production (\$000)

### FRUIT CROPS – 2007

Fruit production for the three major fruit crops in Colorado during 2007 totaled 42.4 million pounds, down 11 percent from the 47.6 million pounds produced a year earlier. Production was reduced in all three crops. Producers continued to make efficient use of limited water supplies, but a late frost, once again, reduced apple and pear production. Utilized production of Colorado's three fruit crops had a combined value of \$22.2 million for 2007, up 2 percent from \$21.9 million a year earlier. Increases in prices received for pears and peaches more than offset lower production in 2007.

The leading fruit crop produced in the State for the 2007 season was **peaches** in terms of value of production and total production. The 13,000 tons produced was down 7 percent from the previous year and the value of the 11,000 tons of product utilized increased slightly from the previous year to \$17.08 million. Producers received an average price of \$1,550 per ton for the latest crop compared with \$1,310 per ton for the 13,000 tons of utilized production from the 2006 crop.

**Apples** ranked second in terms of total production and value for the 2007 crop. The total production of 13.0 million pounds in 2007 was 13 percent less than the 15.0 million pounds produced in 2006. A late frost reduced this year's production. The utilized production of 13.0 million pounds was valued at \$3.49 million, down 8 percent from the \$3.78 million received for the 14.0 million pounds of utilized production from the 2006 crop. Grower prices averaged 26.8 cents per pound for the 2007 crop compared with 27.0 cents in 2006.

The 2007 **pear** crop totaled 1,700 tons, down 8 percent from 2,300 tons produced in 2006. A late frost also reduced this year's production. Producers received \$976 per ton for their 2007 crop compared with \$543 per ton in 2006, increasing the total value to \$1.66 million, up from \$1.09 million the previous year.

<sup>1/</sup> In certain years, production includes some quantities not harvested because of economic conditions which are excluded in computing values.

## Colorado Vegetable Crops – 2007

### Value of Production (\$000)

### VEGETABLE CROPS – 2007

Vegetable growers in Colorado produced 5.9 million cwt of produce from four fresh market crops in 2007 which had a total value of \$58.0 million. This was down 42.4 percent from the \$100.8 million received for the 6.8 million cwt of vegetables produced from the same crops in 2006. Acreage, production and value estimates are prepared for seven vegetable crops. Spinach, carrot and lettuce statistics were not published in 2007 to avoid disclosure of individual operations. Numerous other vegetable crops are produced in the State but are not annually surveyed for estimates.

**Dry storage onions** continue to be the leading vegetable crop produced in the State. The total output from the 2007 crop totaled 3.2 million cwt, down 17 percent from the previous year. The harvested area decreased 19 percent to 7,700 acres but the average yield of 410 cwt per acre was up 10 cwt from 2006. The quantity of onions expected to be marketed had an estimated value of \$26.1 million compared with \$62.9 million received for the 2006 crop. Prices are expected to average a disappointing \$9.80 per cwt compared with \$18.40 per cwt received last year. Onions represented 54 percent of the vegetable production and 45 percent of the value from the four crops.

**Sweet corn's** value ranked second among vegetable crops produced in the State. The crop accounted for 22 percent of the production and 26 percent of the value of the four vegetables. Production decreased 4 percent from 2006 to 1.30 million cwt. The 9,300 acres harvested was up 3 percent but the average yield of 140 cwt per acre was down 10 cwt from the previous year. The value of the 2007 crop, at \$15.2 million, was down 23 percent from last year as prices averaged \$11.70 per cwt compared with \$14.70 received last year.

**Cabbage** ranked third in both production and value. Production decreased 20 percent from 2006 to 1.1 million cwt. Average yield, at 380 cwt per acre, was down 50 cwt from last year's 430 cwt per acre. The value of production, at \$11.6 million, was down 11 percent from a year earlier as the decrease in production more than offset the increase in price.

**Cantaloupe** ranked fourth in both production and value. Harvested area increased 200 acres from last year to 1,800. Yields also increased to 190 cwt per acre from 170 last year. As a result, production was up 26 percent to 342,000 cwt. Value, however, rose slightly to \$5.1 million from \$5.0 million last year as the average price per cwt received declined \$3.40 to \$15.00 per cwt.

## Planting and Harvesting Dates

### Field Crops: Usual planting and harvesting dates, Colorado

Crop	Usual planting dates	Usual harvesting dates			Principal producing districts <u>1/</u>
		Begin	Most active	End	
<b>Barley:</b>					
Fall sown .....	Sept. 1 - Oct. 15	June 20	July 1 - July 20	Aug. 5	20, 60, 90
Spring sown .....	Mar. 15 - Apr. 30	June 20	July 5 - Sept. 10	Sept. 20	10, 20, 70, 80
Beans, dry .....	May 20 - July 1	Aug. 25	Sept. 5 - Sept. 15	Oct. 10	20, 60, 70, 90
<b>Corn:</b>					
Grain .....	Apr. 15 - June 1	Oct. 1	Oct. 10 - Nov. 20	Dec. 1	20, 60, 70, 90
Silage .....	Apr. 15 - June 1	Aug. 25	Sept. 1 - Sept. 25	Oct. 10	20, 60, 70, 90
<b>Hay:</b>					
Alfalfa .....	...	May 15	June 5 - Sept. 25	Oct. 10	Statewide
Other .....	...	July 1	July 5 - Aug. 10	Sept. 25	Statewide
Oats .....	Mar. 20 - May 5	July 15	July 25 - Aug. 30	Sept. 20	Statewide
<b>Potatoes:</b>					
Fall .....	Apr. 25 - May 25	Sept. 15	Oct. 1 - Oct. 10	Oct. 20	80
Summer .....	Apr. 5 - May 10	July 25	Aug. 15 - Sept. 25	Oct. 20	20
<b>Sorghum:</b>					
Grain .....	May 5 - June 20	Oct. 1	Oct. 10 - Nov. 15	Nov. 25	60, 90
Silage .....	May 5 - June 20	Sept. 1	Sept. 5 - Sept. 20	Oct. 1	60, 90
Sugar beets .....	Apr. 1 - May 25	Oct. 1	Oct. 15 - Nov. 5	Nov. 20	20
Sunflower .....	May 20 - June 10	Sept. 10	Sept. 20 - Oct. 10	Oct. 30	20, 60
<b>Wheat:</b>					
Winter .....	Aug. 20 - Oct. 10	June 25	July 10 - July 20	Sept. 5	20, 60, 90
Spring .....	Mar. 25 - May 20	July 15	Aug. 5 - Sept. 25	Oct. 1	10, 80

1/ See footnotes at bottom of page.

### Fruit Crops: Usual bloom and harvest dates, Colorado

Crop	Usual blooming dates	Usual harvesting dates			Principal producing counties
		Begin	Most active	End	
Apples .....	Apr. 20 - May 10	Aug. 15	Sept. 5 - Oct. 30	Nov. 15	Delta, Mesa, Montrose, Fremont
Peaches .....	Apr. 5 - Apr. 25	July. 15	Aug. 1 - Sept. 15	Sept. 30	Delta, Mesa
Pears .....	Apr. 15 - May 20	Aug. 10	Aug. 15 - Sept. 20	Sept. 25	Delta, Mesa, Montrose

### Vegetable Crops: Usual planting and harvesting dates, Colorado

Crop	Usual planting dates	Usual harvesting dates			Principal producing districts <u>1/</u>
		Begin	Most active	End	
Cabbage .....	June 1 - June 15	Sept. 5	Sept. 20 - Oct. 20	Nov. 1	20, 60, 90
Cantaloupe .....	Apr 15 - May 15	Jul. 25	Aug. 10 - Aug. 31	Sept. 30	90
Carrots .....	Apr. 15 - June 30	Aug. 1	Aug. 15 - Oct. 10	Oct. 31	20, 60, 80
Lettuce .....	Apr. 1 - July 10	June 15	June 20 - Sept. 20	Oct. 15	20, 60, 70, 80
Onions .....	Mar. 10 - May 10	July 15	Aug. 1 - Sept. 30	Oct. 31	20, 70, 90
Sweet corn .....	May 1 - June 30	July 15	July 20 - Sept. 20	Oct. 10	20, 60, 70, 90

1/ For Districts, see map on inside of front cover as follows:

10-Northwest and Mountains; 20-Northeast; 60-East Central; 70-Southwest; 80-San Luis Valley; 90-Southeast.

## PRICES RECEIVED BY FARMERS

Prices received by farmers and ranchers provide a basis for calculating the income from the Agricultural Sector as part of the National Income Accounts. These data are also extensively used to analyze past and current marketing patterns and to make current and future marketing decisions. Prices received for major farm commodities are used in computing the Index of Prices Received by Farmers, an important indicator of the economic environment of the nation's agricultural producers.

### Marketing year average prices, by commodity, Colorado, 1999-2007

# **LIVESTOCK AND POULTRY**

# LIVESTOCK REVIEW 2007

**SUMMARY:** Colorado ranks 10th in the number of all cattle and calves, 4th in the number of all sheep and lambs, 15th in the number of all hogs and pigs, and 24th in the number of all chickens. The state also ranks as the 4th largest cattle feeder with annual marketings of 1.94 million head of fed cattle. Colorado is tied for 2nd in the number of market sheep and lambs, but is first in the nation in the number of lambs slaughtered at 1.05 million head, or 39 percent of the U.S total. Colorado was the 15<sup>th</sup> largest milk producing state in the nation, up one notch from 2006. However, Colorado milk producers ranked third in the nation in 2007 in the average pounds of milk produced per cow.

The total inventory value of the cattle, sheep, hogs, and chickens on hand at the beginning of the year (using the January 1 and December 1 reference dates) were \$2.97 billion, up 8 percent from the comparable value of \$2.74 billion one year earlier. Cattle accounts for 95 percent of this inventory value.

Extreme weather on the Eastern Plains marked the beginning of 2007. Winter storms caused hardship and increased death loss to livestock operations throughout the beginning of 2007. However, the benefit of the abundant precipitation was seen by spring, and lasted throughout the summer grazing season. By the beginning of April, Colorado Pasture and Range Condition was rated 29 percent good to excellent compared to 16 percent good to excellent during the previous year and the five year average. These improved conditions were even more evident by the beginning of June when 70 percent of the Colorado Pasture and Range Condition was rated Good to Excellent compared to 9 percent the previous year and 24 percent for the five year average. Statewide, good and excellent conditions remained through fall, and into winter.

**CATTLE AND CALVES:** Colorado farm and ranch operators had 2.75 million head of all cattle and calves on hand as of January 1, 2008, up 2 percent from the 2.70 million head on hand one year earlier. The total inventory included 1.14 million head of cattle and calves on feed for the slaughter market as of January 1, 2008, up 1 percent from the previous year. The number of cattle and calves on feed at the beginning of this year represented 41.4 percent of the total inventory compared with 41.9 percent one year earlier. More than 96 percent of the total, or 1.1 million head, were in 132 feedlots that have a capacity of 1,000 head or more. The remaining 30,000 head on feed in 2007 were in 88 feedlots with less than 1,000 head capacity. Total marketings of fed cattle from all feedlots in the state for 2007 totaled 1,970,000 head, up 1 percent from the previous year.

The total number of all cows that have calved, at 850,000 head, increased 1 percent from 840,000 head a year earlier. The number of beef cows increased 1 percent from the previous year to 730,000 head. The number of milk cows that calved increased 4 percent to 120,000 head.

The state's dairy herd produced 2.70 billion pounds of milk during the year. The average number of dairy cow numbers increased 4 percent while the number of operations with milk cows continues to decline, dropping 5 percent in 2007. The average production per cow was 22,915 pounds, the third highest in the nation.

There were 790,000 heifers weighing 500 pounds and over on hand at the beginning of this year, up 7 percent from a year earlier. Of that total, 130,000 were being kept for beef cow replacement, up 13 percent from 2007, and 70,000 were for milk cow replacement, up 17 percent from 2007. The remaining 590,000 were other heifers, up 5 percent from 2007 of which 425,000, or 72 percent, were on feed for the slaughter market.

The January 1, 2008 inventory also included 890,000 head of steers weighing 500 pounds or more, down 4 percent, from last year, when 930,000 steers were on feed for the slaughter market. The number of bulls weighing 500 pounds or more was up 11 percent from last year at 50,000 head. The number of calves (steers, heifers, and bulls under 500 pounds) on hand January 1, 2008, at 170,000 head, was up 13 percent from the 150,000 on hand the previous year.

The 2007 calf crop in Colorado, at 790,000 head, was up 1 percent from the 2006 calf crop. This is the fifth year in a row of increases in the calf crop and in beef cows which indicates the herds remain in rebuilding mode after severe drought years in the early 2000's.

The total inventory value of all cattle and calves in Colorado as of January 1, 2008 was \$2.83 billion, 8 percent above the \$2.62 billion for January 1, 2007. The average value of \$1030 per head represented an increase of \$60 per head from the previous year.

The number of operations with cattle at any time during 2007, at 13,100, was up 2 percent from 2006. The number of beef cow operations increased 1 percent to 9,900 while the number of milk cow operations in 2007 declined 5 percent to 600, or 30 operations less than the previous year.

**SHEEP AND LAMBS:** The January 1, 2008 inventory of all sheep and lambs in Colorado totaled 420,000 head, up 5 percent from the number on hand as of January 1, 2007. The number of breeding sheep and lambs, at 190,000, was unchanged from the previous year. The number of market sheep and lambs increased 10 percent to 230,000. The number of replacement lambs increased 6 percent to 34,000 head. The number of ewes one year old and older decreased 1 percent to 150,000 head, while the number of rams one year old and older remained steady at 6,000 head.

Of the 230,000 head of market sheep and lambs, 2,000 head were market sheep and 228,000 head were market lambs. Last year the market sheep and lambs were 2,000 head and 208,000 head, respectively. There were 4,000 lambs weighing less than 65 pounds this year, 3,000 more than last year; 28,000 were in the 65-84 pound weight group, up 8,000 from the previous year; 41,000 weighed 85-105 pounds compared with 37,000 last year; and 155,000 weighed over 105 pounds compared with the 150,000 head in this weight group on January 1, 2007.

The 2007 lamb crop, at 180,000 head, was down 5 percent from the 2006 lamb crop of 190,000. There were 1,600 operations with sheep or lambs in Colorado during 2007, no change from the previous year or from 2005 and 2004.

Wool production in Colorado during 2007 totaled 2.70 million pounds, up 4 percent from the 2.60 million pounds produced in 2006. The number of all sheep and lambs shorn, at 400,000 head, was up 5 percent from the 380,000 head shorn a year earlier. The value of wool production for 2007 totaled \$2.70 million, up 38 percent from a year earlier as producers received \$1.00 per pound of wool sold compared with 75 cents per pound the previous year.

The January 1, 2008 inventory value of all sheep and lambs in Colorado was estimated at \$59.22 million, up 19 percent from a year earlier. The overall average value per head for all sheep and lambs was \$141.00 per head, \$17.00 per head higher than a year earlier.

**HOGS AND PIGS:** Colorado's inventory of all hogs and pigs as of December 1, 2007 totaled 860,000 head, up 2 percent from a year earlier. The latest inventory consisted of 150,000 breeding hogs and pigs, down 3 percent from the 155,000 on hand one year earlier but up 3 percent from 2005. The number of market hogs and pigs, at 710,000, increased 4 percent from the previous year.

The 2007 pig crop in Colorado totaled 2.94 million head, up 1 percent from the 2006 pig crop. Sows farrowed during 2007 totaled 328,000, down marginally from last year. The average litter size of 8.95 pigs in 2007 was up from 8.85 a year earlier. There were 800 operations with hogs in Colorado during 2007, no change from the previous year. Similar to last year, 94 percent of the hogs in Colorado are being raised by 2 percent of the operations. The December 1, 2007 inventory value of all hogs and pigs was \$63.6 million, a 6 percent decrease from the 2006 value. The average value of \$74.00 per head was \$7.00 per head below the previous year.

**GOATS:** Estimates for state inventory totals began on January 1, 2005. Since then, Colorado has seen a 43 percent increase in total goat inventory to a January 1, 2008 inventory of 43,000 head. The number of angora goats on January 1, 2008 increased 33 percent from last year to 2,000 head. Milk goats, at 9,000 head, increased by 1,000 head from last year. Meat goats, at 32,000 head, decreased 9 percent from last year's inventory of 35,000 head.

**CHICKENS AND EGGS:** The all chicken inventory in Colorado as of December 1, 2007 totaled 4.89 million birds, up 6 percent from the 4.60 million on hand one year earlier. The number of layers, at 3.88 million head, increased 4 percent from the previous year's 3.74 million head. The total inventory also included 943,000 pullets less than 20 weeks of age, up 19 percent from December 1, 2006. The remaining inventory of 69,000 other chickens represented no change from the previous year.

During the period December 1, 2006 through November 30, 2007, Colorado's laying flocks produced 1.06 billion eggs, down 2 percent from the 1.08 billion eggs produced during the comparable period a year earlier. The value of production from eggs produced in 2007 totaled \$74.07 million, or 83.9 cents per dozen, compared to \$47.45 million, or 52.6 cents per dozen in 2006. The number of layers averaged 3.77 million for the year, no change from the same period a year earlier. The annual average laying rate last year was 281 eggs per layer compared with 288 eggs per layer one year earlier.

The December 1, 2007 inventory value of all chickens was estimated at \$11.24 million, up 36 percent from \$8.27 million a year earlier. The average value per bird, at \$2.30, was up from \$1.80 on December 1, 2006.

**BEEES AND HONEY:** The number of colonies in Colorado during 2007 decreased 8 percent from a year earlier to 33,000. The total honey production of 1.68 million pounds for 2007 was 38 percent lower than the 2.70 million pounds produced a year earlier. The yield per colony decreased from 75 pounds per colony in 2006 to 51 pounds per colony in 2007. The total value of the 2007 honey crop was \$1.89 million, down 37 percent from \$2.97 million the previous year. The average price received for the 2007 crop was \$1.12 per pound, compared with \$1.10 per pound received for the 2006 crop. December 15, 2007 honey stocks of 892,000 pounds were down 39 percent from 1.46 million pounds a year earlier.

**TROUT:** Twelve operations in Colorado sold trout for the direct consumer market during 2007, while 21 operations in the state raised trout to sell for restoration, conservation and recreational purposes. Direct trout sales totaled \$2.33 million, up 1 percent from the \$2.30 million sold in 2006. The recreational market distributed trout valued at \$4.27 million, down 13 percent from 2006. The total value of the trout sold during 2007 was \$6.60 million, down 9 percent from the comparable value of \$7.22 million a year earlier.

<sup>1/</sup> Quarterly estimates are as follows: Jan.-March; April-June; July-Sept.; Oct.-Dec. Milk cows are the average for the quarter; milk production is total for the quarter; production per cow for the quarter is derived by dividing total production by average number of cows for the quarter.

<sup>2/</sup> Excludes milk sucked by calves.

### Milk cows, milk and milkfat production, Colorado, 1988-2007

# COLORADO COUNTY PROFILES 2008

The information contained on the following County Profiles pages is taken from the latest Census of Agriculture and the latest county data available for specific commodities.

The Census of Agriculture is taken every five years and provides the most comprehensive detailed information about the agricultural industry for each county. More details for a specific county are available on the Internet at: <http://www.nass.usda.gov/census>. From that location, details can be obtained for every State and County in the Nation with options for viewing, printing and downloading of specific data.

County data for specific commodities is prepared annually and is presented in the second column of the County Profile. More detailed information about the county data is available on other pages in this issue of *Colorado Agricultural Statistics*.

## COLORADO State Outline of Agricultural Statistics Districts and Counties

**ASD by Number:** Northwest and Mountains = 10    East Central = 60    San Luis Valley = 80  
 Northeast = 20    Southwest = 70    Southeast = 90

## Counties by Agricultural Statistics District

### ASD 10 Northwest & Mountain

Code	County name
015	Chaffee
019	Clear Creek
037	Eagle
047	Gilpin
049	Grand
051	Gunnison
057	Jackson
065	Lake
081	Moffat
093	Park
097	Pitkin
103	Rio Blanco
107	Routt
117	Summit
119	Teller

### ASD 60 East Central

Code	County name
001	Adams
005	Arapahoe
017	Cheyenne
031	Denver
035	Douglas
039	Elbert
041	El Paso
061	Kiowa
063	Kit Carson
073	Lincoln
095	Phillips
121	Washington
125	Yuma

### ASD 80 San Luis Valley

Code	County name
003	Alamosa
021	Conejos
023	Costilla
079	Mineral
105	Rio Grande
109	Saguache

### ASD 20 Northeast

Code	County name
013	Boulder
014	Broomfield <sup>1/</sup>
059	Jefferson
069	Larimer
075	Logan
087	Morgan
115	Sedgwick
123	Weld

### ASD 70 Southwest

Code	County name
007	Archuleta
029	Delta
033	Dolores
045	Garfield
053	Hinsdale
067	La Plata
077	Mesa
083	Montezuma
085	Montrose
091	Ouray
111	San Juan
113	San Miguel

### ASD 90 Southeast

Code	County name
009	Baca
011	Bent
025	Crowley
027	Custer
043	Fremont
055	Huerfano
071	Las Animas
089	Otero
099	Prowers
101	Pueblo

<sup>1/</sup> Broomfield County was established in November 2001 and was formed from portions of Adams County, Boulder County and Jefferson County. As with the City and County of Denver, the new area will be referenced as the City and County of Broomfield. No Census data is available for Broomfield County and no county data for specific commodities will be shown for either Denver County or Broomfield County. While there is known to be a few agricultural operations in each of the two counties, as with a few other counties in the state, the agricultural data in the minor counties is combined with an adjoining county to avoid disclosure of individual operations.

## Colorado County Profiles 2007

Adams County	County 001	ASD 60	Acres				
			2007 crops	Harvested	Yield	Unit	Production
